RoboCylinder with Battery-less Absolute Encoder & Separate or Built-in Controller

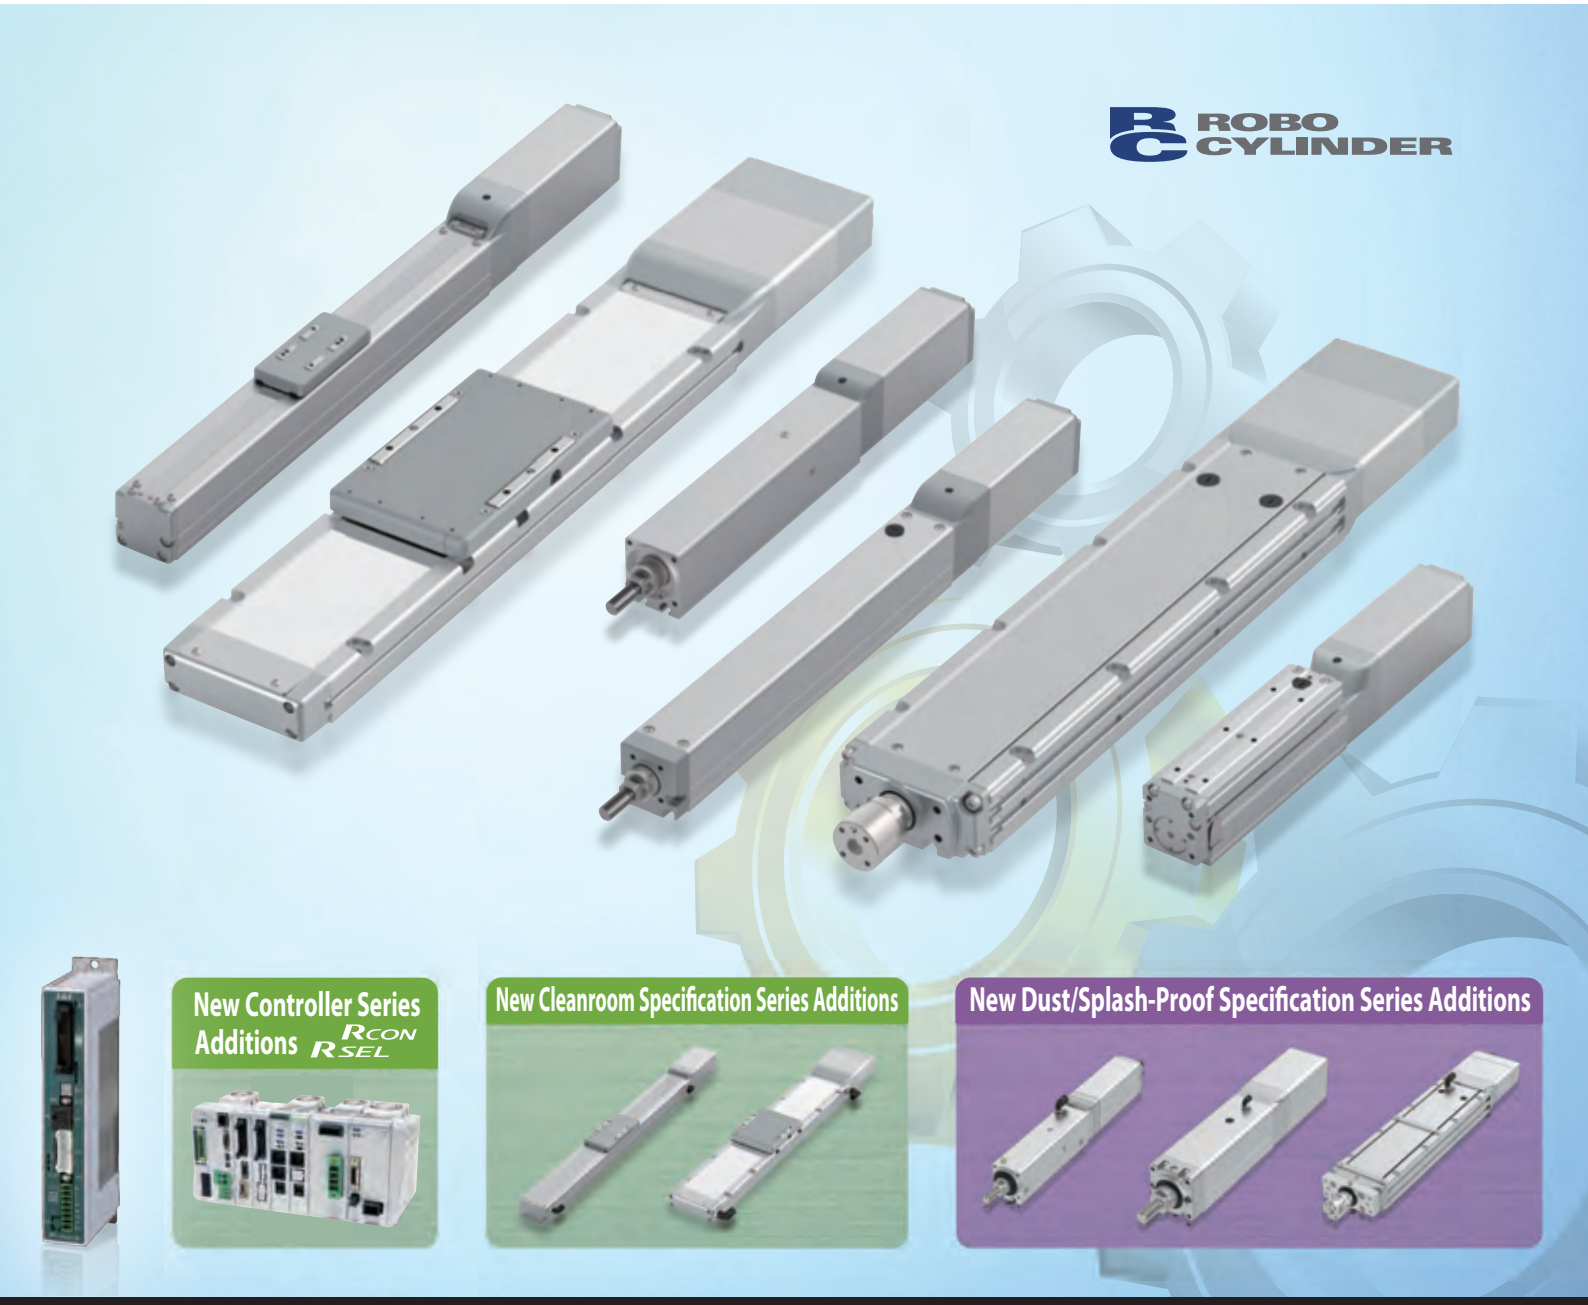
RCP6/RCP6S Series

Cleanroom Slider Type

RCP6(S)CR-SA/WSA

Dust/Splash-Proof Rod Type & Radial Cylinder

RCP6(S)W-RA/RRA/WRA



www.iai-automation.com

IAI's Next Generation RoboCylinder: RCP6

You Can Select the Product That Best Suits Your Needs from an Abundant Lineup of 156 Models*.

*Total by Types, Separate or Built-In Controller, and Specifications

1 Equipped with High-resolution Battery-less Absolute Encoder as Standard.

The advantages of an actuator with battery-less absolute encoder

No battery maintenance is required since there is no battery. Since home-return operation is not required at start up or after emergency stop or malfunction, this reduces your operation time, resulting in reduced production costs. Price is the same as the conventional incremental encoders.

The advantages of using an absolute encoder.

1. With an absolute encoder, home-return is not required.
2. No external home sensor is required since home-return is not necessary.
3. Removal of items being worked on is not necessary, even after an emergency stop.
4. The troublesome creation of home-return programs is not necessary even when stopping in the complex inside of a machine.

The advantages of battery-less

1. No battery maintenance required
2. No installation space for battery required

2 Improved Positioning Repeatability

With the improvement of the accurate processing technology of rolled ball screws and the thread grooves of nuts, a significantly higher precision compared to the previous RoboCylinder's positioning repeatability (±20μm) has been achieved.

Standard specification ±10μm

High-precision specification ±5μm (Available only for RCP6(S)-SA/WSA, RCP6(S)CR-SA/WSA)

*1μm=0.001mm

3 PowerCon Compatible

Compatible with PowerCon which is equipped with a high-output driver. The output of the pulse motor has increased by about 50% due to the use of PowerCon. Shortened cycle times were achieved through increased maximum speeds, which contributes to improved equipment productivity.

4 The Built-in Controller Type Is Available for All Models.

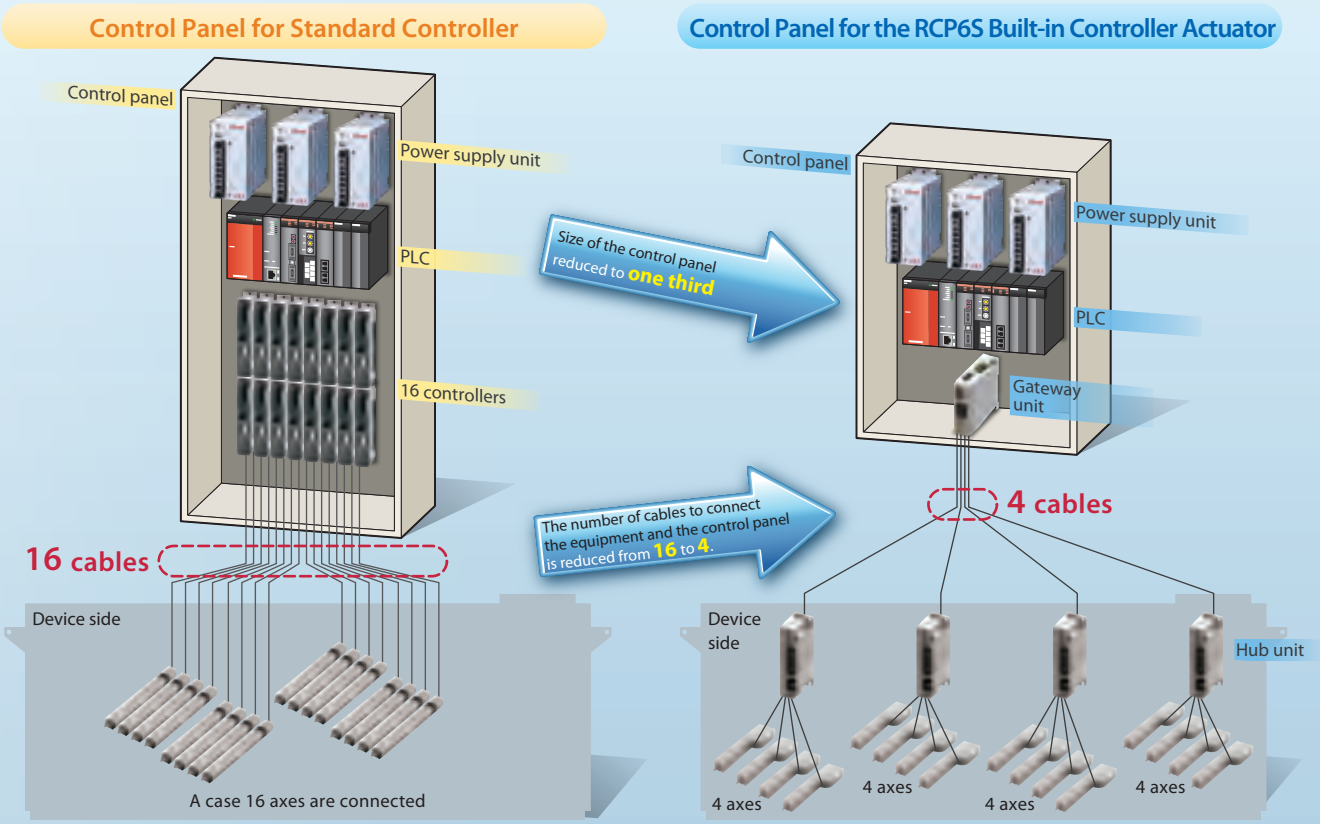
Standard/separate controller type or built-in controller type can be selected for all models.

The advantages of a built-in controller type.

- ▶Smaller control panel.
- ▶Simple wiring.
- ▶Less maintenance parts necessary because wires are being shared.

By using the gateway unit and the hub unit(s), it is possible to reduce the size of the control panel and a number of cables.

*Please refer to P.8 for more information regarding the gateway unit and the hub unit.

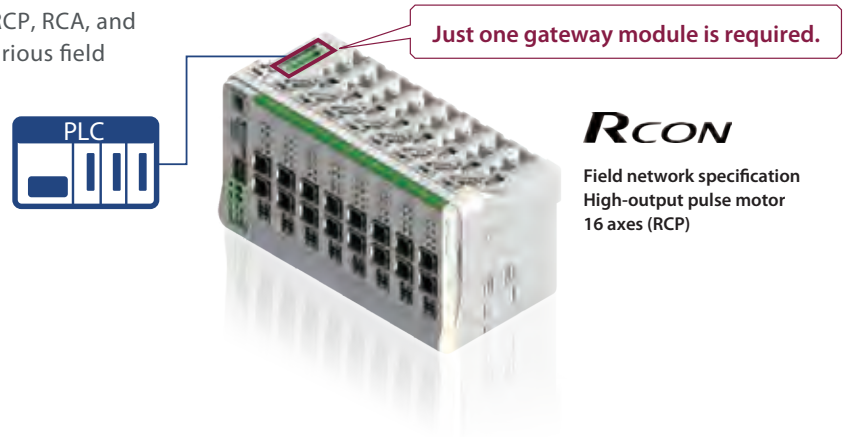


[Notes] Maximum cable length between the gateway unit and RCP6S is 20m.
If there is a hub unit in between, the maximum combined cable length is still 20m.
The cable length from the gateway unit to the hub unit needs to be 10m or less.

New Multi-axis Position Controller RCON and Program Controller RSEL

5 Applicable 1~16-axis Modular Network Controllers for RCP6

These controllers can connect RCP, RCA, and RCD series actuators (24V) to various field networks and a PLC hub unit. Please see the dedicated catalogues for information on connectable models.



RCON

Field network specification
High-output pulse motor
16 axes (RCP)

6 Cleanroom Specification Is Now Available

ISO Cleanliness Class 2.5

US FED Cleanliness Class 10

Cleanroom specification is now available. Eight slider types, including the wide slider, are available in total. Ideal for use in special environments such as cleanroom.

There are 2 standards that represent the cleanliness.

1. ISO Standard 14644-1:2015

The number of particles 0.1µm or larger in $1m^3$ is expressed in exponents when expressed in power of 10.

2. US FED Standard 209D

Displays the number of particles in $1ft^3$ with reference to particles of 0.5µm or more.
<Display method> Class 1, 10, 100, 1000, 10000, 100000

7 Dust/Splash-Proof Specification Is Now Available

IP 65

Dust-proof/splash-proof specification is now available. Twenty-four rod types or 48 models, including the Radial Cylinder and Wide Radial Cylinder, are available in total. Can be used for equipment that comes in contact with water.

Protection Degree Display

IP □ □

First Indicative Number
Protection against human bodies and solid foreign matter

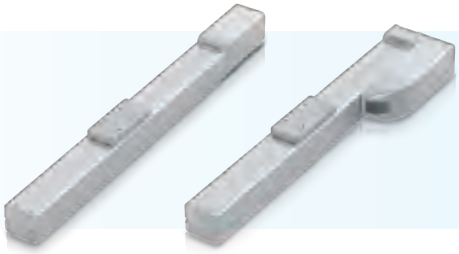
Second Indicative Number
Protection against ingress of water

IP65	Solid foreign matter	(Summary) Dust-resistant type * Total protection of the interior from dust ingress.
	Water	(Summary) Protection from water jets.* No harmful effects from direct water jets coming from any direction.

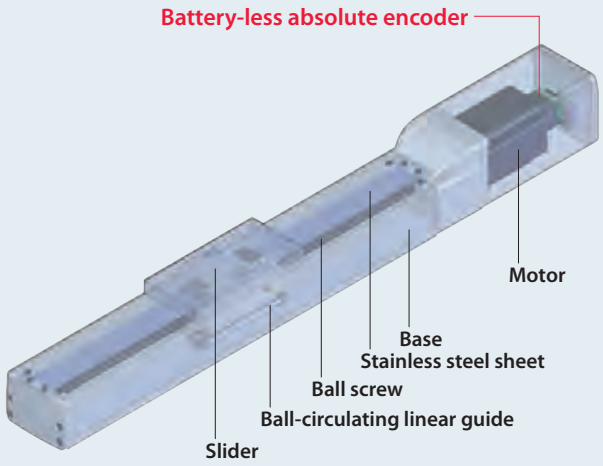
* IEC 60529

Table of Contents

RCP6/RCP6S Series: Models and Features



Slider Type: SA



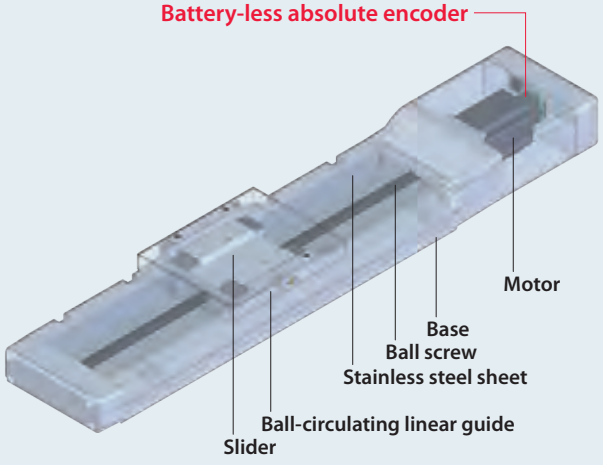
Features

- With a base integrated ball circulating linear guide, it will be able to deal with moments in the pitching (Ma), yawing (Mb), and rolling (Mc) directions.
- By combining multiple axes, two-dimensional and three-dimensional operations are possible.

Usage examples

- Switching from rod-less air cylinder
- Switching from self-made equipment with ballscrew, guide, and motor.
- Using as base and movable axes of the cartesian system.
- Work such as assembly, inspection, and measuring length that require high accuracy.

Wide Slider Type: WSA

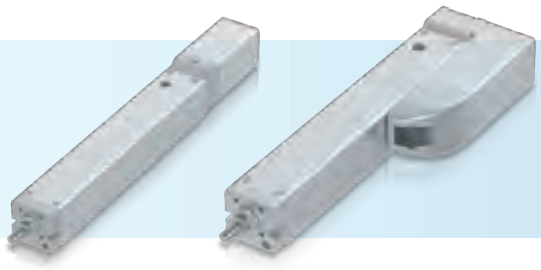


Features

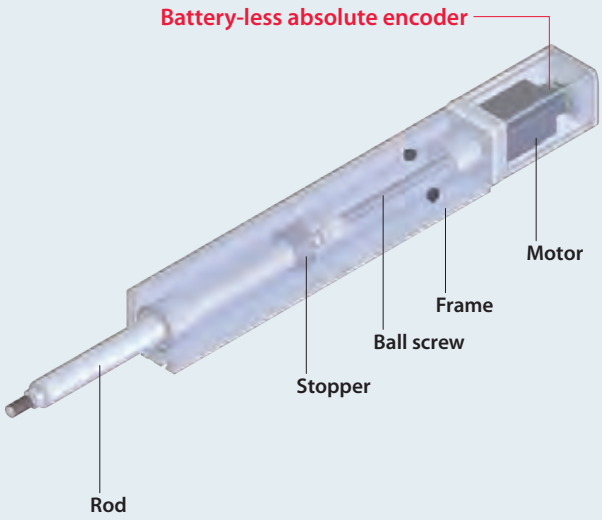
- Perfect for the base axis of the cartesian system. With a built-in ball circulating linear guide inside its wide body, it will be able to deal with moments in the pitching (Ma), yawing (Mb), and rolling (Mc) directions.
- 2nd axis can be installed onto the wide slider type without removing its stainless steel sheet.
- By combining multiple axes, two-dimensional and three-dimensional operations are possible.

Usage examples

- Switching from rod-less air cylinder
- Switching from self-made equipment with ballscrew, guide, and motor.
- Work such as assembly, inspection, and measuring length that require high accuracy.



Rod Type: RA



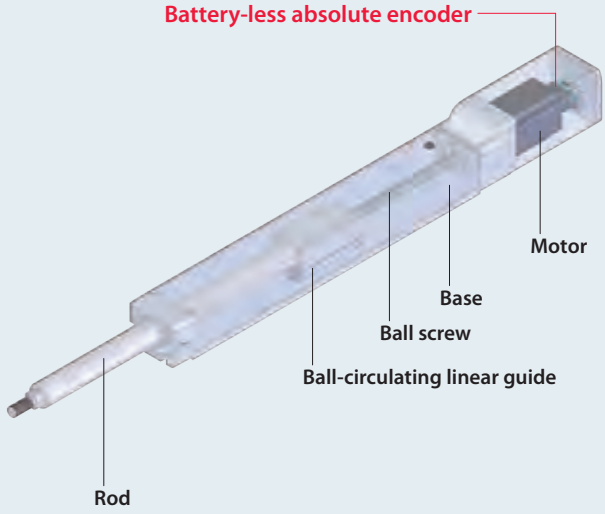
Features

▶ This is a type that does not build in a linear guide inside of the actuator. Of the RCP6 rod-types that resemble air cylinders, this is the least expensive model.

Usage examples

- Switching from rod type air cylinder
- Push force combined with a guide
- Inserting, press-fitting, or riveting a work
- Using as a lifter or a work piece unloader

Radial Cylinder: RRA



Features

▶ Since ball circulating linear guides are built in, it can take radial loads and moment loads. The vibration upon stopping can be suppressed and a long stroke of up to 700mm has become possible. In addition, product quality has significantly increased with a non-rotating rod precision of "0 degree" with a no load condition.

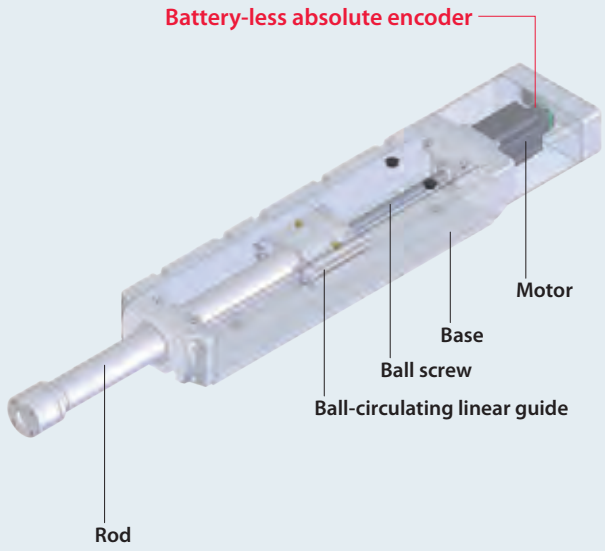
▶ The equipment will be compact since an external guide is unnecessary.

Usage examples

- Inserting, press-fitting, or riveting a work
- Using as a lifter or a work piece unloader
- Using as a movable vertical axis of the cartesian system
- Transferring or positioning a lightweight object

RCP6/RCP6S Series: Models and Features

Wide Radial Cylinder: WRA



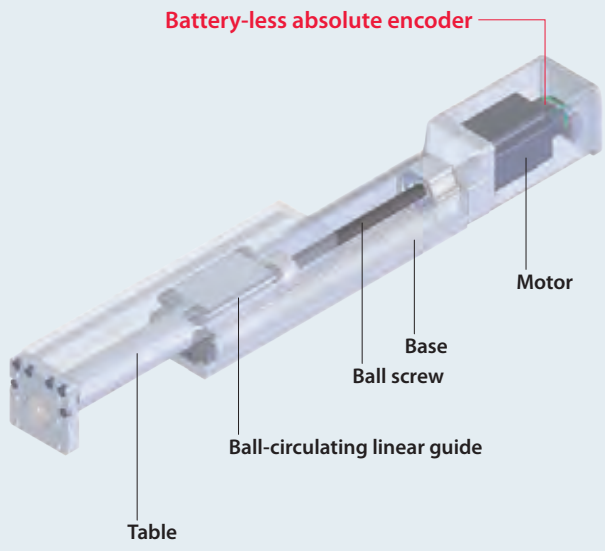
Features

- Due to a wide body and high-rigidity rod, it can deal with up to four times the allowable torque on rod tip compared to a standard radial cylinder. Due to a high dynamic allowable moment, it can be utilized for uses such as tightening screws and stirring that have large load torque.
- The equipment will be compact since an external guide is unnecessary.

Usage examples

- Inserting, press-fitting, or riveting a work
- Tightening a screw or stirring
- Using as a lifter or a work piece unloader
- Using as a movable vertical axis of the cartesian system
- Transferring or positioning a lightweight object
- Using as a base axis of the pick-and-place unit

Table Type: TA



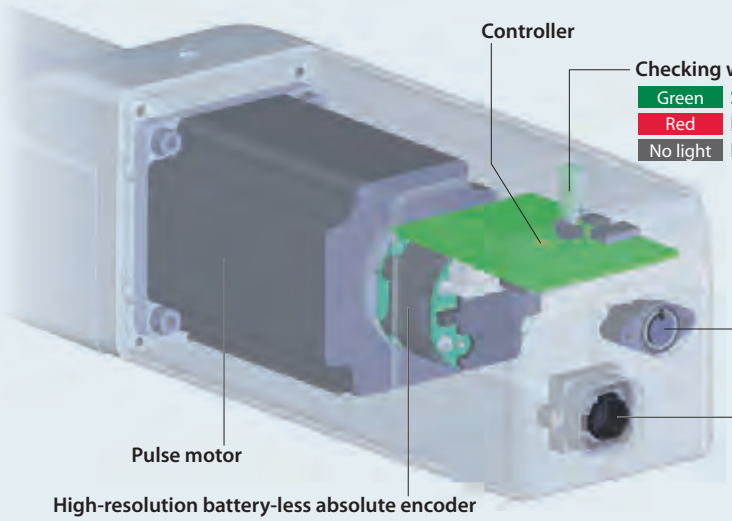
Features

- Work piece can be installed using the tapped mounting holes on the top surface of the table and the tip plate.
- With a built-in ball circulating linear guide in the table section, it will be able to deal with moments in the pitching (Ma), yawing (Mb), and rolling (Mc) directions.
- High-rigidity specification (double-block) can be selected as an option. With two guide blocks, the dynamic allowable moment increases.

Usage examples

- Switching from table type air cylinder
- Clamping tasks that pinch work from both sides
- Positioning tasks that hold work with the front side of the table
- A function for pushing works on a conveyor to the side
- Using as a movable vertical axis of the cartesian system

Built-in Controller Type: RCP6S



RCP6S Peripheral Equipment

*Gateway unit or PLC connection unit is required to operate the RCP6S.

1 Gateway Unit

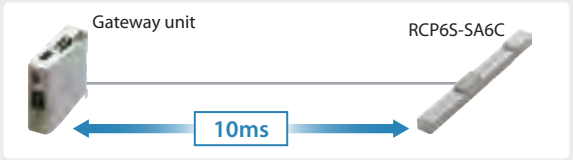
▶Compatible field networks
The gate unit can be used with the following 6 types of field networks.

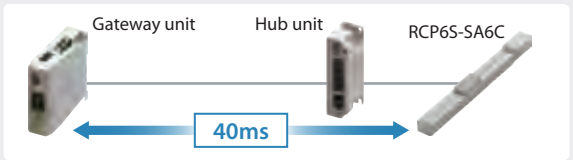
CC-Link | DeviceNet | PROFIBUS | PROFINET | EtherNet/IP | EtherCAT

▶4 RCP6S' or 4 hub units can be connected to a gateway unit.

▶Brake can be forcibly released by supplying power to the brake release input terminal of external power input for each channel. (In the case that the actuator is directly connected)

▶The communication time when RCP6S is connected directly is 10ms, while it is 40ms when using the RCP6S with a hub unit. There will be no change in communication time when the number of connected actuators is increased.





2 Hub Unit

▶A hub unit is a signal distribution unit used by combining with a gateway unit.

▶A gateway unit and a hub unit, or a hub unit and a RCP6 are each connected with a serial communication.

▶A maximum of 4 RCP6S' can be connected.

▶By operating the brake release switch, ON/OFF actions of the brake can be performed.

3 PLC Connection Unit

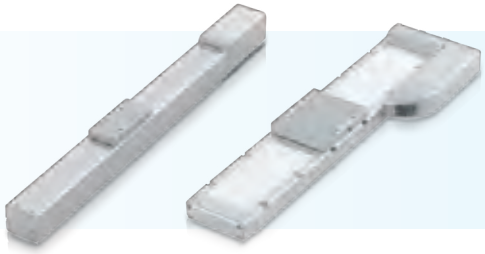
▶A PLC connection unit is a unit to be moved with serial communication from a master controller or a PLC by combining it with RCP6S.

▶A RCP6S and a PLC connection unit can be connected with a cable with connectors.

4 RCP6S Gateway Controller

▶A controller for connecting RCP, RCA and RCD series units to a gateway unit or hub unit.

▶Capable of connecting mini RoboCylinders and gripper type actuators within the RCP6S network.



Product Lineup

Slider Type: SA

Motor	Type	External View	Body Width (mm)	Lead (mm)	Positioning Repeatability (mm)	Stroke (mm)	Max. Speed (mm/s)	Max. Payload (kg) Horizontal	Max. Payload (kg) Vertical	Reference Page
Coupled Motor	SA4C		40mm	16	±0.01	50~500 (50mm increments)	1260	7	1.5	P.21

* Please refer to P.15 for more information about the model specification items.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

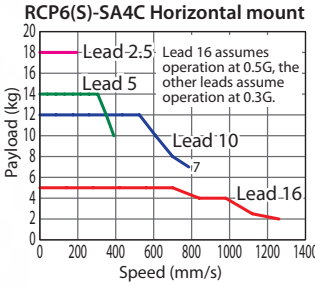
POINT Selection Notes

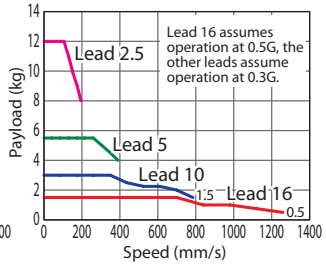
(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.207 for more details.
(3) Please refer to P205 for performing push-motion operation.

■ Correlation Diagrams of Speed and Payload

(1) High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.

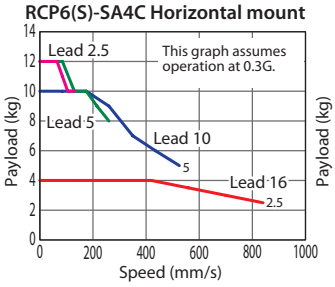
RCP6(S)-SA4C Horizontal mount



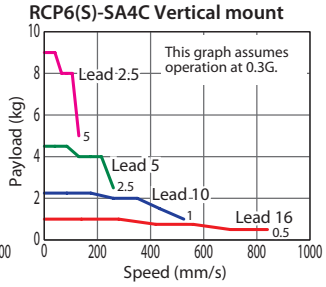


(2) High-output disabled with PCON/RCON/MCON/MSEL/RSEL connected.

RCP6(S)-SA4C Horizontal mount



RCP6(S)-SA4C Vertical mount



Actuator Specifications

■ Lead and Payload

* Push force only available during push mode w/ limited speed.

When selecting multiple options, please list them in alphabetical order. (e.g. B-CJB-NM)

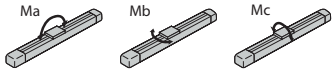
Actuator Specifications

Item	Description
Drive system	Ball screw ø8mm, rolled C10
Positioning repeatability (*1)	±0.01mm [±0.005mm]
Lost motion	0.1mm or less
Base	Material: Aluminum with white alumite treatment
Static allowable moment	Ma: 13.0N•m, Mb: 18.6N•m, Mc: 25.3N•m
Dynamic allowable moment (*2)	Ma: 5.0N•m, Mb: 7.1N•m, Mc: 9.7N•m
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

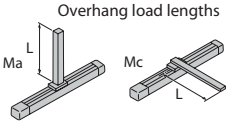
(*1) Values in [ ] are for high-precision (for lead 2.5/5/10) specification.
(*2) Assumes a standard rated life of 5000km. The service life will vary depending on operation and installation conditions.

• Reference for overhang load length: Ma: 150mm or less, Mb, Mc: 150mm or less

Allowable load moment directions



Overhang load lengths



Please refer to the RoboCylinder General Catalog for more information regarding the directions of the allowable moment and overhang load length.

Dimensions

CAD drawings can be downloaded from our website.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.207 for more details.
(3) Please refer to P205 for performing push-motion operation.
(4) Depending on the ambient operational temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 3/6. Please refer to P.247 for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.209 for more details.
(3) Please refer to P205 for performing push-motion operation.
(4) Depending on the ambient operational temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 3/6. Please refer to P.247 for more information.

* Please refer to P.15 for more information about the model specification items.

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.211 for more details.
(3) Please refer to P205 for performing push-motion operation.
(4) Depending on the ambient operational temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 4/8/16. Please refer to P.247 for more information.

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

The figure above is the motor side-mounted to the left (ML).

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.213 for more details.
(3) Please refer to P205 for performing push-motion operation.
(4) Depending on the ambient operational temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 4/8/16. Please refer to P.247 for more information.

When selecting multiple options, please list them in alphabetical order. (e.g. B-CJB-NM)

Actuator Specifications

Item	Description
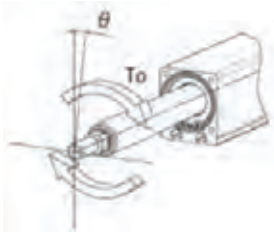
Drive system	Ball screw ø8mm, rolled C10
Positioning repeatability	±0.01mm
Lost motion	0.1mm or less
Rod	ø20mm Material: Aluminum with hard alumite treatment
Static allowable torque on rod tip	To: 1.0N•m
Max. angular displacement on rod tip (*1)	θ: ±1.0 deg.
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

(*1) This is the displacement angle of the rod tip (initial reference value) when the rod is fully retracted and the static allowable torque is applied at the rod tip.



Dimensions

CAD drawings can be downloaded from our website.
www.iai-automation.com

*1 When the rod is returning to its home position, please be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
M.E: Mechanical end S.E: Stroke end
*2 The direction of width across flats varies depending on the product.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.223 for more details.
(3) The value of the horizontal payload assumes that there is an external guide. Please be aware that the anti-rotation stopper can be damaged when an external force is applied to the rod from any direction other than the moving direction.
(4) Please refer to P205 for performing push-motion operation.
(5) Depending on the ambient operational temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 3/6. Please refer to P.247 for more information.

Series	Type	Encoder Type	Motor Type	Lead	Stroke	Applicable Controller/I/O Type	Cable Length	Options
RCP6: Separate Controller RCP6S: Built-in Controller	RA4R	WA: Battery-less Absolute	35P: Pulse Motor 35□ Size	16: 16mm 10: 10mm 5: 5mm 2.5: 2.5mm	50: 50mm ↓ 200: 200mm (50mm increments)	[RCP6] P3 : PCON MCON MSEL P5 : RCON, RSEL [RCP6S] SE: SIO Type	N : None P : 1m S : 3m M : 5m X□□ : Specified Length R□□ : Robot Cable	Please refer to the options table below. *Please make sure to specify ML, MR or MT when ordering the side-mounted motor type.

* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.16 for more information about the model specification items.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

The figure above is the motor side-mounted to the left (ML).

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.225 for more details.
(3) The value of the horizontal payload assumes that there is an external guide. Please be aware that the anti-rotation stopper can be damaged when an external force is applied to the rod from any direction other than the moving direction.
(4) Please refer to P205 for performing push-motion operation.

■ Correlation Diagrams of Speed and Payload

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

The figure above is the motor side-mounted to the left (ML).

POINT Selection Notes

(1) The maximum acceleration/deceleration is 0.1G for lead 5 and 0.2G for lead 10/20.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.225 for more details.
(3) The value of the horizontal payload assumes that there is an external guide. Please be aware that the anti-rotation stopper can be damaged when an external force is applied to the rod from any direction other than the moving direction.
(4) Please refer to P205 for performing push-motion operation.
(5) For RCP6S (built-in controller type), please limit the duty cycle to 70% or less.
(6) The service life of an actuator varies depending on the payload when using vertically. Please refer to P.206 for more information.

* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.16 for more information about the model specification items.

Radial Load OK

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.215 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown in P.243 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) Depending on the ambient operational temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 4/8/16. Please refer to P.247 for more information.

■ Correlation Diagrams of Speed and Payload

* Body width does not include the width of the side-mounted motor.

* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.16 for more information about the model specification items.

Radial Load OK

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

The figure above is the motor side-mounted to the left (ML).

POINT Selection Notes

(1) The maximum acceleration/deceleration is 0.1G for lead 5 and 0.2G for lead 10/20.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.217 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown in P.243 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) For RCP6S (built-in controller type), please limit the duty cycle to 70% or less..
(6) The service life of an actuator varies depending on the payload when using vertically. Please refer to P. 206 for more information.

* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.17 for more information about the model specification items.

Radial Load OK

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.219 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown in P246 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) Depending on the ambient operational temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 3/6. Please refer to P.247 for more information.

Radial Load OK

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 0.1G for lead 5 and 0.2G for lead 10/20.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.219 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown in P.246 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) For RCP6S (built-in controller type), please limit the duty cycle to 70% or less..
(6) The service life of an actuator with lead 5 varies depending on the payload when using vertically. Please refer to P.206 for more information.

* Body width does not include the width of the side-mounted motor.

* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.17 for more information about the model specification items.

Radial Load OK

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

The figure above is the motor side-mounted to the left (ML).

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.221 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown in P246 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) Depending on the ambient operational temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 3/6. Please refer to P.247 for more information.

* Body width does not include the width of the side-mounted motor.

* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.17 for more information about the model specification items.

Radial Load OK

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

The figure above is the motor side-mounted to the left (ML).

POINT Selection Notes

(1) The maximum acceleration/deceleration is 0.1G for lead 5 and 0.2G for lead 10/20.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.221 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown in P.246 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) For RCP6S (built-in controller type), please limit the duty cycle to 70% or less..
(6) The service life of an actuator with lead 5 varies depending on the payload when using vertically. Please refer to P.206 for more information.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.227 for more details.
(3) Please refer to P205 for performing push-motion operation.
(4) Depending on the ambient operational temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 3/6. Please refer to P.247 for more information.

Specified Length	**X06** (6m) ~**X10** (10m)		**R11** (11m) ~**R15** (15m)
	X11 (11m) ~**X15** (15m)		**R16** (16m) ~**R20** (20m)
	X16 (16m) ~**X20** (20m)		—

* Please refer to P.267 and 281 for more information regarding the maintenance cables.

Options

Name	Option Code	Reference Page
Brake	**B**	See P.189
Cable exit direction (Outside)	**CJO**	See P.189
Motor side-mounted to the left	**ML**	See P.193
Motor side-mounted to the right	**MR**	See P.193
Non-motor end specification	**NM**	See P.194

When selecting multiple options, please list them in alphabetical order. (e.g. B-CJB-NM)

Actuator Specifications

Item	Description
Drive system	Ball screw ø8mm, rolled C10
Positioning repeatability	±0.01mm
Lost motion	0.1mm or less
Base	Material: Aluminum with white alumite treatment
Static allowable moment	Ma: 76.8N•m, Mb: 110N•m, Mc: 50.5N•m
Dynamic allowable moment (*)	Ma: 23.9N•m, Mb: 34.1N•m, Mc: 15.7N•m
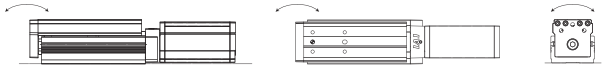
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

(*) Assumes a standard rated life of 5000km. The service life will vary depending on operation and installation conditions.

Allowable load moment directions



Please refer to the RoboCylinder General Catalog for more information regarding the directions of the allowable moment and overhang load length.
Please refer to the RCP6 manual regarding the displacement of the table.

Dimensions

CAD drawings can be downloaded from our website.
www.iai-automation.com

*1 When the table is returning to its home position, please be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
M.E: Mechanical end
S.E: Stroke end
*2 For the single block type with 25~75mm strokes, tools cannot be used on the ø5 front mounting holes on the top surface because the motor unit interferes. Please use the mounting screw holes on the bottom surface. (Same for the RCP6S)

* Body width does not include the width of the side-mounted motor.

* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.17 for more information about the model specification items.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

The figure above is the motor side-mounted to the left (ML).

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.229 for more details.
(3) Please refer to P205 for performing push-motion operation.
(4) Depending on the ambient operational temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 3/6. Please refer to P.247 for more information.

* Body width does not include the width of the side-mounted motor.

* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.17 for more information about the model specification items.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

The figure above is the motor side-mounted to the left (ML).

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specification displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.229 for more details.
(3) Please refer to P205 for performing push-motion operation.
(4) Depending on the ambient operational temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 4/8/16. Please refer to P.247 for more information.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.207 for more details.
(3) When performing push-motion operation, please confirm the push force of each model by checking the "Correlation diagrams of push force and current limit" on P.205.
(4) Depending on the ambient operating temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 3/6. Please refer to P.247 for more information.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.207 for more details.
(3) When performing push-motion operation, please confirm the push force of each model by checking the "Correlation diagrams of push force and current limit" on P.205.

* Please refer to P.18 for more information about the model specification items.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.211 for more details.
(3) When performing push-motion operation, please confirm the push force of each model by checking the "Correlation diagrams of push force and current limit" on P.205.
(4) Depending on the ambient operating temperature, duty control is necessary for the RCP6S (built-in controller type) with lead 3/6. Please refer to P.247 for more information.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.211 for more details.
(3) When performing push-motion operation, please confirm the push force of each model by checking the "Correlation diagrams of push force and current limit" on P.205.
(4) The service life of an actuator with lead 5 varies depending on the payload when using vertically. Please refer to P. 206 for more information.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.231 for more details.
(3) The value of the horizontal payload assumes that there is an external guide. Please be aware that the anti-rotation stopper can be damaged when an external force is applied to the rod from any direction other than the moving direction.
(4) Please refer to P.205 for performing push-motion operation.
(5) The cable joint connector is not splash-proofed, so it should be located where there is no splash.

■ Correlation Diagrams of Speed and Payload

If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.

T-slot nut bar	**NTB**	See P.202

Actuator Specifications

Item	Description
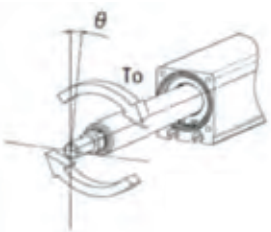
Drive system	Ball screw ø10mm, rolled C10
Positioning repeatability	±0.01mm
Lost motion	0.1mm or less
Rod	ø25mm
Allowable static torque on rod tip	To: 1.5N•m
Max. angular displacement on rod tip (*1)	θ: ±1.0 deg.
Protective structure	IP65 (IEC 60529)
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

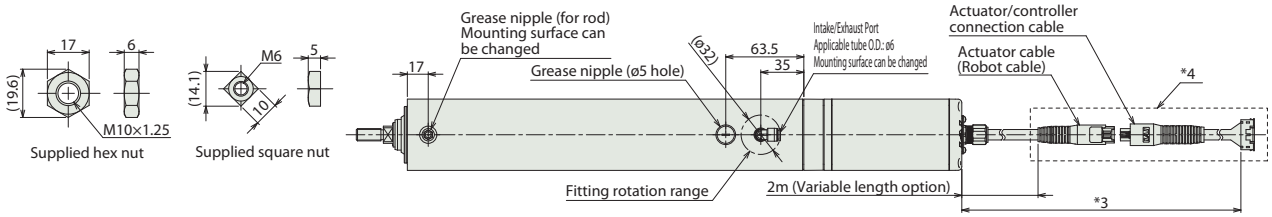
(*1) This is the displacement angle of the rod tip (initial reference value) when the rod is fully retracted and the static allowable torque is applied at the rod tip.

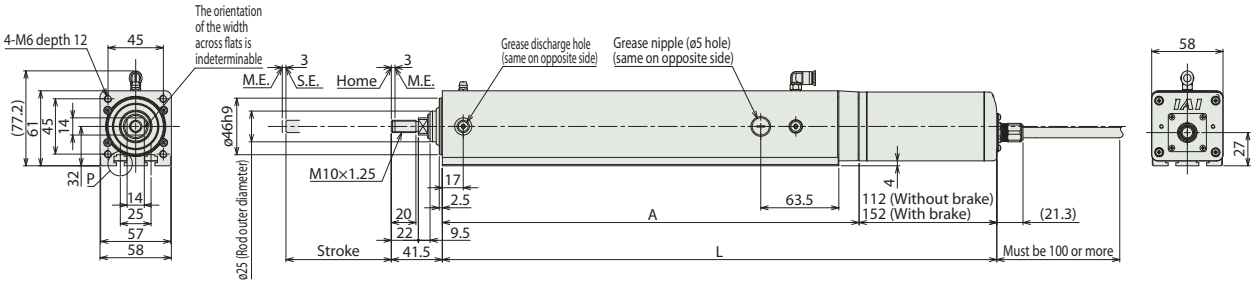


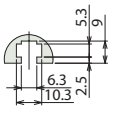
Dimensions

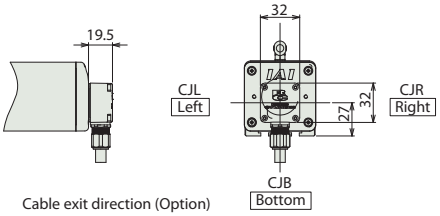
CAD drawings can be downloaded from our website.
www.robocylinder.de

*1 When the rod is returning to its home position, please be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
M.E: Mechanical end S.E: Stroke end
*2 The direction of width across flats varies depending on the product.

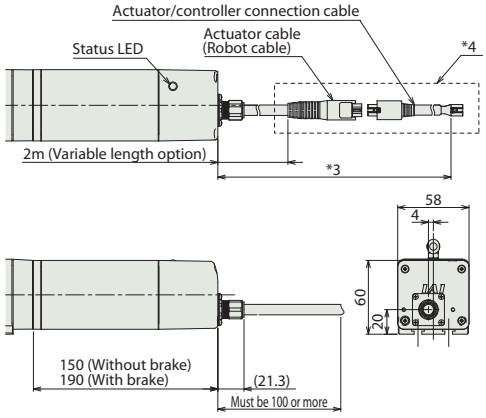


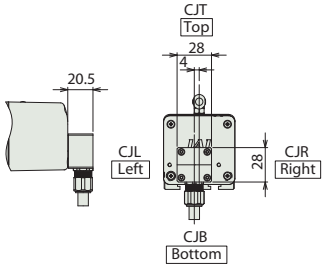






■ RCP6SW-RA6C





Cable exit direction (Option)

*3 Select the length of the actuator cable and the actuator/controller connection cable so that the total is 20m or less.
*4 The cable joint (connector) within the dotted line is not splash-proofed.
*5 Hex nut x 1 pc., square nut x 4 pcs. included.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

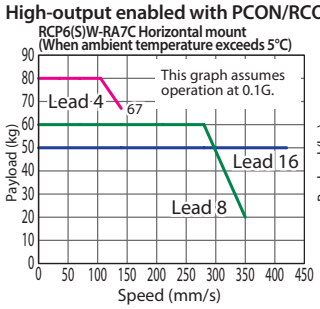
POINT Selection Notes

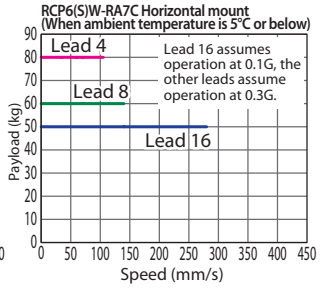
(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.232 for more details.
(3) The value of the horizontal payload assumes that there is an external guide. Please be aware that the anti-rotation stopper can be damaged when an external force is applied to the rod from any direction other than the moving direction.
(4) Please refer to P205 for performing push-motion operation.
(5) Depending on the ambient operating temperature, duty control is necessary for the RCP6SW (built-in controller type) with lead 4/8/16. Please refer to P.247 for more information.
(6) The cable joint connector is not splash-proofed, so it should be located where there is no splash.

■ Correlation Diagrams of Speed and Payload

If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.





High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

The figure above is the motor side-mounted to left (ML).

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.233 for more details.
(3) The value of the horizontal payload assumes that there is an external guide. Please be aware that the anti-rotation stopper can be damaged when an external force is applied to the rod from any direction other than the moving direction.
(4) Please refer to P205 for performing push-motion operation.
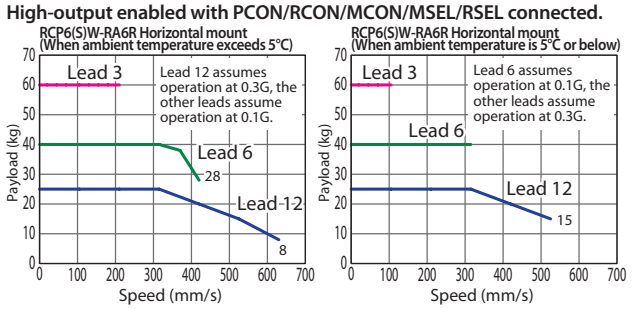
(5) Depending on the ambient operating temperature, duty control is necessary for the RCP6SW (built-in controller type) with lead 3/6. Please refer to P.247 for more information.
(6) The cable joint connector is not splash-proofed, so it should be located where there is no splash.

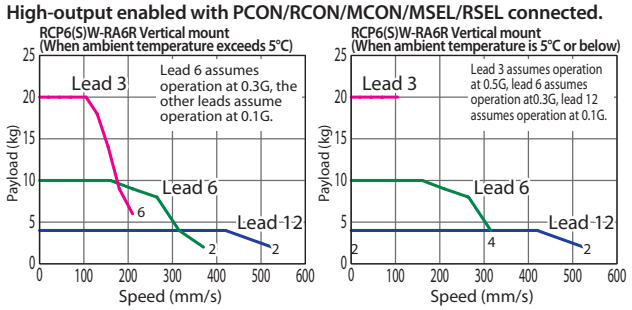
Correlation Diagrams of Speed and Payload

If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.



High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.



Actuator Specifications

Item	Description
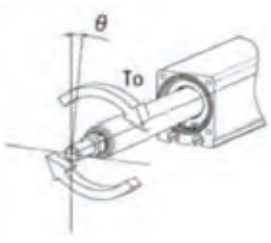
Drive system	Ball screw ø16mm, rolled C10
Positioning repeatability	±0.01mm
Lost motion	0.1mm or less
Rod	ø40mm
Allowable static torque on rod tip	To: 5.0N•m
Max. angular displacement on rod tip (*1)	θ: ±0.8 deg.
Protective structure	IP65 (IEC 60529)
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

(*1) This is the displacement angle of the rod tip (initial reference value) when the rod is fully retracted and the static allowable torque is applied at the rod tip.



Dimensions

CAD drawings can be downloaded from our website.

Radial Load Applicable

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/ side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

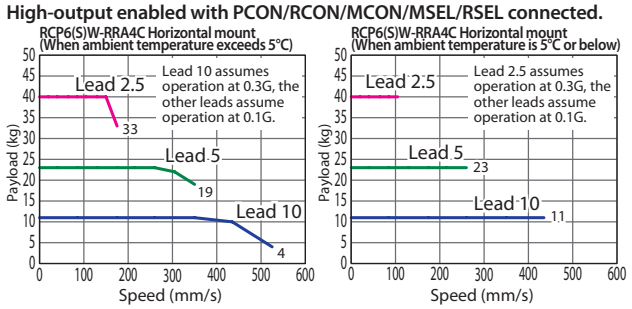
POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.235 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.243 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) The cable joint connector is not splash-proofed, so it should be located where there is no splash.

■ Correlation Diagrams of Speed and Payload

If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.



High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.

* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.19 for more information about the model specification items.

Radial Load Applicable

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
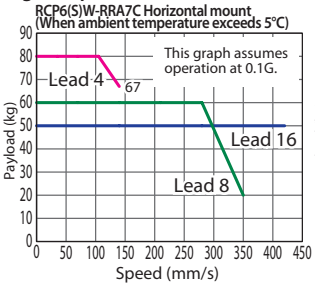
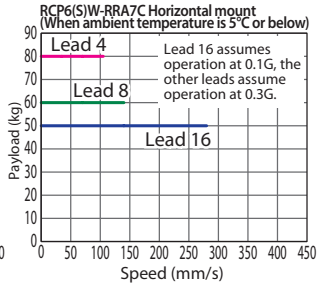
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.236 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.243 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) Depending on the ambient operating temperature, duty control is necessary for the RCP6SW (built-in controller type) with lead 4/8/16. Please refer to P.247 for more information.
(6) The cable joint connector is not splash-proofed, so it should be located where there is no splash.

■ Correlation Diagrams of Speed and Payload

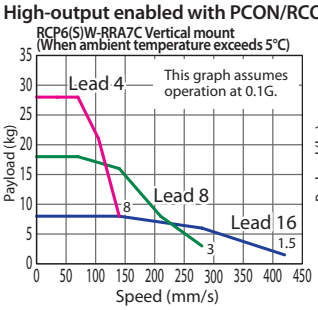
If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

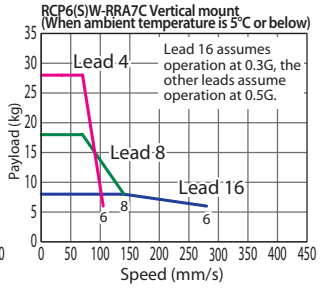
High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.





High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.





Actuator Specifications

■ Lead and Payload

* Horizontal external guide rail required for horizontal payload.
** Push force only available during push mode w/ limited speed.

Model Number	Lead (mm)	Max. Payload Horizontal (kg)*	Max. Payload Vertical (kg)	Max. Push Force (N)**	Stroke (mm)
RCP6(S)W-RRA7C-WA-56P-16-①-②-③-④	16	50	8	273	50~500 (Every 50mm)

Radial Load Applicable

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 0.1G for lead 5 and 0.2G for lead 10/20.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.236 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.243 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) For RCP6SW (built-in controller type), please limit the duty cycle to 70% or less.
(6) The service life of an actuator varies depending on the payload when using vertically. Please refer to P. 206 for more information.
(7) The cable joint connector is not splash-proofed, so it should be located where there is no splash.

■ Correlation Diagrams of Speed and Payload

If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

POINT Selection Notes

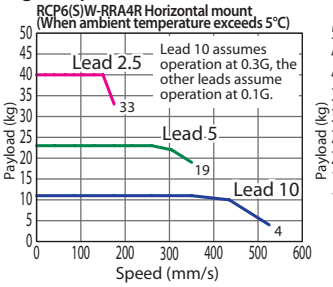
(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.237 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.243 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) The cable joint connector is not splash-proofed, so it should be located where there is no splash.

Correlation Diagrams of Speed and Payload

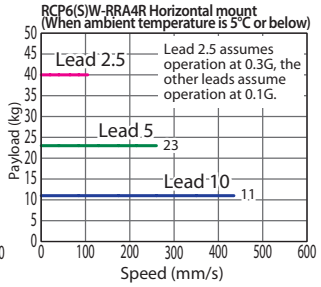
If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.

RCP6(S)W-RRA4R Horizontal mount (When ambient temperature exceeds 5°C)

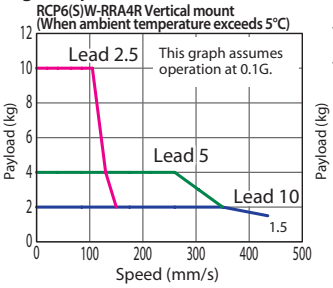


RCP6(S)W-RRA4R Horizontal mount (When ambient temperature is 5°C or below)

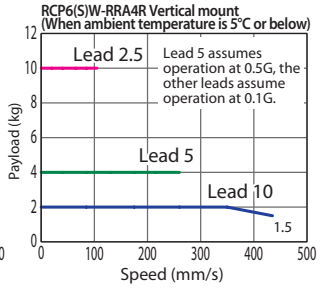


High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.

RCP6(S)W-RRA4R Vertical mount (When ambient temperature exceeds 5°C)



RCP6(S)W-RRA4R Vertical mount (When ambient temperature is 5°C or below)



Actuator Specifications

Lead and Payload

* Horizontal external guide rail required for horizontal payload.
** Push force only available during push mode w/ limited speed.

Model Number	Lead (mm)	Max. Payload Horizontal (kg)*	Max. Payload Vertical (kg)	Max. Push Force (N)**	Stroke (mm)
RCP6(S)W-RRA4R-WA-35P-10-①-②-③-④	10	11	2	77	50~400 (Every 50mm)

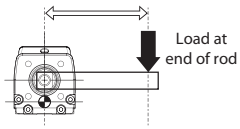
Actuator Specifications

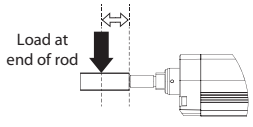
Item	Description
Drive system	Ball screw ø8mm, rolled C10
Positioning repeatability	±0.01mm
Lost motion	0.1mm or less
Rod	ø20mm
Rod non-rotation precision (*)	0 deg.
Allowable load and torque on rod tip	See P. 243
Rod tip offset/overhang distance	dx/dz: 100mm or less
Protective structure	IP65 (IEC 60529)
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

(*) Rod's angular displacement in rotational direction with no load applied to the rod.

Offset distance at end of rod (dx: 100mm or less)



Overhang distance at end of rod (dz: 100mm or less)



Dimensions

CAD drawings can be downloaded from our website.
www.robocylinder.de

*1 When the rod is returning to its home position, please be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
M.E: Mechanical end S.E: Stroke end
*2 The direction of width across flats varies depending on the product.
*3 When fixing the actuator using a front bracket or flange, please make sure that there is no external force applied to the main body.
*4 Select the length of the actuator cable and the actuator/controller connection cable so that the total is 20m or less.
*5 The cable joint (connector) within the dotted line is not splash-proofed.
*6 Hex nut x 1 pc., square nut x 4 pcs. included.

* Body width does not include the width of the side-mounted motor.

* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.19 for more information about the model specification items.

Radial Load Applicable

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.237 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.243 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) Depending on the ambient operating temperature, duty control is necessary for the RCP6SW (built-in controller type) with lead 3/6. Please refer to P.247 for more information.
(6) The cable joint connector is not splash-proofed, so it should be located where there is no splash.

■ Correlation Diagrams of Speed and Payload

If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.

* Body width does not include the width of the side-mounted motor.

* RCP6 does not include a controller. RCP6S includes a built-in controller.
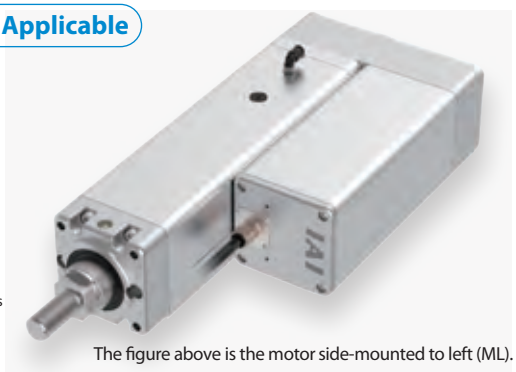
* Please refer to P.18 for more information about the model specification items.

Radial Load Applicable

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.



The figure above is the motor side-mounted to left (ML).

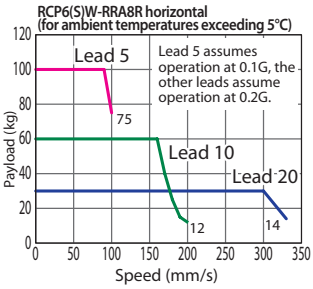
POINT Selection Notes

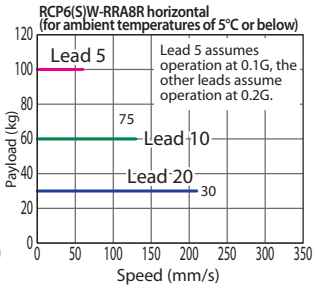
(1) The maximum acceleration/deceleration is 0.1G for lead 5 and 0.2G for lead 10/20.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.238 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.243 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) For RCP6SW (built-in controller type), please limit the duty cycle to 70% or less.
(6) The service life of an actuator varies depending on the payload when using vertically. Please refer to P. 206 for more information.
(7) Install the cable joint connector in locations where it will not be exposed to water, as it is not splash-proofed.

■ Correlation Diagrams of Speed and Payload

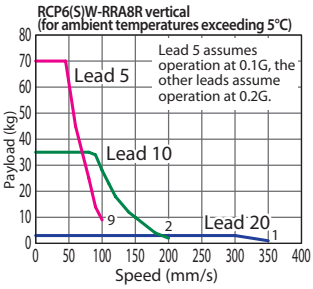
If the ambient temperature is 5℃ or below, the speed will be lower than when it exceeds 5℃.

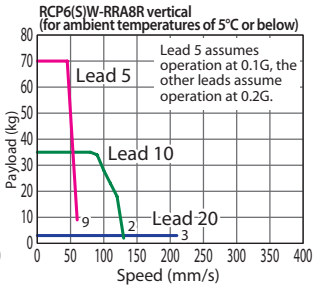
PCON/RCON/MSEL/RSEL connected.





PCON/RCON/MSEL/RSEL connected.





Actuator Specifications

■ Lead and Payload

* Horizontal external guide rail required for horizontal payload.
** Push force only available during push mode w/ limited speed.

Model Number	Lead (mm)	Max. Payload Horizontal (kg)*	Max. Payload Vertical (kg)	Max. Push Force (N)**	Stroke (mm)

* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.20 for more information about the model specification items.

Radial Load Applicable

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.239 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.246 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
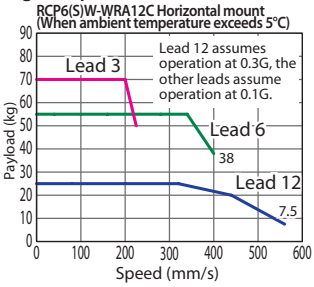
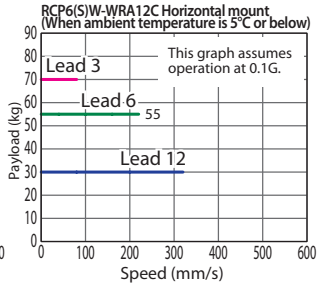
(5) Depending on the ambient operating temperature, duty control is necessary for the RCP6SW (built-in controller type) with lead 3/6. Please refer to P.247 for more information.
(6) The cable joint connector is not splash-proofed, so it should be located where there is no splash.
(7) The RCP6SW with built-in controller does not have a teaching tool connection port. Connect the teaching tool to the gateway unit and configure parameter data etc. via the gateway unit.

■ Correlation Diagrams of Speed and Payload

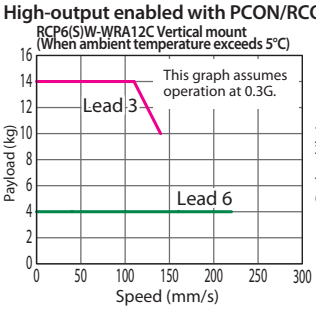
If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

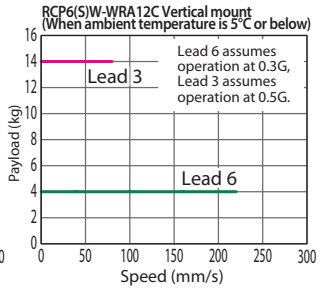
High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.





High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.





Actuator Specifications

■ Lead and Payload

* Horizontal external guide rail required for horizontal payload.
** Push force only available during push mode w/ limited speed.

* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.20 for more information about the model specification items.

Radial Load Applicable

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.

POINT Selection Notes

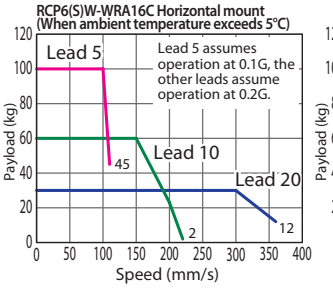
(1) The maximum acceleration/deceleration is 0.1G for lead 5 and 0.2G for lead 10/20.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.240 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.246 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) For RCP6SW (built-in controller type), please limit the duty cycle to 70% or less.
(6) The service life of an actuator with lead 5 varies depending on the payload when using vertically. Please refer to P. 206 for more information.
(7) The cable joint connector is not splash-proofed, so it should be located where there is no splash.
(8) The RCP6SW with built-in controller does not have a teaching tool connection port. Connect the teaching tool to the gateway unit and configure parameter data etc. via the gateway unit.

■ Correlation Diagrams of Speed and Payload

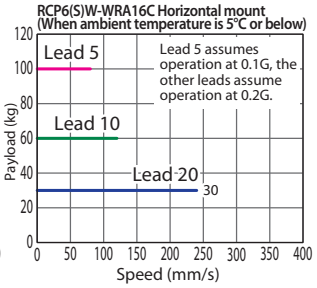
If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

PCON/RCON/MSEL/RSEL connected.

RCP6(S)W-WRA16C Horizontal mount (When ambient temperature exceeds 5°C)

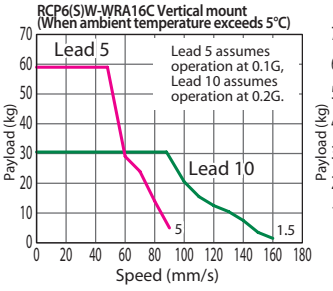


RCP6(S)W-WRA16C Horizontal mount (When ambient temperature is 5°C or below)

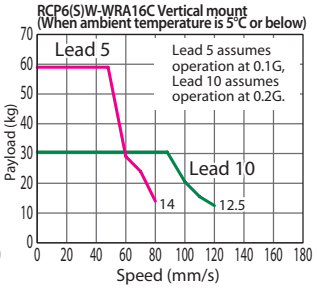


PCON/RCON/MSEL/RSEL connected.

RCP6(S)W-WRA16C Vertical mount (When ambient temperature exceeds 5°C)



RCP6(S)W-WRA16C Vertical mount (When ambient temperature is 5°C or below)



Actuator Specifications

■ Lead and Payload

* Horizontal external guide rail required for horizontal payload.
** Push force only available during push mode w/ limited speed.

* Body width does not include the width of the side-mounted motor.

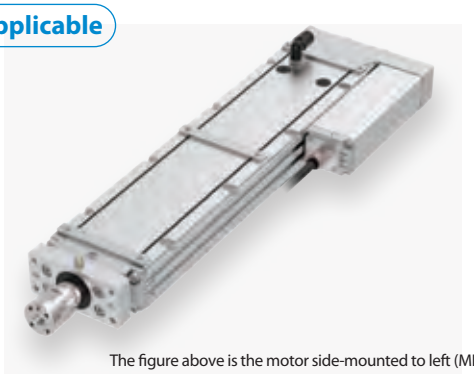
* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.20 for more information about the model specification items.

Radial Load Applicable

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.



The figure above is the motor side-mounted to left (ML).

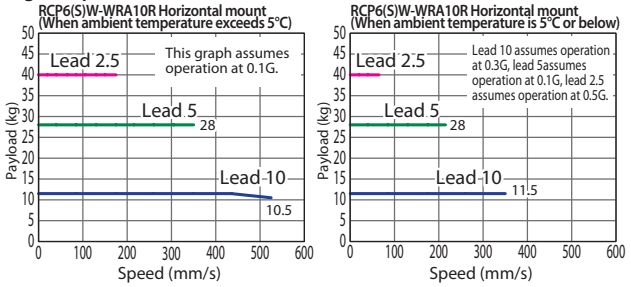
POINT Selection Notes

(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.241 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.246 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) The cable joint connector is not splash-proofed, so it should be located where there is no splash.
(6) The RCP6SW with built-in controller does not have a teaching tool connection port. Connect the teaching tool to the gateway unit and configure parameter data etc. via the gateway unit.

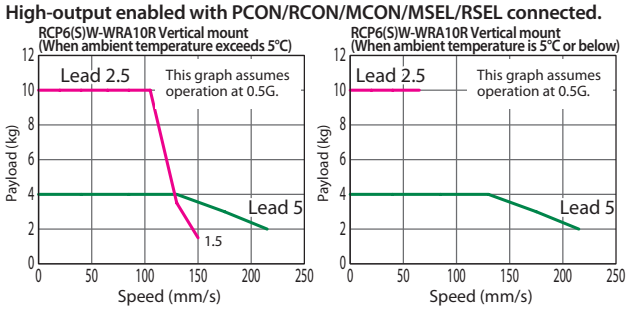
■ Correlation Diagrams of Speed and Payload

If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.



High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.



Actuator Specifications

■ Lead and Payload

* Horizontal external guide rail required for horizontal payload.
** Push force only available during push mode w/ limited speed.

Model Number	Lead (mm)	Max. Payload Horizontal (kg)*	Max. Payload Vertical (kg)	Max. Push Force (N)**	Stroke (mm)

* Body width does not include the width of the side-mounted motor.

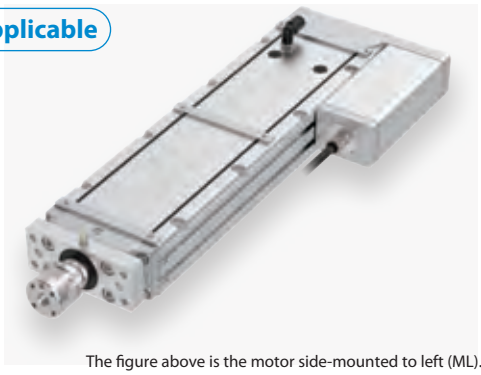
* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.20 for more information about the model specification items.

Radial Load Applicable

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.



The figure above is the motor side-mounted to left (ML).

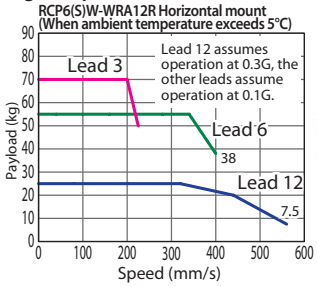
POINT Selection Notes

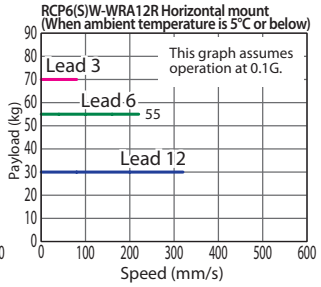
(1) The maximum acceleration/deceleration is 1G for horizontal, and 0.5G for vertical use.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.241 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.246 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) Depending on the ambient operating temperature, duty control is necessary for the RCP6SW (built-in controller type) with lead 3/6. Please refer to P.247 for more information.
(6) The cable joint connector is not splash-proofed, so it should be located where there is no splash.
(7) The RCP6SW with built-in controller does not have a teaching tool connection port. Connect the teaching tool to the gateway unit and configure parameter data etc. via the gateway unit.

■ Correlation Diagrams of Speed and Payload

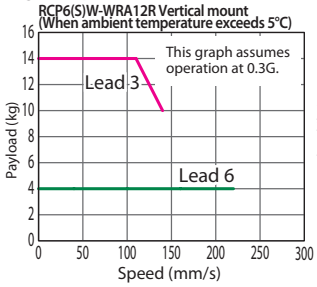
If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

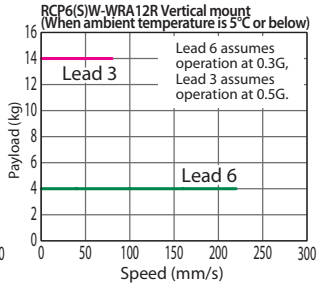
High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.





High-output enabled with PCON/RCON/MCON/MSEL/RSEL connected.





Actuator Specifications

■ Lead and Payload

* Horizontal external guide rail required for horizontal payload.
** Push force only available during push mode w/ limited speed.

Model Number	Lead (mm)	Max. Payload Horizontal (kg)*	Max. Payload Vertical (kg)	Max. Push Force (N)**	Stroke (mm)

MSEL-PC/PG		4	Single-phase 100 ~ 230 VAC	–	–	●	Note: · The type of compatible networks will vary depending on the controller. Please refer to reference page for more information.	30000	Please see the MSEL catalog or manual.
RSEL (*)		8	DC24V	–	–	●		36000	—

(*) Coming soon. (**) For the MCON controller, high-output enabled operation is only available if "high-output setting" is selected as an option. The maximum connectable axes with high-output enabled are C: 4 and LC: 3.

RCP6(S)W-WRA16R

Dust/Splash-Proof Spec | Battery-less Absolute | Motor Unit Type | Side-mounted Motor | Body Width 160* mm | 24V Pulse Motor

■ Model Specification Items

Series	Type	Encoder Type	Motor Type	Lead	Stroke	Applicable Controller/I/O Type	Cable Length	Options
RCP6W: Separate Controller RCP6SW: Built-in Controller	WRA16R	WA: Battery-less Absolute	60P: Pulse Motor 60□ Size	20 :20mm 10 :10mm 5 : 5mm	50:50mm ~ 800:800mm (Every 50mm)	[RCP6W] P4: PCON-CFB/CGFB MSEL-PCF/PGF P6: RCON, RSEL [RCP6SW] SE: SIO Type	N : None P : 1m S : 3m M : 5m X□□ : Specified Length R□□ : Robot Cable	Please refer to the options table below. * Please make sure to specify either ML or MR when ordering the side-mounted motor type.

* Body width does not include the width of the side-mounted motor.

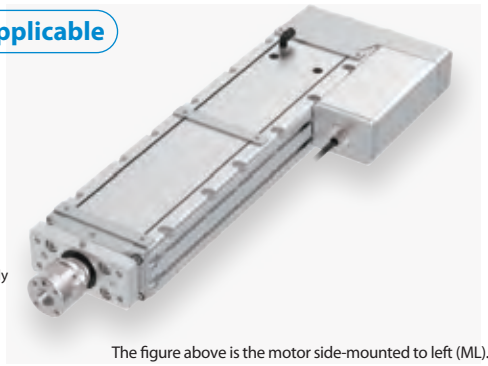
* RCP6 does not include a controller. RCP6S includes a built-in controller.
* Please refer to P.20 for more information about the model specification items.

Radial Load Applicable

CE RoHS

Horizontal | Vertical | Side | Ceiling

*Some limitations may apply to horizontal/side/ceiling mountings depending on the model. See page 204. Please contact IAI for more information.



The figure above is the motor side-mounted to left (ML).

POINT Selection Notes

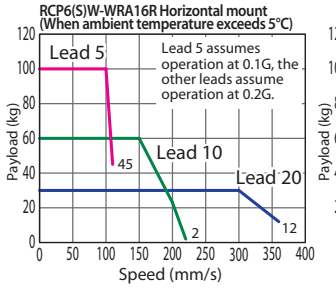
(1) The maximum acceleration/deceleration is 0.1G for lead 5 and 0.2G for lead 10/20.
(2) The actuator specifications displays the payload's maximum value, but it will vary depending on the acceleration and speed. Please refer to the "Selection Guidelines" (Tables of Payload by Speed/Acceleration) on P.242 for more details.
(3) The radial cylinder is equipped with a built-in guide. Please refer to the graphs shown on P.245 and after for the allowable load mass.
(4) Please refer to P205 for performing push-motion operation.
(5) For RCP6SW (built-in controller type), please limit the duty cycle to 70% or less.
(6) The service life of an actuator with lead 5 varies depending on the payload when using vertically. Please refer to P. 206 for more information.
(7) The cable joint connector is not splash-proofed, so it should be located where there is no splash.
(8) The RCP6SW with built-in controller does not have a teaching tool connection port. Connect the teaching tool to the gateway unit and configure parameter data etc. via the gateway unit.

■ Correlation Diagrams of Speed and Payload

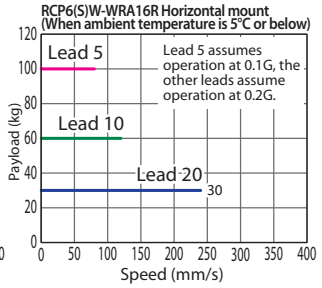
If the ambient temperature is 5°C or below, the speed will be lower than when it exceeds 5°C.

PCON/RCON/MSEL/RSEL connected.

RCP6(S)W-WRA16R Horizontal mount (When ambient temperature exceeds 5°C)

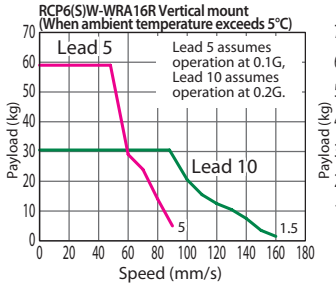


RCP6(S)W-WRA16R Horizontal mount (When ambient temperature is 5°C or below)

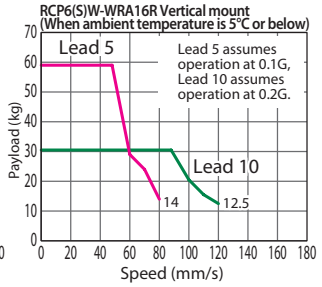


PCON/RCON/MSEL/RSEL connected.

RCP6(S)W-WRA16R Vertical mount (When ambient temperature exceeds 5°C)



RCP6(S)W-WRA16R Vertical mount (When ambient temperature is 5°C or below)



Actuator Specifications

■ Lead and Payload

* Horizontal external guide rail required for horizontal payload.
** Push force only available during push mode w/ limited speed.

Model Number	Lead (mm)	Max. Payload Horizontal (kg)*	Max. Payload Vertical (kg)	Max. Push Force (N)**	Stroke (mm)
RCP6(S)W-WRA16R-WA-60P-20-①-②-③-④	20	30	–	500	50~800 (Every 50mm)
RCP6(S)W-WRA16R-WA-60P-10-①-②-③-④	10	60	30.5	1000	
RCP6(S)W-WRA16R-WA-60P-5-①-②-③-④	5	100	59	2000

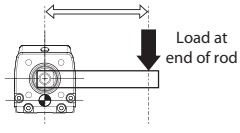
Actuator Specifications

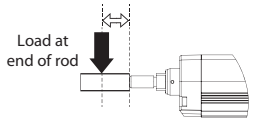
Item	Description
Drive system	Ball screw ø16mm, rolled C10
Positioning repeatability	±0.01mm
Lost motion	0.1mm or less
Rod	ø45mm
Rod non-rotation precision (*)	0 deg.
Allowable load and torque on rod tip	See P. 246
Rod tip offset/overhang distance	dx: 150mm or less / dz: 100mm or less
Protective structure	IP65 (IEC 60529)
Ambient operating temp. & humidity	0~40°C, 85% RH or less (Non-condensing)

(*) Rod's angular displacement in rotational direction with no load applied to the rod.

Offset distance at end of rod (dx: 150mm or less)



Overhang distance at end of rod (dz: 100mm or less)



Dimensions

CAD drawings can be downloaded from our website.
www.robocylinder.de

*1 When the rod is returning to its home position, please be careful of interference from surrounding objects, as it will travel until it reaches the M.E.
M.E: Mechanical end S.E: Stroke end
*2 If the object attached to the rod has a long overhang length, or precise angular adjustment of the object is required, please do not use the reamed hole when the object is attached to the rod.

Applicable Controllers

The RCP6 series actuators can be operated by the controllers indicated below. Please select the type depending on your intended use. * Please refer to P.270 for more information about the built-in controller of RCP6S series.

Name	External view	Max. number of controlled axes	Input power	Control method: Positioner	Pulse train	Program	Network * Option	Maximum number of positioning points	Reference page
PCON-CBF/CGFB		1	DC24V	● * Option	● * Option	–	DeviceNet, CC-Link, PROFIBUS, CompoNet, EtherCAT, EtherNet/IP, MECHATROLINK	512 (768 for network spec.)	Please see P.255
RCON		16		This model is network-compatible only.				128	Please see the RCON catalog or manual.
MSEL-PCF/PGF (**)		4	Single-phase 100 ~ 230 VAC	–	–	●		30000	Please see the MSEL catalog or manual.
RSEL (*)		8	DC24V	–	–	●		36000	—

Note: · The type of compatible networks will vary depending on the controller. Please refer to reference page for more information.

(*) Coming soon. (**) The MCON-PCF/PGF controller cannot be connected to the 3rd and 4th axis.

RCP6 Series Options

Brake

Option Code **B** Applicable Models **All Models**

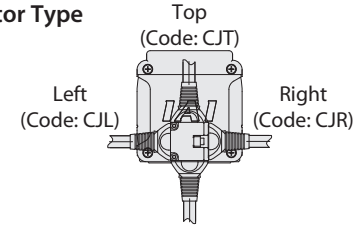
Description When the actuator is mounted vertically, this works as a holding mechanism that prevents the slider, rod, or table from falling and damaging any attachments when the power or servo is turned off.

Cable Exit Direction

Option Code **CJT / CJR / CJL / CJB / CJO** Applicable Models **All Models**

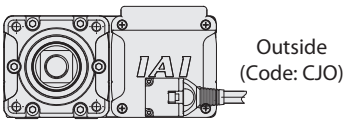
Description This option allows you to change the exit direction of the motor-encoder cable to top, bottom, left, or right.

Coupled Motor Type



* When viewed from the actuator rear side (motor side).

Side-mounted Motor Type



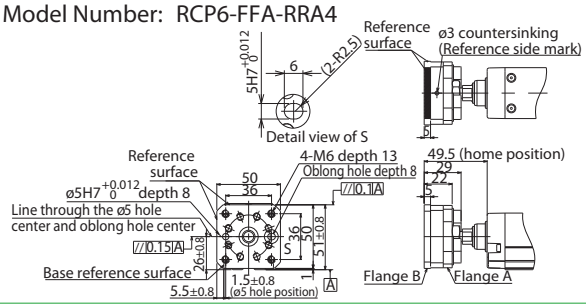
* When viewed from the actuator front side.

Tip Adapter (Flange)

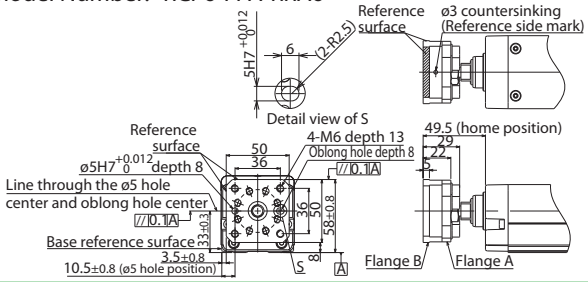
Option Code **FFA** Applicable Models **RCP6(S)-RRA4□/RRA6□/RRA7□**

Description A rod-end tooling adapter with 4 threaded holes.

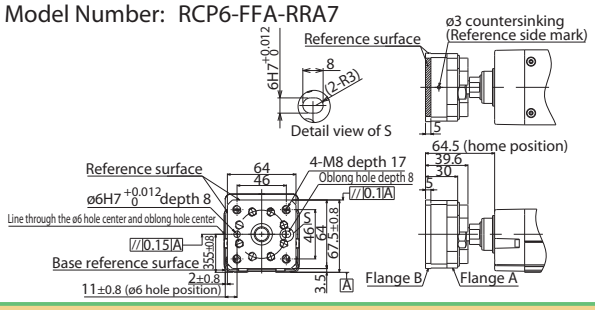
For RCP6(S)-RRA4□
Model Number: RCP6-FFA-RRA4



For RCP6(S)-RRA6□
Model Number: RCP6-FFA-RRA6



For RCP6(S)-RRA7□
Model Number: RCP6-FFA-RRA7



Flange

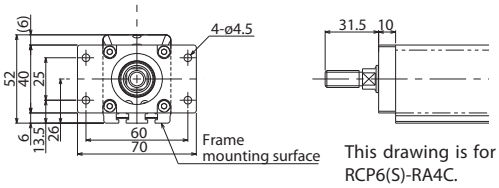
Option Code **FL** Applicable Models **RCP6(S)-RA4□/RA6□/RA7□/RA8□/RRA4□/RRA6□/RRA7□/RRA8□/WRA10□/WRA12□/WRA14□/WRA16□**

Description A bracket that attaches to the actuator body with bolts. * Be sure to confirm with the Selection Notes (P.196).

For RCP6(S)-RA4□

Model Number: RCP6-FL-RA4

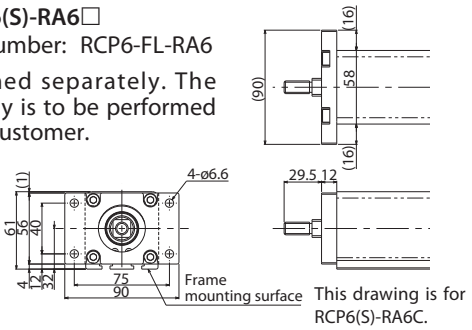
*Furnished separately. The assembly is to be performed by the customer.



For RCP6(S)-RA6□

Model Number: RCP6-FL-RA6

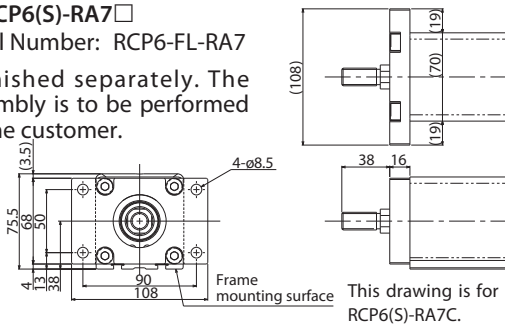
*Furnished separately. The assembly is to be performed by the customer.



For RCP6(S)-RA7□

Model Number: RCP6-FL-RA7

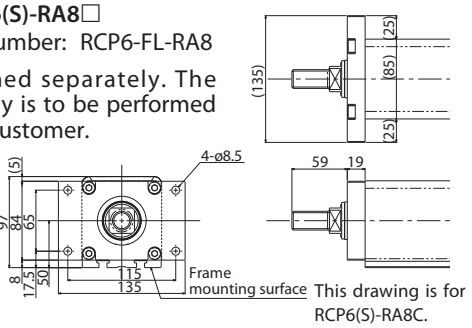
*Furnished separately. The assembly is to be performed by the customer.



For RCP6(S)-RA8□

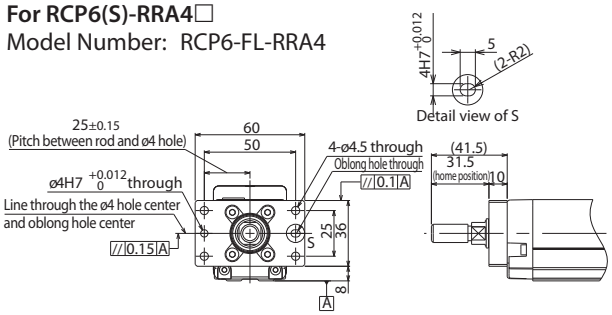
Model Number: RCP6-FL-RA8

*Furnished separately. The assembly is to be performed by the customer.



For RCP6(S)-RRA4□

Model Number: RCP6-FL-RRA4



For RCP6(S)-RRA6□

Model Number: RCP6-FL-RRA6

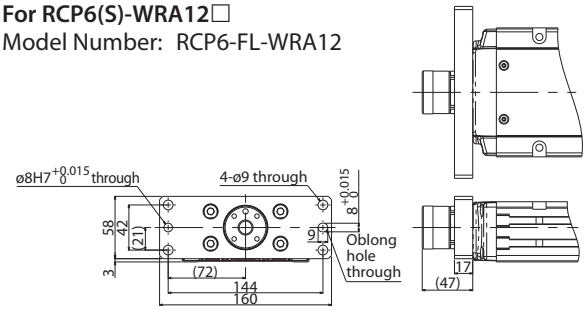
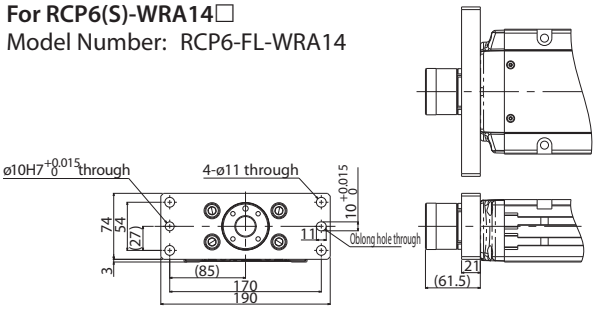
For RCP6(S)-WRA12□

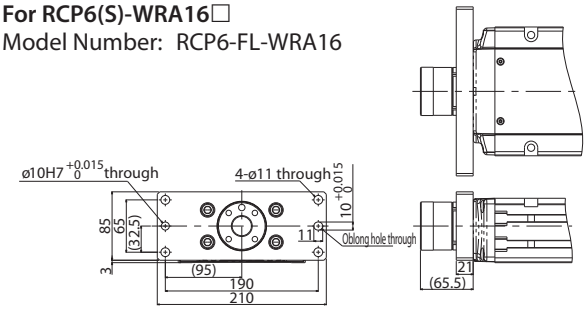
Model Number: RCP6-FL-WRA12



For RCP6(S)-WRA14□
Model Number: RCP6-FL-WRA14



For RCP6(S)-WRA16□
Model Number: RCP6-FL-WRA16

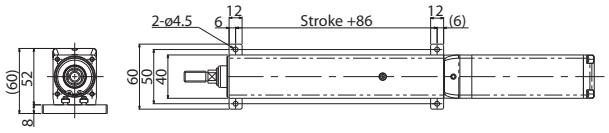


Foot Bracket

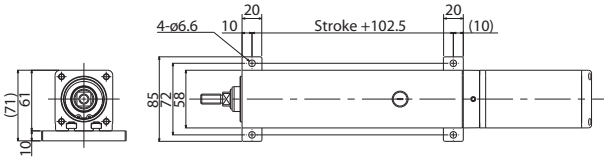
Option Code **FT** Applicable Models **RCP6(S)-RA4□/RA6□/RA7□/RA8□**

Description
This is a bracket to fix the actuator with bolts from the top side. (Bolts are tightened from the top, not from the bottom)
For slider type actuators, when the moment load is large, please attach the foot brackets on all the mounting holes on the actuator.
The actuator body may be twisted or deformed if insufficient number of mounting foot brackets are used. Actuator life could also be shortened.
* Refer to the installation dimensions in the actuator drawing for the installation pitch between the foot brackets.

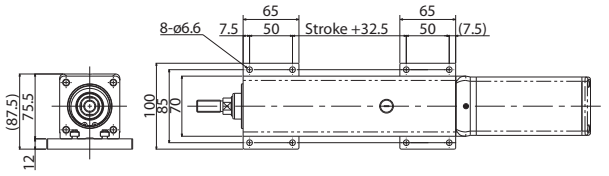
For RCP6(S)-RA4C
Model Number: RCP6-FT-RA4C
(Sold as a set of 2)



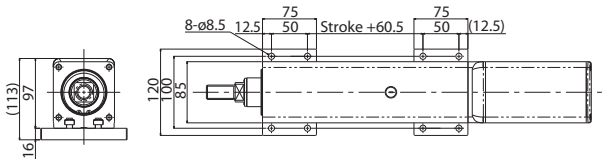
For RCP6(S)-RA6C
Model Number: RCP6-FT-RA6C
(Sold as a set of 2)



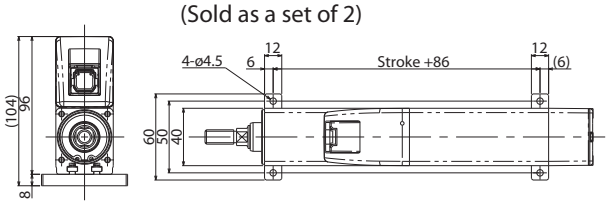
For RCP6(S)-RA7C
Model Number: RCP6-FT-RA7C
(Sold as a set of 2)



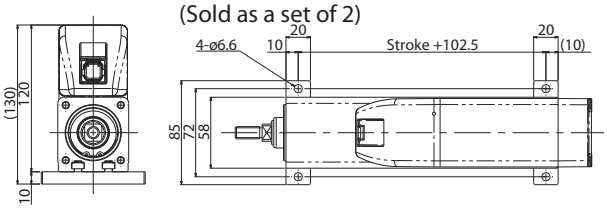
For RCP6(S)-RA8C
Model Number: RCP6-FT-RA8C
(Sold as a set of 2)



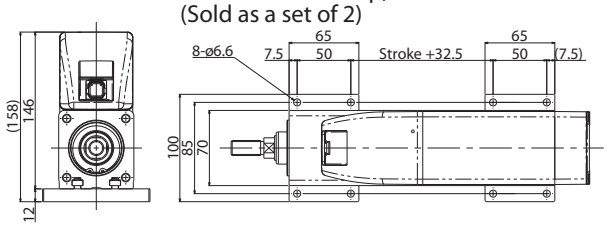
For RCP6(S)-RA4R
Model Number: RCP6-FT-RA4R-1 (For the motor side-mounted to the top)
(Sold as a set of 2)



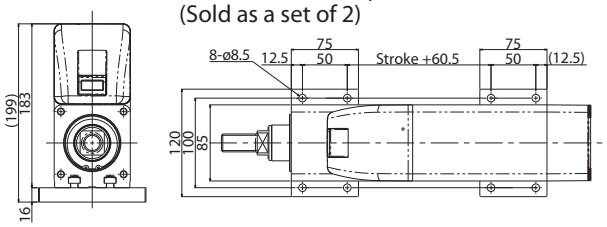
For RCP6(S)-RA6R
Model Number: RCP6-FT-RA6R-1 (For the motor side-mounted to the top)
(Sold as a set of 2)



For RCP6(S)-RA7R
Model Number: RCP6-FT-RA7R-1 (For the motor side-mounted to the top)
(Sold as a set of 2)

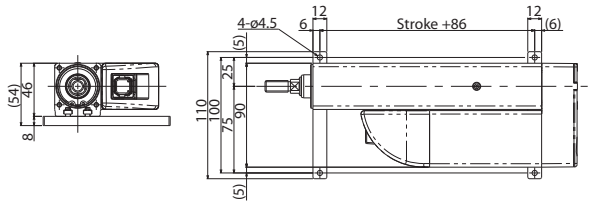


For RCP6(S)-RA8R
Model Number: RCP6-FT-RA8R-1 (For the motor side-mounted to the top)
(Sold as a set of 2)



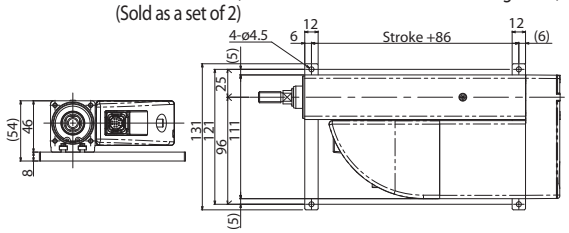
For RCP6(S)-RA4R

Model Number: RCP6-FT-RA4R-2 (For the motor side-mounted to the right/left)
(Sold as a set of 2)



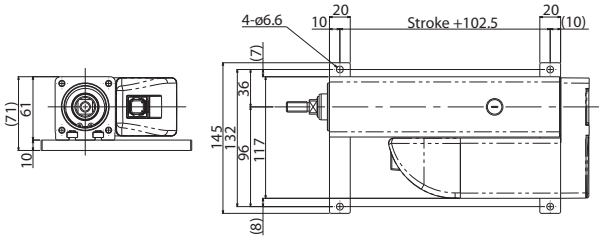
For RCP6(S)-RA4R

Model Number: RCP6-FT-RA4R-3 (For the motor side-mounted to the right/left)
(Sold as a set of 2)



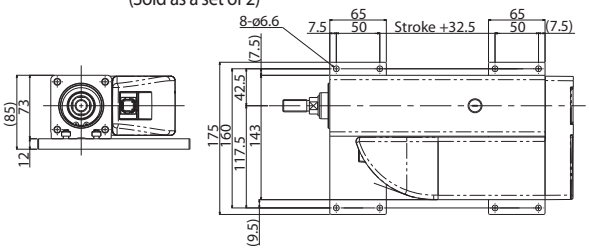
For RCP6(S)-RA6R

Model Number: RCP6-FT-RA6R-2 (For the motor side-mounted to the right/left)
(Sold as a set of 2)



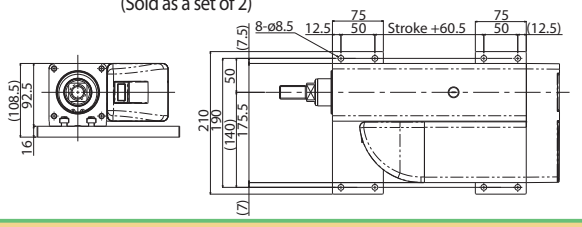
For RCP6(S)-RA7R

Model Number: RCP6-FT-RA7R-2 (For the motor side-mounted to the right/left)
(Sold as a set of 2)



For RCP6(S)-RA8R

Model Number: RCP6-FT-RA8R-2 (For the motor side-mounted to the right/left)
(Sold as a set of 2)



High-precision Specification

Option Code **HPR** Applicable Models **RCP6(S)/RCP6(S)CR-SA□C/WSA□C**

Description The positioning repeatability of the standard type of the RCP6(S)/RCP6(S)CR slider and wide slider models is ±0.01mm.
If this option is selected, the positioning repeatability can be ±0.005mm. * This option can be selected for actuators with lead 12mm or less.

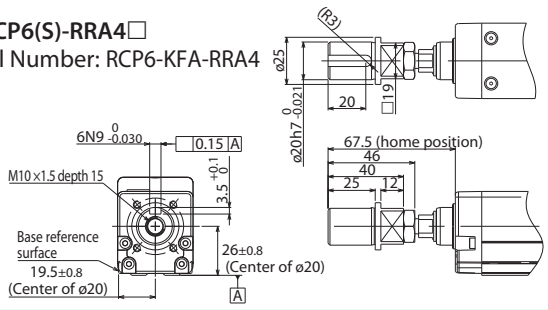
Tip Adapter (Keyway)

Option Code **KFA** Applicable Models **RCP6(S)-RRA4□/RRA6□/RRA7□**

Description A female threaded tip adapter with a parallel keyway.

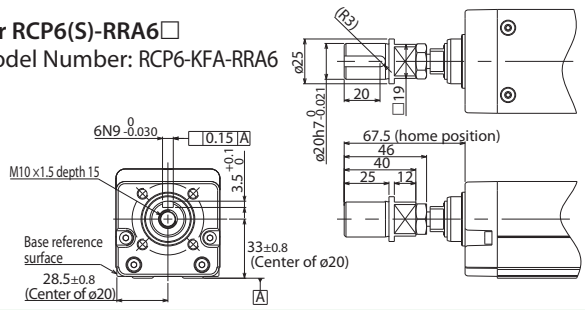
For RCP6(S)-RRA4□

Model Number: RCP6-KFA-RRA4



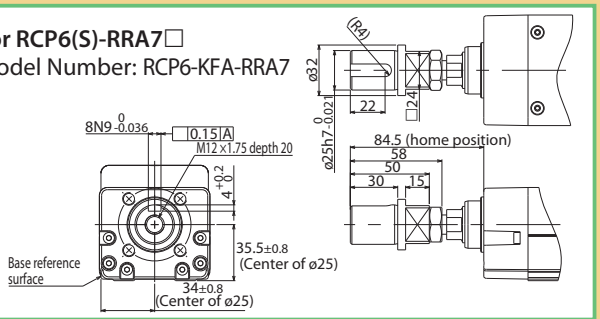
For RCP6(S)-RRA6□

Model Number: RCP6-KFA-RRA6



For RCP6(S)-RRA7□

Model Number: RCP6-KFA-RRA7

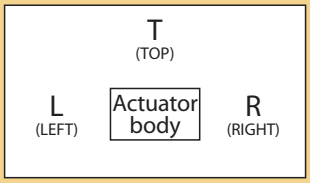


Side-mounted Motor Direction

Option Code **ML / MR / MT**

Applicable Models **RCP6(S)-SA□R/WSA□R/RA□R/RRA□R/WRA□R/TA□R**

Description This allows you to specify the direction of the side-mounted motor.
As viewed from the motor side of the actuator, ML represents left, MR represents right, and MT represents top.

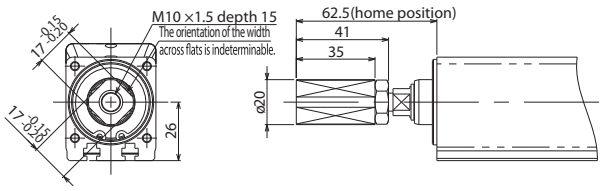


Tip Adapter (Internal Thread)

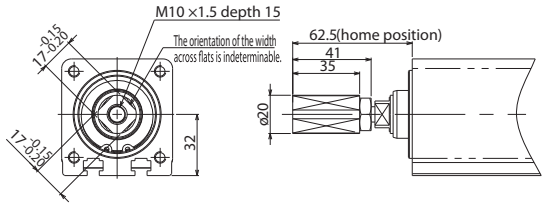
Option Code **NFA** Applicable Models **RCP6(S)-RA4□/RA6□/RA7□/RA8□/RRA4□/RRA6□/RRA7□/RRA8□**

Description A rod-end tooling adapter with 1 threaded hole.

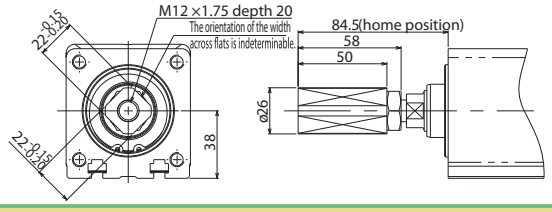
For RCP6(S)-RA4□
Model Number: RCP6-NFA-RA4



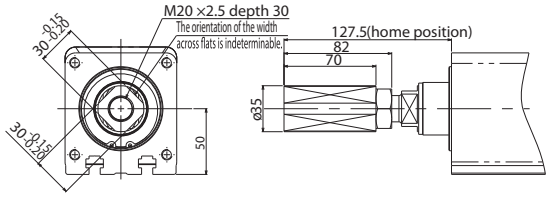
For RCP6(S)-RA6□
Model Number: RCP6-NFA-RA6



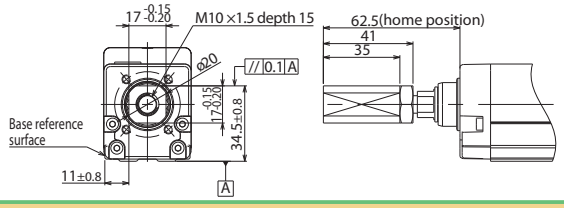
For RCP6(S)-RA7□
Model Number: RCP6-NFA-RA7



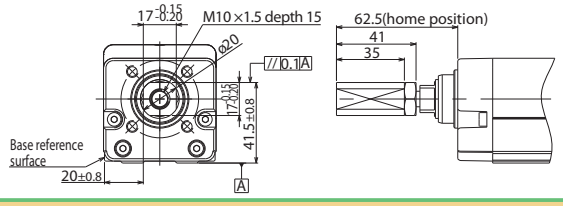
For RCP6(S)-RA8□
Model Number: RCP6-NFA-RA8



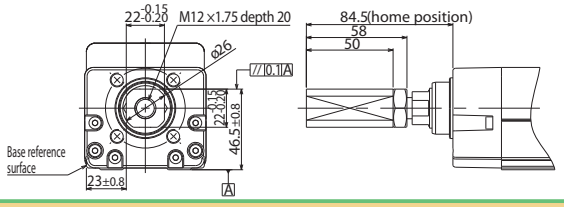
For RCP6(S)-RRA4□
Model Number: RCP6-NFA-RRA4



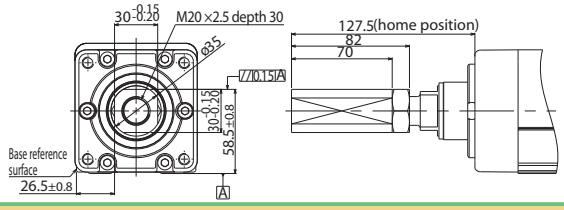
For RCP6(S)-RRA6□
Model Number: RCP6-NFA-RRA6



For RCP6(S)-RRA7□
Model Number: RCP6-NFA-RRA7



For RCP6(S)-RRA8□
Model Number: RCP6-NFA-RRA8

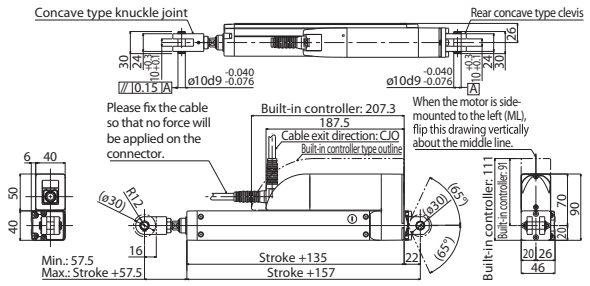


Knuckle Joint

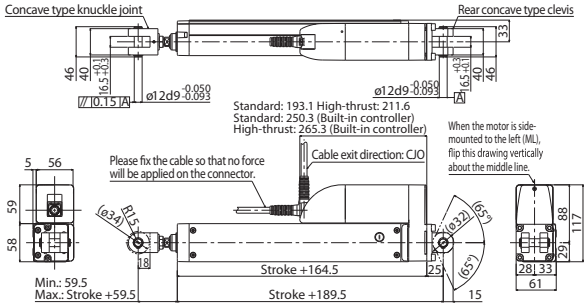
Option Code **NJ** Applicable Models **RCP6(S)-RRA□R**

Description The knuckle joint gives rotational freedom of movement to the rod tip when clevis or trunnion brackets are used.
* Knuckle joint and clevis brackets for RCP6(S) radial cylinders are furnished separately. The assembly is to be performed by the customer with reference to the mechanical drawings. When making adjustments, we recommend that the parallelism fall within the level mentioned on the mechanical drawings provided. Also, for RCP6(S) Series, please use the knuckle joint and the clevis brackets together as a set.

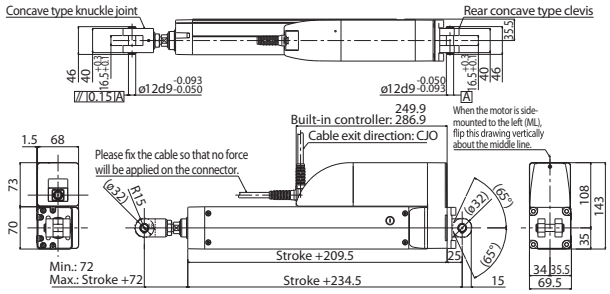
For RCP6(S)-RRA4R
Model Number: RCP6-NJ-RRA4R



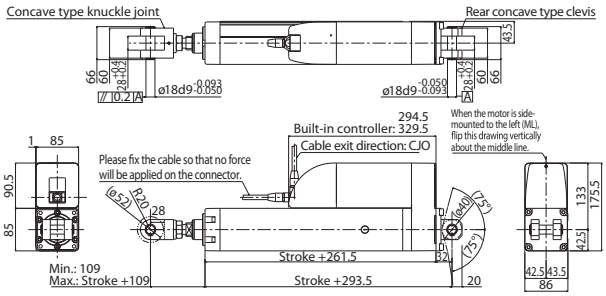
For RCP6(S)-RRA6R
Model Number: RCP6-NJ-RRA6R



For RCP6(S)-RRA7R
Model Number: RCP6-NJ-RRA7R



For RCP6(S)-RRA8R
Model Number: RCP6-NJ-RRA8R



Non-motor End Specification

Option Code **NM** Applicable Models **All Models**

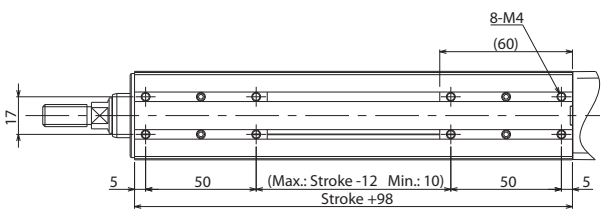
Description The normal home position is set by the slider and rod on the motor side, but there is the option for the home position to be on the other side to accommodate variations in equipment layout, etc. (Please note that changing the home position after the actuator is manufactured and shipped from the factory may require the products to be sent back to IAI for re-setting.)

T-slot Nut Bar

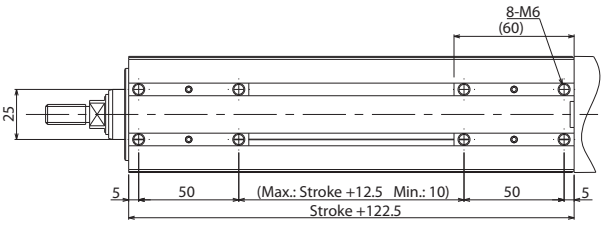
Option Code **NTB / NTBL / NTBR** Applicable Models **RCP6(S)-RA4□/RA6□/RA7□/RA8□/WRA10□/WRA12□/WRA14□/WRA16□**

Description T-slot nut bar is a bar-shaped bracket which is to be inserted into the actuator's T-slot. There are tapped mounting holes on the T-slot nut bar. From the motor-side view, NTBL is inserted on the left side, and NTBR is inserted on the right.
*Rod (RA) type can choose only NTB, while wide radial cylinder (WRA) type can choose either NTBL (for the actuator with its motor side-mounted to the right) or NTBR (for the actuator with its motor side-mounted to the left).
Note: Mounting holes on the top of the base crossing the nut bar cannot be used for the wide radial cylinder type (WRA).

For RCP6(S)-RA4□
Model Number: RCP6-NTB-RA4

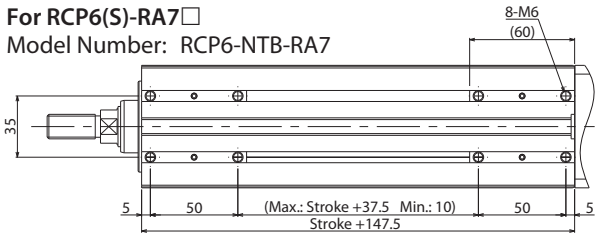


For RCP6(S)-RA6□
Model Number: RCP6-NTB-RA6

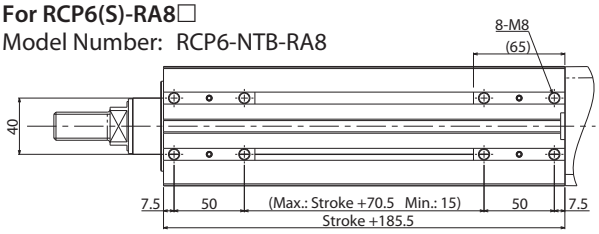


Options

For RCP6(S)-RA7□
Model Number: RCP6-NTB-RA7

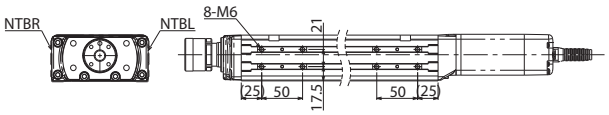


For RCP6(S)-RA8□
Model Number: RCP6-NTB-RA8

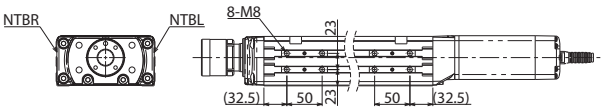


For RCP6(S)-WRA10□
Model Number: RCP6-NTB-WRA10

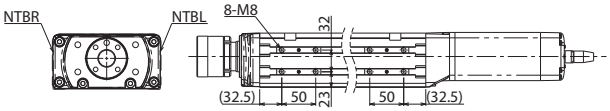
For RCP6(S)-WRA12□
Model Number: RCP6-NTB-WRA12



For RCP6(S)-WRA14□
Model Number: RCP6-NTB-WRA14



For RCP6(S)-WRA16□
Model Number: RCP6-NTB-WRA16



Clevis Bracket

Option Code **QR** Applicable Models **RCP6(S)-RRA□R**

Description A bracket for aligning the cylinder movement when the load installed on the rod tip moves in a direction different from the rod.

Applicable Models	Model Number
RCP6(S)-RRA4R	RCP6-QR-RRA4R
RCP6(S)-RRA6R	RCP6-QR-RRA6R
RCP6(S)-RRA7R	RCP6-QR-RRA7R
RCP6(S)-RRA8R	RCP6-QR-RRA8R

* Knuckle joint and clevis brackets for RCP6(S) radial cylinders are furnished separately. The assembly is to be performed by the customer with reference to the mechanical drawings. When making adjustments, we recommend that the parallelism fall within the level mentioned on the mechanical drawings provided.
Also, for RCP6(S) Series, please use the knuckle joint and the clevis brackets together as a set.
For mechanical drawings, please refer to the knuckle joint option (NJ) on P.194.

Slider Roller Specification

Option Code **SR** Applicable Models **RCP6(S)-SA□/WSA□**

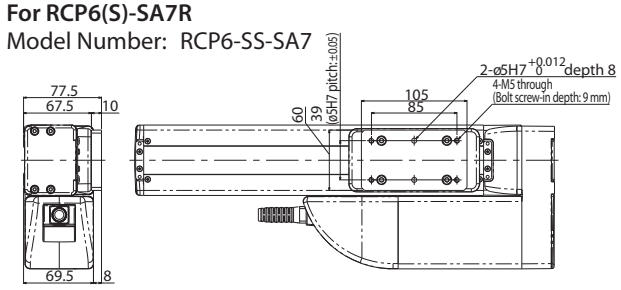
Description The standard slider structure of the slider type is changed to a roller structure similar to the cleanroom specification.
Using a roller specification in the slider part means that the slider cover external view and dimensions are the same as those of the cleanroom type.

Slider Spacer

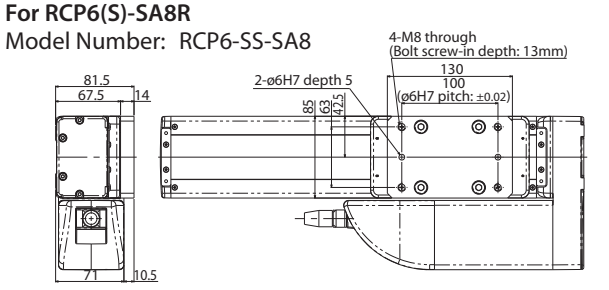
SS Applicable Models **RCP6(S) -SA7R/SA8R**

This option changes the top of the slider position to be higher than the motor height.

For RCP6(S)-SA7R
Model Number: RCP6-SS-SA7



For RCP6(S)-SA8R
Model Number: RCP6-SS-SA8



Vacuum joint mounting position opposite

Option Code **VR** Applicable Models **RCP6(S)CR-SA□/WSA□**

Description As standard, the vacuum joint is installed on the left side of the body when seen from the motor side, but this option changes it to the right side (opposite side).

Double Slider Specification

Option Code **W** Applicable Models **RCP6(S)/RCP6(S)CR-SA□**

Description This option adds a free slider not connected to the ball screw or drive belt.
Using a double slider enables increased moment and overhang load length.
* For the allowable dynamic moment and overhang load length of the double slider, refer to P.248.

Be sure to check the following conditions when selecting options.
① Cannot be selected for 50ST
② Cannot be selected for 50~100ST
③ Cannot be selected for 60ST
④ Cannot be selected for 65ST
⑤ Cannot be selected for 70ST
⑥ Cannot be selected for 50~150ST
⑦ Cannot be selected for 60~110ST
⑧ Cannot be selected for 65~115ST
⑨ Cannot be selected for 70~120ST
⑩: Always select CJ□ when using 150ST.
⑪: Can only be selected when MR is selected.
⑫: Can only be selected when ML is selected.
⑬: Purchase the clevis (QR) and knuckle joint (NJ) as a set.
The assembly is to be performed by the customer.

- The front flange (FL) rod attachment option cannot be used on side mounting position for RCP6(S)-RRA8R when the following strokes are selected.

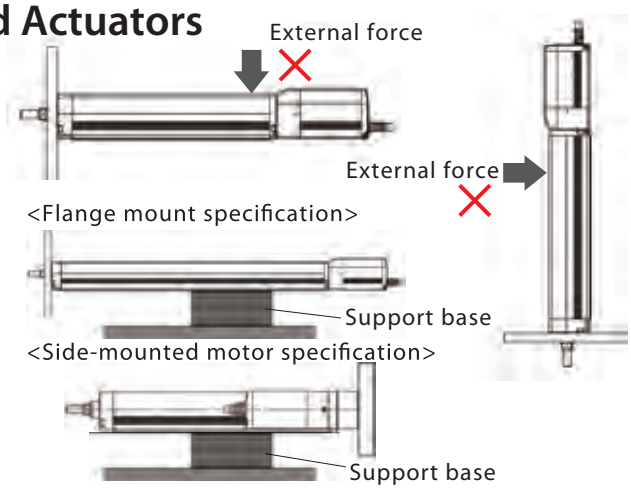
  • RCP6(S)-RRA8R 50~100mm (Standard/With a brake)

- Please be careful of nearby objects when selecting the flange option for the RCP6(S)-RRA□R models, as there may be some interference between the cable and flange surface for certain strokes. Please also be careful of nearby objects when selecting the tip adapter option (FFA, NFA, KFA) for the RCP6(S)-RRA4R/RRA6R/RRA7R models, there may be some interference between the cable and work piece for certain strokes.

■ Warnings When Installing the Rod Actuators

When installing the front bracket or flange (optional), please be careful that the actuator does not experience any external force. (External force may cause malfunctions or damaged parts)
If the actuator will experience external force or is being used in conjunction with a Cartesian robot, etc., please use the mounting holes on the base of the actuator to secure it into place.

Even in cases when external force will not be applied, to secure the actuator in place when installed horizontally using a flange or side-mounted motor specification, please use the bracket mounting holes to create a support base as shown in the diagram on the right.



■ About the Mounting Positions

- While installation in the side and ceiling mount positions are available, this may cause slack or misalignment in the stainless steel sheet. Continuing to use it this way could cause the stainless steel sheet to break. Please inspect it daily and adjust the sheet if any slack or misalignment is found.
- When installing the motor-coupled type vertically, please set the motor on the top if possible. While installing the motor on the bottom will not cause problems in normal operation, long periods of no activity may cause the grease to separate, flow into the motor unit, and cause problems in rare occasions.

Dust/Splash-Proof Specification Options

Changing Actuator Cable Length

Model AC5 / AC10 / AC15

Description Specify when changing the actuator cable (pigtail cable) length longer than 2m (standard). AC5: 5m, AC10: 10m, AC15: 15m.

Brake

Model B

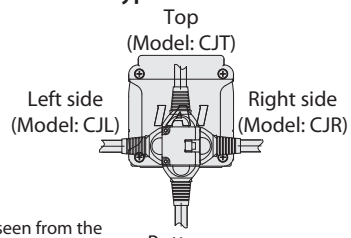
Description When the actuator is mounted vertically, this works as a holding mechanism that prevents the rod from falling and damaging any attachments when the power or servo is turned off.

Cable Exit Direction

Model CJT / CJR / CJL / CJB / CJO

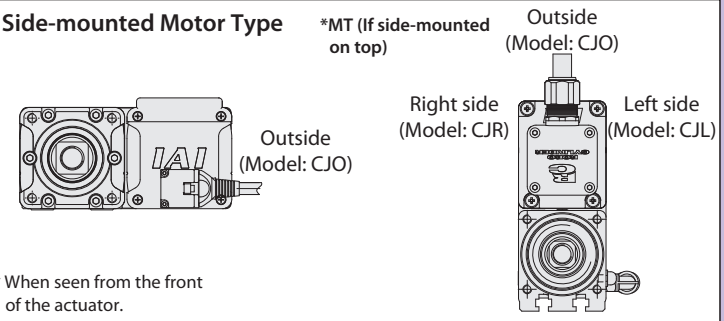
Description This option allows you to change the exit direction of the motor-encoder cable to top, bottom, left, or right.
* Be sure to confirm with the Selection Notes (P.204).

Coupled Motor Type



* When seen from the rear (motor side) of the actuator.

Side-mounted Motor Type *MT (If side-mounted on top)



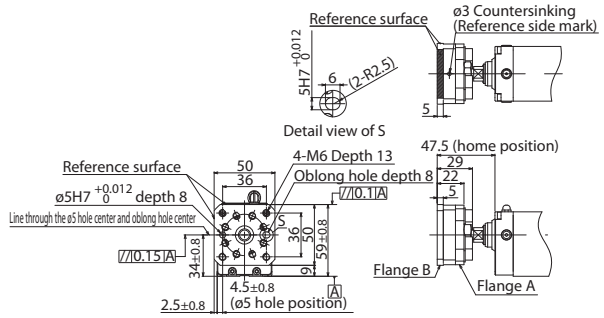
* When seen from the front of the actuator.

Tip Adapter (Flange)

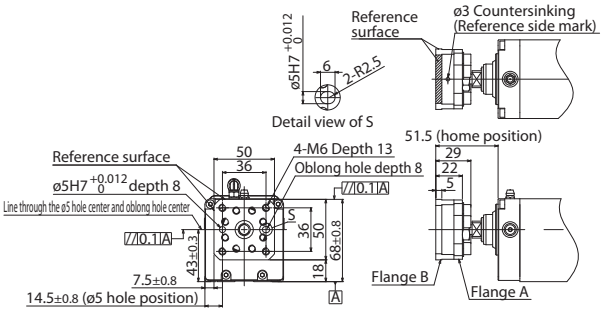
Model FFA

Description A rod-end tooling adapter with 4 threaded holes.

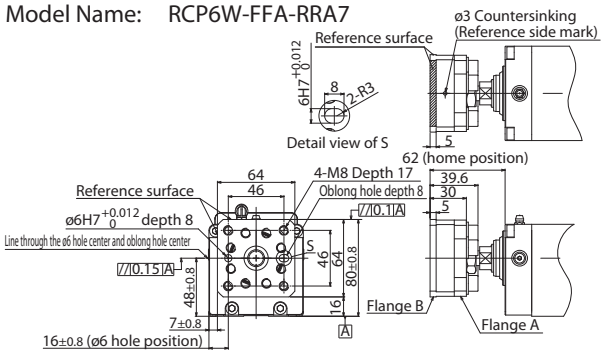
RCP6(S)W-RRA4□
Model Name: RCP6W-FFA-RRA4



RCP6(S)W-RRA6□
Model Name: RCP6W-FFA-RRA6



RCP6(S)W-RRA7□
Model Name: RCP6W-FFA-RRA7



Flange

Model **FL**

Description A bracket that attaches to the actuator body with bolts. * Be sure to confirm with the Selection Notes (P.204).

Foot Bracket

Model **FT**

Description This is a bracket used to fix the actuator with bolts from the top side. (Bolts are tightened from the top, not from the bottom) For slider type actuators, when the moment load is large, please attach the foot brackets on all the mounting holes on the actuator. The actuator body may be twisted or deformed if insufficient number of mounting foot brackets are used. Actuator life could also be shortened.
* Refer to the installation dimensions in the actuator drawing for the installation pitch between the foot brackets.

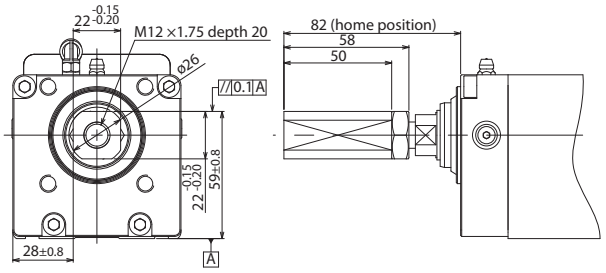
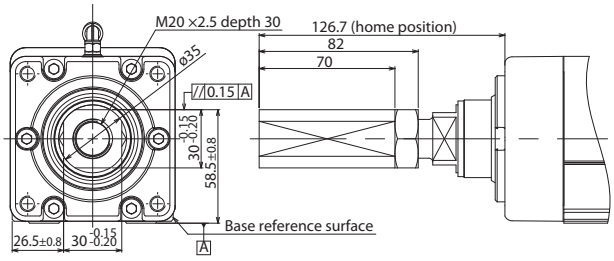
Model Name: RCP6W-NFA-RRA7



RCP6(S)W-RRA8□
Model Name: RCP6W-NFA-RRA8



Non-motor End Specification

Model **NM**

Description The normal home position is set by the slider, rod, and table on the motor side, but there is the option for the home position to be on the other side to accommodate variations in equipment layout, etc. (Please note that changing the home position after the actuator is manufactured and shipped from the factory may require the products to be sent back to IAI for re-setting.)

T-slot Nut Bar

Model **NTB / NTBL / NTBR**

Description T-slot nut bar is a bar-shaped bracket which is to be inserted into the actuator's T-slot. There are tapped mounting holes on the T-slot nut bar. From the motor-side view, NTBL is inserted on the left side, and NTBR is inserted on the right.
* Only NTB can be selected for Rod type (RA) and Radial Cylinder (RRA4/6/7), while either NTBL (for the actuator with its motor side-mounted to the right) or NTBR (for the actuator with its motor side-mounted to the left) can be selected for wide radial cylinder type (WRA).
Note: Mounting holes on the top of the base crossing the nut bar cannot be used for the wide radial cylinder type (WRA).
Note: NTBL and NTBR for wide radial cylinder (WRA) cannot be installed by the customer after delivery.

RCP6(S)W-RA4□
Model Name: RCP6W-NTB-RA4

Be sure to check the following conditions when selecting options.

① : Can be selected when ML or MR is selected.
② : Can be selected when MT is selected.
③ : Cannot be selected for 50ST or 100ST.
④ : Always select CJ□ when using 150ST.
⑤ : Can only be selected when MR is selected.
⑥ : Can only be selected when ML is selected.

Note: NTBL and NTBR cannot be installed by the customer after delivery.

- The front flange (FL) rod attachment option cannot be used on side mounting position for RCP6(S)W-RRA8R when the following strokes are selected.

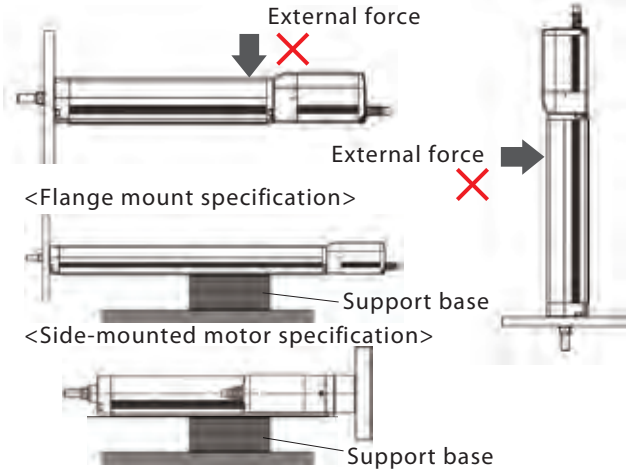
  • RCP6(S)W-RRA8R Stroke 50~100 (standard/with brake)

- Please be careful of nearby objects when selecting the front flange (FL) option for the RCP6(S)W-RRA□R models, as there may be some interference between the cable and flange surface for certain strokes. Please also be careful of nearby objects when selecting the tip adapter option (FFA, NFA, KFA) for the RCP6(S)W-RRA4R/ RRA6R/RRA7R models, as there may be some interference between the cable and work piece for certain strokes.

■ Notes When Installing the Rod Type

When installing the front bracket or flange (optional), please be careful that the actuator does not experience any external force. (External force may cause malfunctions or damaged parts)
If the actuator will experience external force or is being used in conjunction with a Cartesian robot, etc., please use the mounting holes on the base of the actuator to secure it into place.

Even in cases when external force will not be applied, to secure the actuator in place when mounted horizontally using a flange or side-mounted motor specification, please use the bracket mounting holes to create a support base as shown in the diagram on the right.



■ About the Mounting Orientation

- When mounting the motor coupled type vertically, please set the motor on the top if possible. While installing the motor on the bottom will not cause problems during normal operation, long periods of inactivity may cause the grease to separate, flow into the motor unit, and cause problems in rare occasions.

Correlation Diagrams of Push Force and Current Limit

RCP6 Series Slider Type/Rod Type * Includes RCP6CR/RCP6W

Push force can be achieved only during push mode and speed is limited below 20mm/s depending on the model. See manual for details.
In the push-motion operation, the push force can be changed by changing the current force of the controller to be between 20% (30%)-70%. The maximum push force will vary depending on the model, so please refer to the graphs below and on the following page, and select one based on the needed push force for your intended use.

When performing the push-motion operation with the slider type, please limit the push current in order that the reactive moment caused by the push force does not exceed the dynamic allowable moment (Ma, Mb) specified in the catalog (It should be 80% or less of the dynamic allowable moment for the slider type). Please refer to the figures below, which show the working point of the guide moment, for help with calculating the moment. This can be done by considering the offset of the push force application position.
Please note that if excessive force which exceeds the dynamic allowable moment is applied, it may damage the guide and shorten its service life. Please keep this in mind and select a push current that is safely within its limits.

Slider type

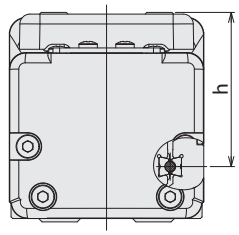


Table type

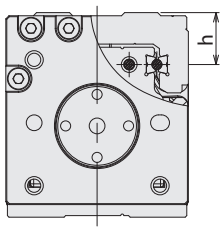


Working point of the guide moment

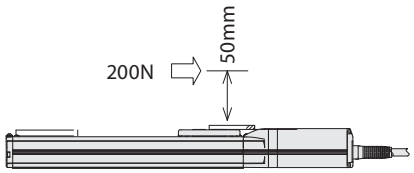
h dimension			
Slider type		Table type	
SA4	36	TA4	12
SA6	46	TA6	16.5
SA7	48	TA7	19.5
SA8	45.5		
WSA10	26.5		
WSA12	32		
WSA14	36		
WSA16	38.5		

* Unit: mm

Calculation example)

If push-motion operation is performed with an RCP6-SA7C by applying 200N at the position shown to the right, the moment received by the guide, or Ma, is calculated as:

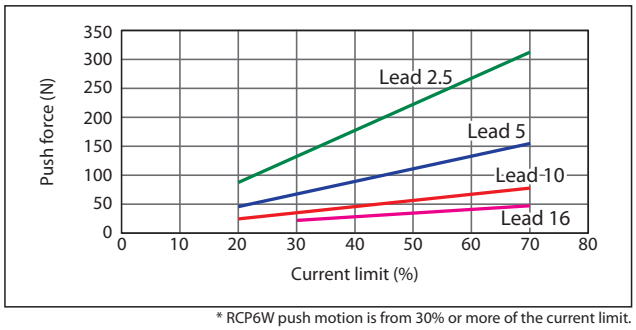
Ma = (48+50)×200 = 19600 (N•mm)
= 19.6 (N•m)



Since the dynamic allowable moment of the SA7C is Ma = 44.7 (N•m), so 44.7×0.8 = 35.76 > 19.6, this is an acceptable selection.
Also, should an Mb moment occur due to the push operation, calculate the moment from the overhang and ensure that it is within range of the dynamic allowable moment.

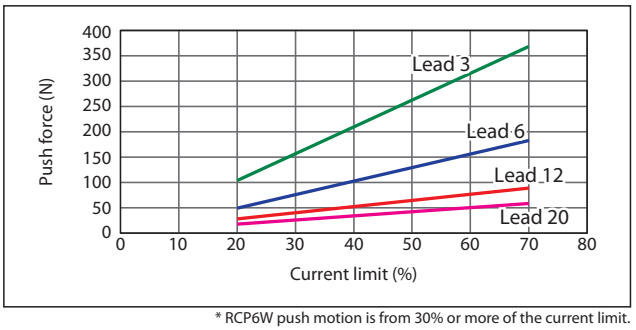
Correlation Diagrams of Push Force and Current Limit * The graphs below are only a reference, and the graphs may vary slightly from the actual.

SA4/RA4/RRA4/TA4 Type



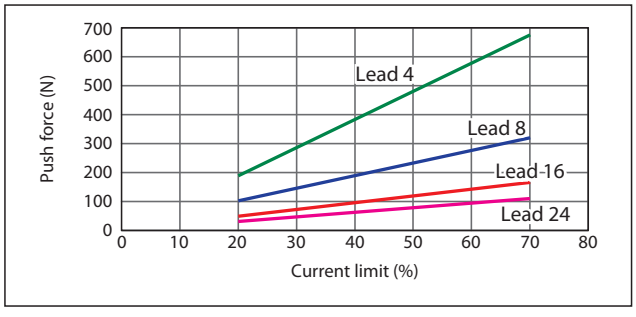
* RCP6W push motion is from 30% or more of the current limit.

SA6/RA6/RRA6/TA6 Type

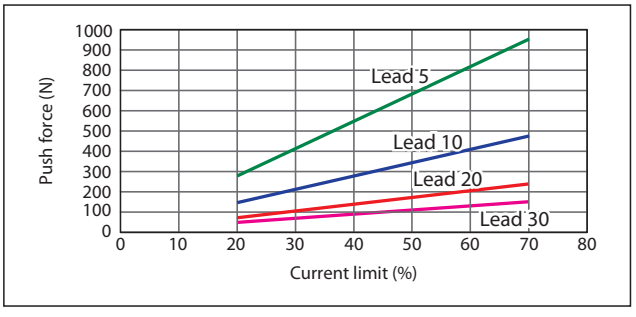


* RCP6W push motion is from 30% or more of the current limit.

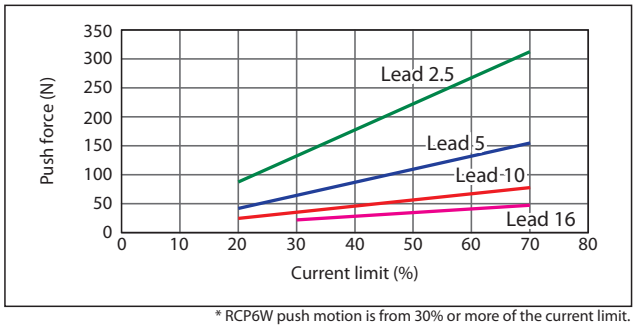
SA7/TA7/WSA14 Type



SA8 Type

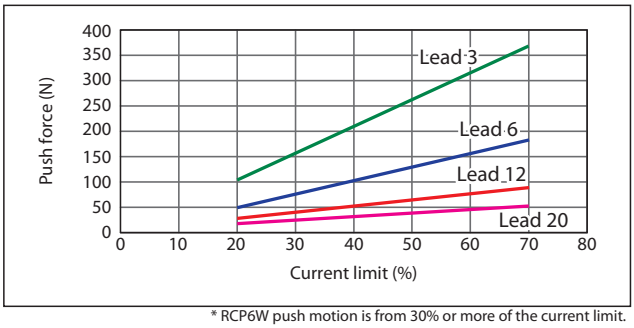


WSA10/WRA10 Type



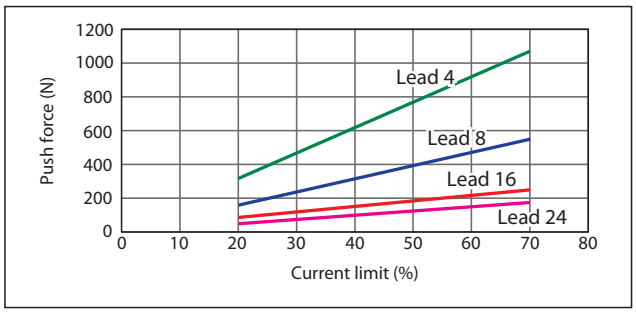
* RCP6W push motion is from 30% or more of the current limit.

WSA12/WRA12 Type



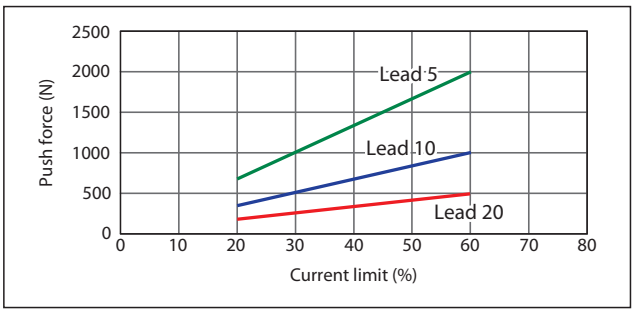
* RCP6W push motion is from 30% or more of the current limit.

RA7/RRA7/WRA14 Type



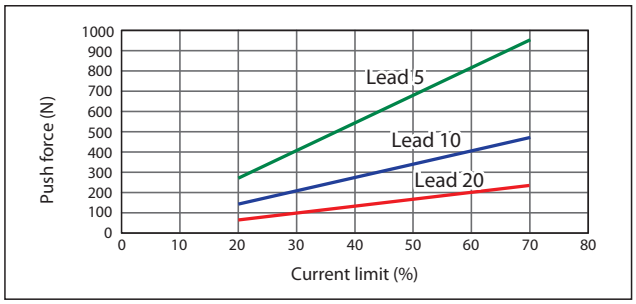
* RCP6W push motion is from 30% or more of the current limit.

RA8/RRA8/WRA16 Type



* RCP6W push motion is from 30% or more of the current limit.

WSA16 Type

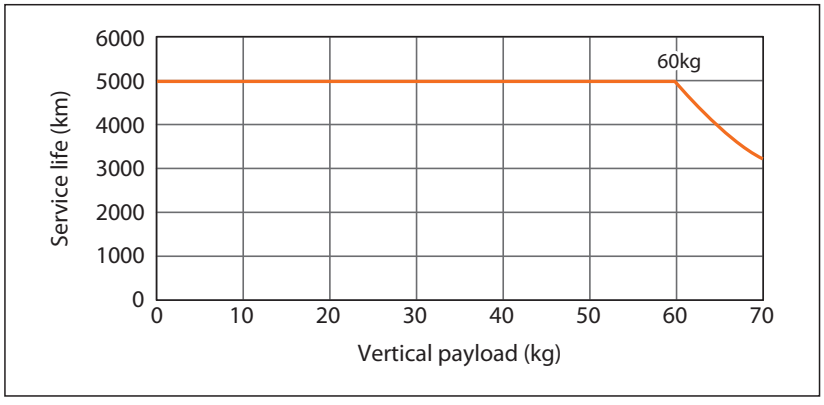


Vertical Payload and Service Life

* The graph below is only a reference, and the graph may vary slightly from the actual.

When using RCP6(S)-RA8, RRA8, WSA16 (lead 5 only), WRA16 (lead 5 only), RCP6(S)W-RA8, RRA8, WSA16 (lead 5 only), WRA16 (lead 5 only) vertically, their service life will vary greatly depending on the payload. Please check the following graph.

RA8/RRA8/WSA16/WRA16 Type



Tables of Payload by Speed/Acceleration

The tables below shows the maximum payload in each acceleration/deceleration for different models. Please select a model that satisfies the operational conditions you desire.
For the MCON-C/LC controller, high-output enabled operation is only available if "high-output setting" is selected as an option.
For the double slider payload, refer to P.248.

RCP6 Series | Slider Type Motor Coupling Specification

High-output Setting Enabled

* RCP6CR is the same.

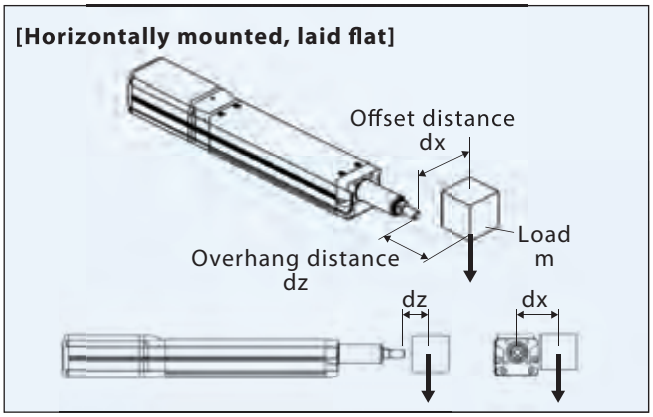
Selection Guideline for Allowable Load Mass

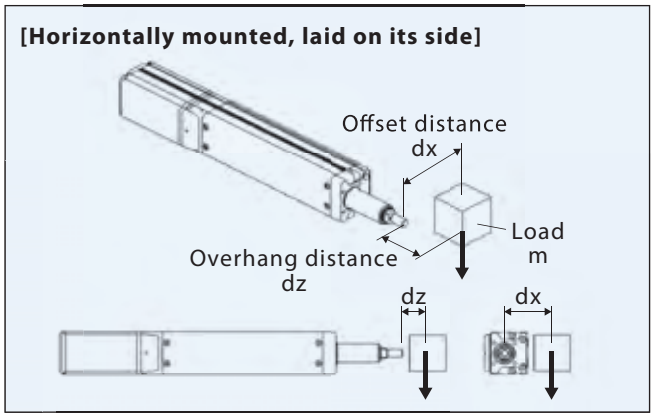
The radial cylinder has a built-in guide, so loads up to a certain level can be applied to the rod without using an external guide.
Refer to the graphs below for the allowable load mass.
If the allowable load mass is exceeded, please add an external guide.

■ Allowable Load Mass for Horizontally Mounted RCP6(S)-RRA Series * RCP6(S)W is the same.

[Horizontally mounted, laid flat]

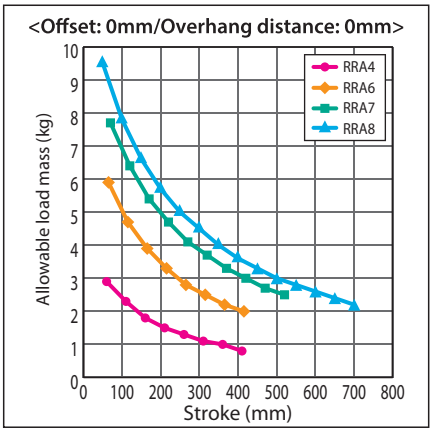


[Horizontally mounted, laid on its side]

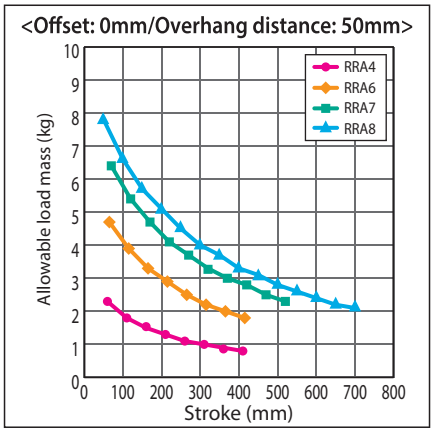


■ RCP6(S)-RRA4/RRA6/RRA7/RRA8

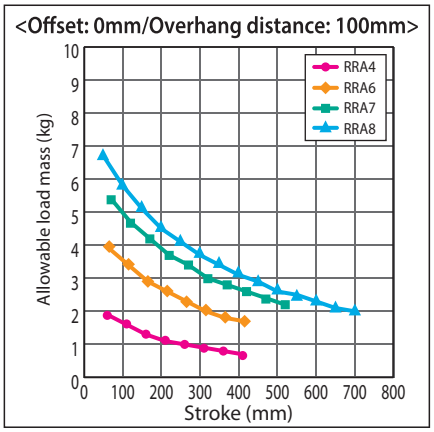
<Offset: 0mm/Overhang distance: 0mm>



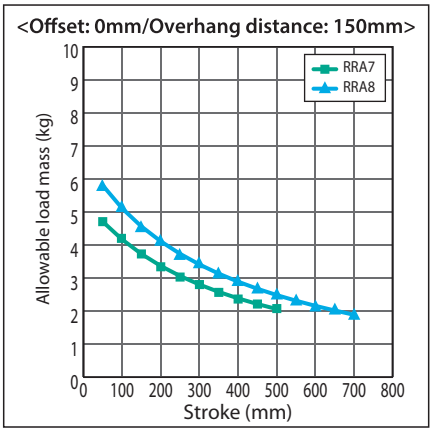
<Offset: 0mm/Overhang distance: 50mm>



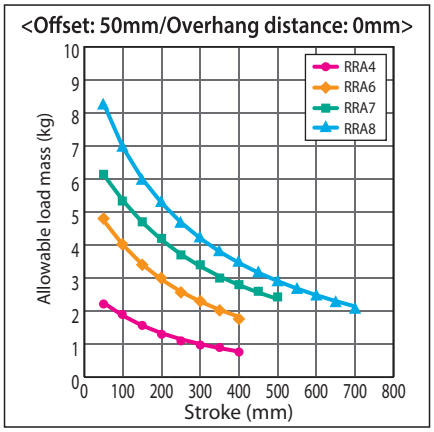
<Offset: 0mm/Overhang distance: 100mm>



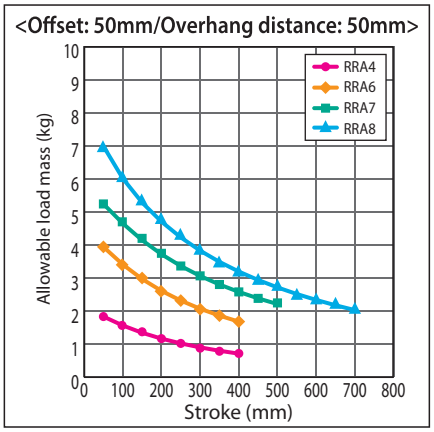
<Offset: 0mm/Overhang distance: 150mm>



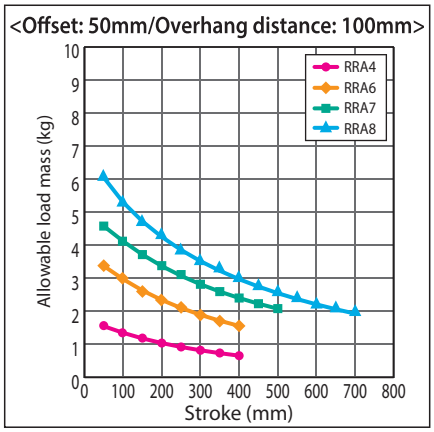
<Offset: 50mm/Overhang distance: 0mm>

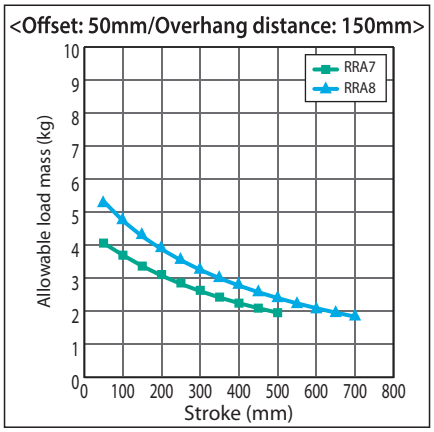


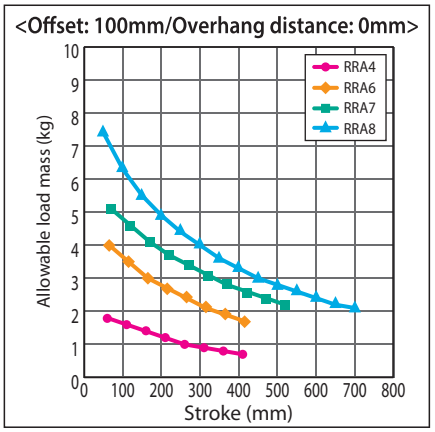
<Offset: 50mm/Overhang distance: 50mm>

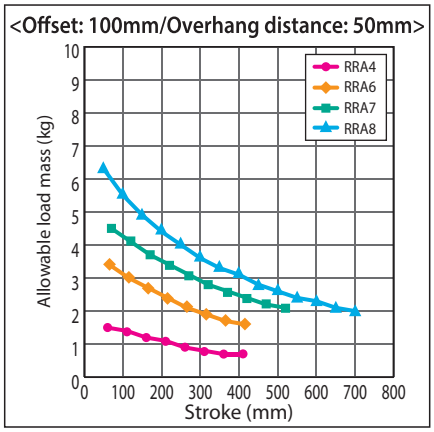


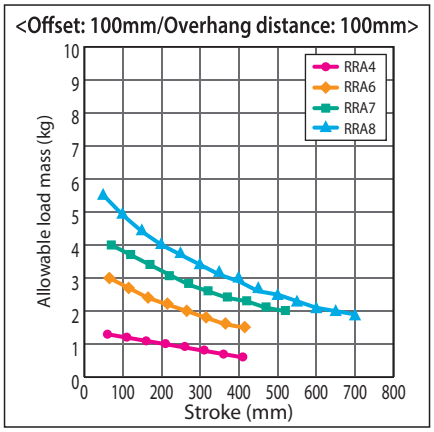
Allowable load calculation conditions.
Load mass corresponding to a product service life of 5000 km, considering moments generated by acceleration/deceleration. (Acceleration: 1G, speed 500mm/s)

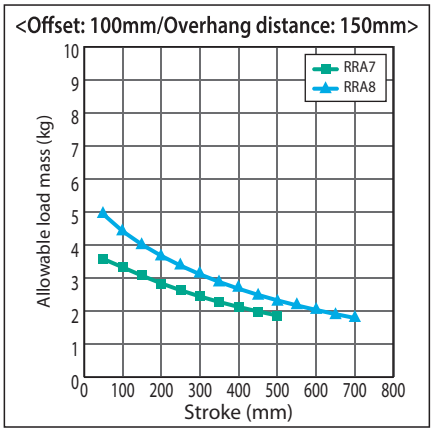


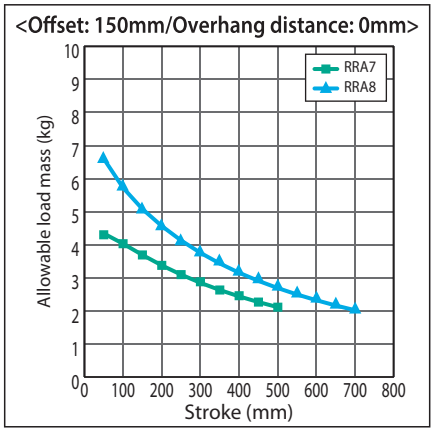


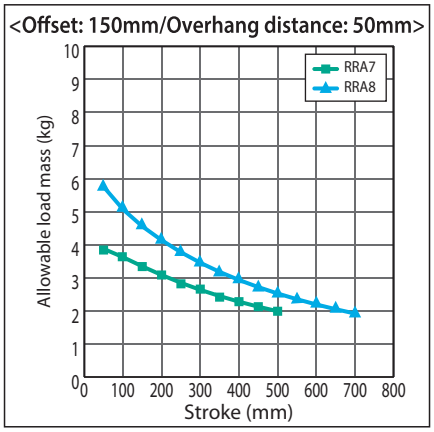


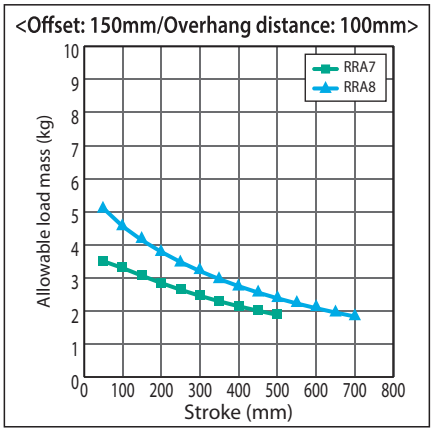


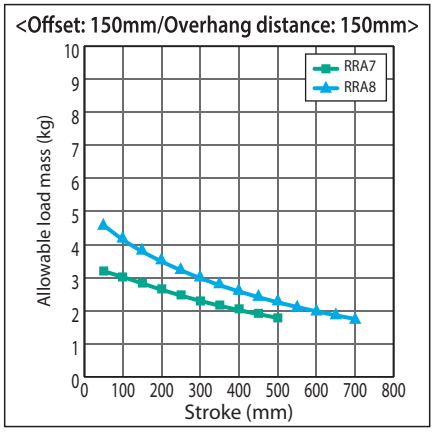










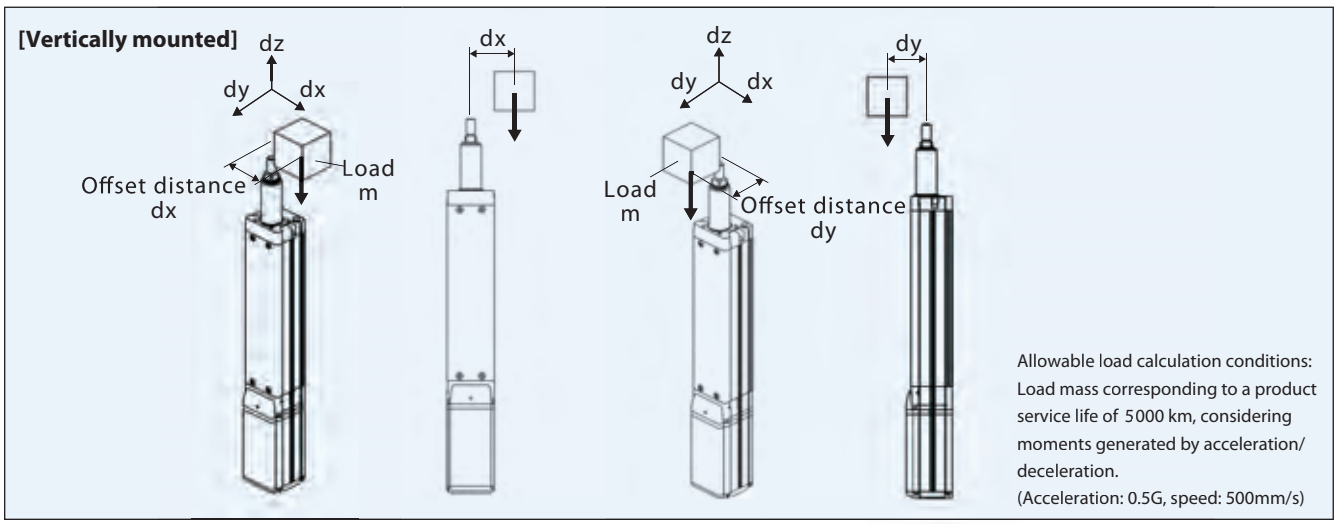


Allowable load calculation conditions.

Load mass corresponding to a product service life of 5000 km, considering moments generated by acceleration/deceleration. (Acceleration: 1G, speed 500mm/s)

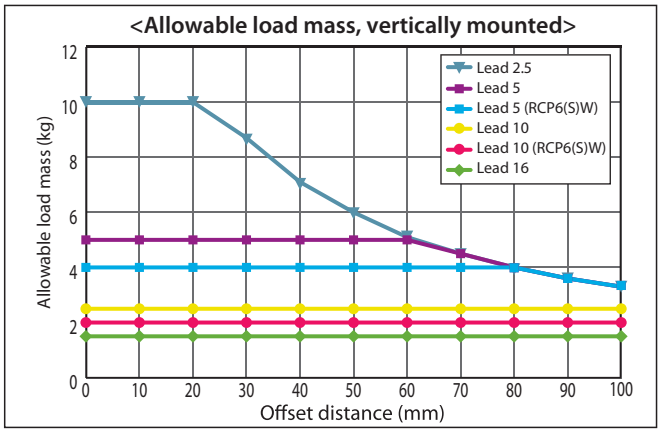
Selection Guideline for Allowable Load Mass

■ Allowable Load Mass for Vertically Mounted RCP6(S)-RRA *Series* * Differs for RCP6(S)W in some cases depending on lead.

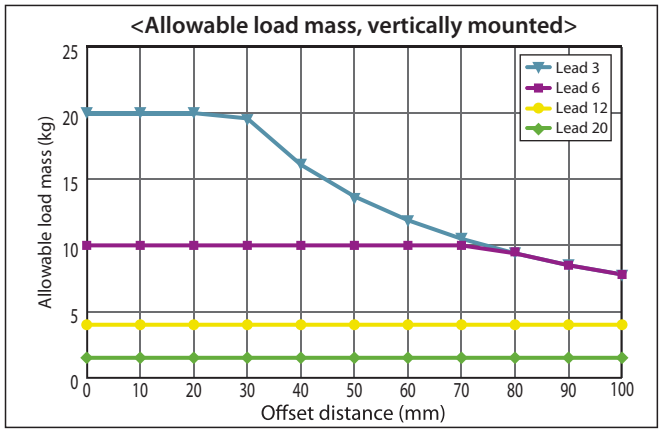


Allowable load calculation conditions:
Load mass corresponding to a product service life of 5000 km, considering moments generated by acceleration/deceleration.
(Acceleration: 0.5G, speed: 500mm/s)

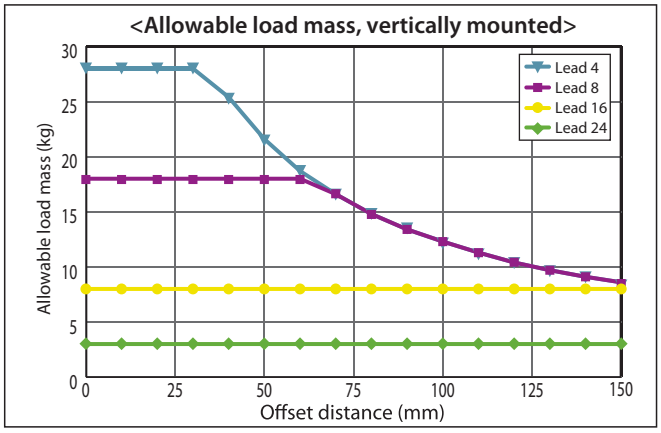
■ RCP6(S)-RRA4



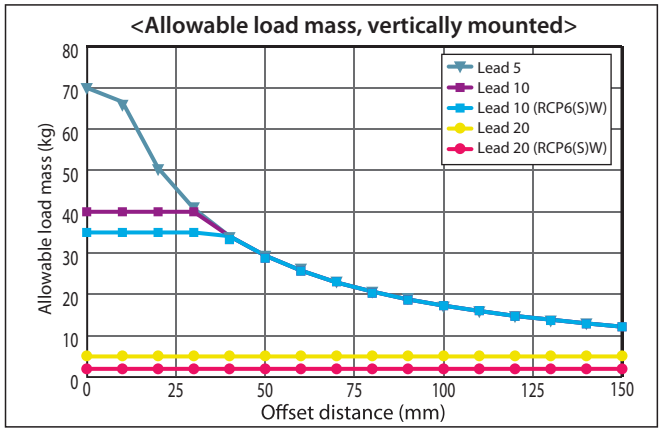
■ RCP6(S)-RRA6



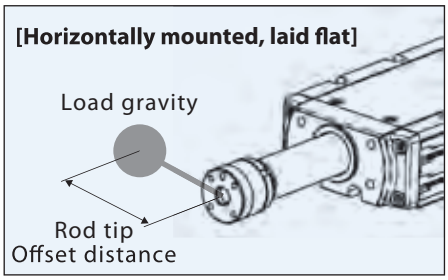
■ RCP6(S)-RRA7

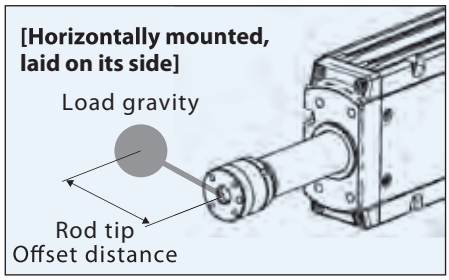


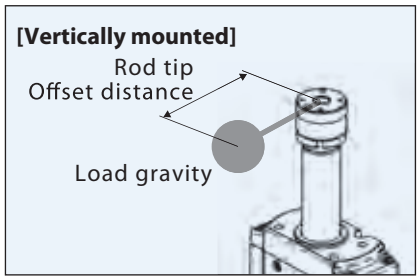
■ RCP6(S)-RRA8



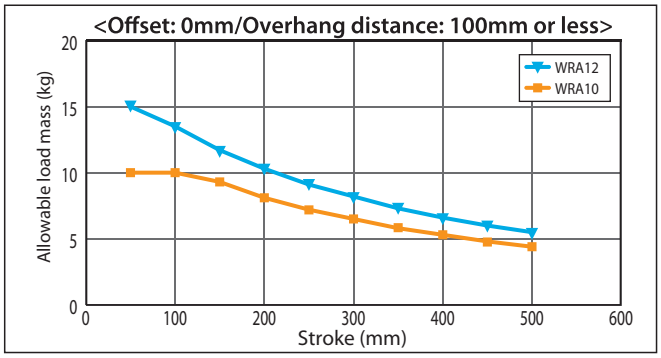
■ Allowable Load Mass for RCP6(S)-WRA Series * Differs for RCP6(S)W in some cases depending on lead.

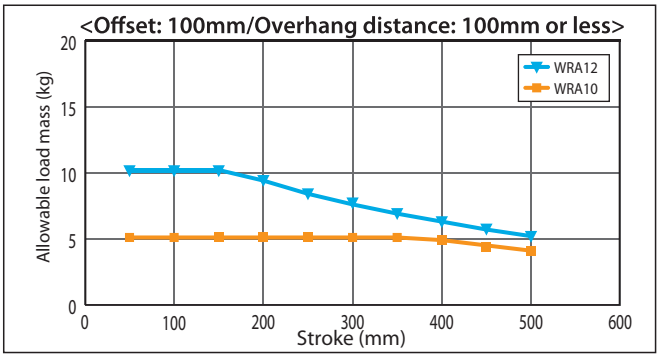




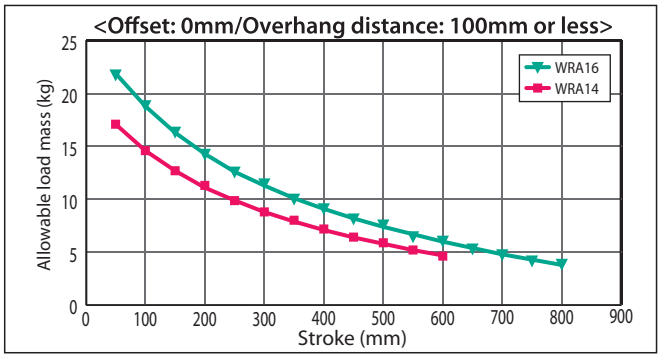


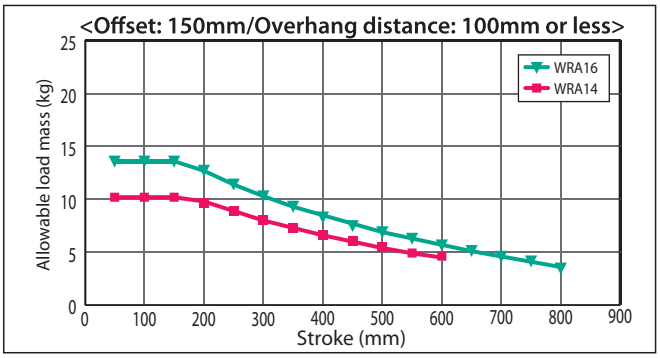
■ **RCP6(S)-WRA10/WRA12**





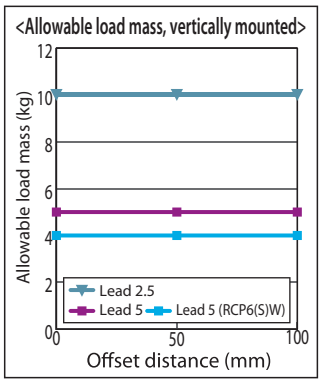
■ **RCP6(S)-WRA14/WRA16**



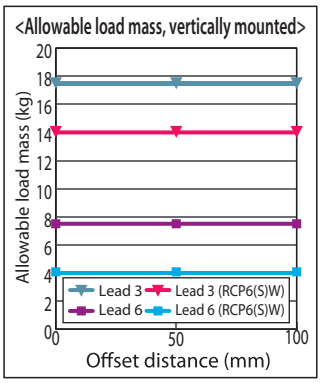


Allowable load calculation conditions: Load mass corresponding to a product service life of 5000 km, considering moments generated by acceleration/deceleration. (Acceleration: 1G, speed: 500mm/s. *For WRA16 type, acceleration: 0.2G, speed: 500mm/s)

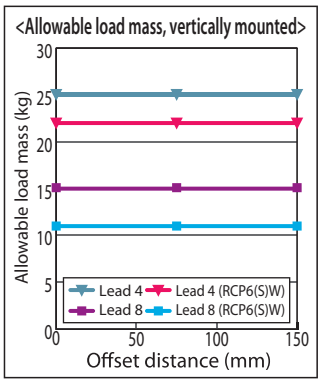
■ **RCP6(S)-WRA10**



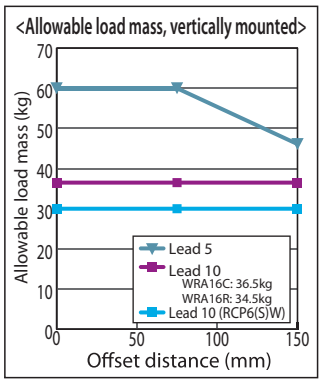
■ **RCP6(S)-WRA12**



■ **RCP6(S)-WRA14**

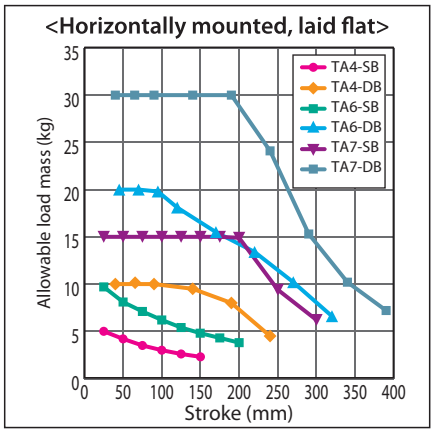


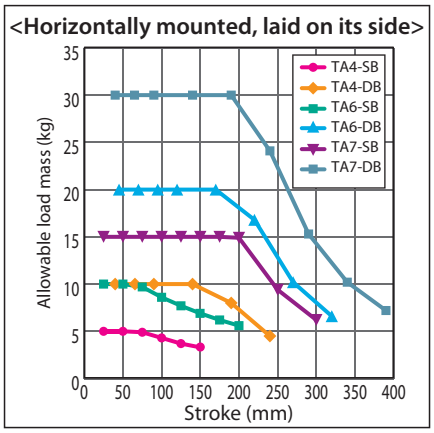
■ **RCP6(S)-WRA16**

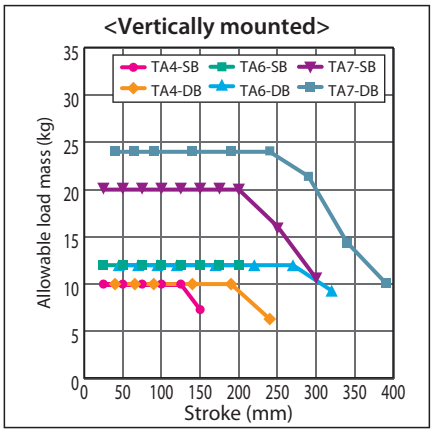


■ Allowable Load Mass for (Table type) RCP6(S)-TA Series

■ Due to the table type structure, longer stroke actuators result in lower allowable load mass.







Allowable load calculation conditions: Load mass corresponding to a product service life of 5000 km, considering moments generated by acceleration/deceleration. (Acceleration: 0.5G, speed: 500mm/s.

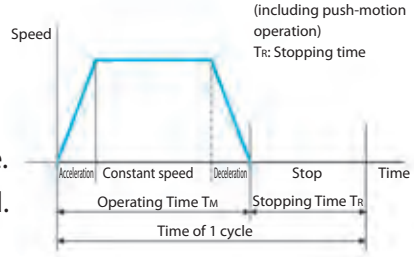
Duty Cycle

Duty cycle is the percentage of the actuator's active operation time in each cycle.
Please note that the way to calculate duty cycle for the pulse motor and AC servo motor types differs.

[Duty Cycle]
Duty cycle is the percentage of the actuator's active operation time in each cycle.

$$D = \frac{T_M}{T_M + T_R} \times 100(\%)$$

D: Duty
T_M: Operating time (including push-motion operation)
T_R: Stopping time



<Pulse motor>

For pulse motor type, an actuator can be operated at 100% of its duty cycle.
RCP6SCR/RCP6SW is the model that requires the duty cycle to be limited.

For RCP6SCR/W

Duty Cycle by Models

RCP6S Series	Duty Cycle
☐35 pulse motor type SA4/RRA4/RA4/TA4/WSA10/WRA10 (Common to coupled motor/side-mounted motor)	100%
☐42 pulse motor type SA6/RRA6/RA6/TA6/WSA12/WRA12 (Common to coupled motor/side-mounted motor)	Please see the graph below.
☐56 pulse motor type SA7/RRA7/RA7/TA7/WSA14/WRA14 (Common to coupled motor/side-mounted motor)	Please see the graph below.
☐56 high thrust pulse motor type SA8/WSA16 (Common to coupled motor/side-mounted motor)	100%
☐60 high thrust pulse motor type RRA8/RA8/WRA16 (Common to coupled motor/side-mounted motor)	70%

■ Correlation diagram of ambient temperature and duty cycle for 42 pulse motor type

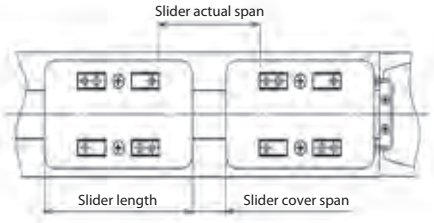
[Double Slider Span Diagram]



*1 Double slider specification (other than RCP6(CR)-SA8) values obtained by subtracting the payload compensation mass A from the standard specification payload are the payload specification values up to the payload compensation speed.
When operating at a speed exceeding the payload compensation speed, the value obtained by subtracting the payload compensation mass B from the standard specification payload is the payload specification value.
Moreover, refer to the nominal stroke specification value for the maximum speed.

*2 RCP6(CR)-SA8 double slider specification values obtained by subtracting the payload compensation mass A from the standard specification payload are the payload specification values at the full speed range.
Moreover, refer to the nominal stroke specification value for the maximum speed.

Notes: · Calculate the double slider load capacity using the specification table above and the "Payload by Speed /Acceleration Table" (P207~). Check the maximum speed from the calculated payload quantity. (Refer to the instruction manual for details.)

· The double slider cannot be selected in some cases depending on the lead. Check with the [List of Options Unavailable for Double Slider].

· When selecting the double slider specification and non-motor end specification at the same time, always check that the home return motion functions correctly after connecting the drive slider and the free slider.

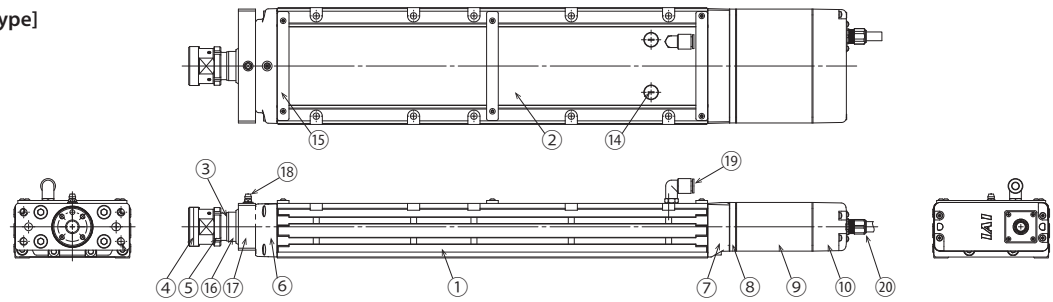
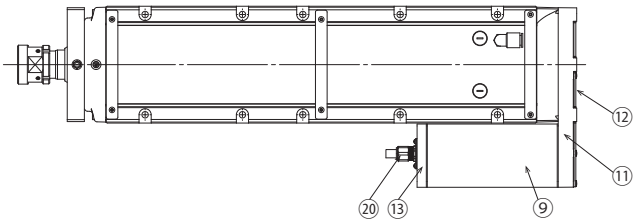
WRA12/14/16

[Coupling Type]



[Side-Mounted Type]



PCON-CB/CFB

Position Controller for RCP6/RCP5/ RCP4 (PowerCon Applicable) /RCP3/RCP2

Features

1 High-resolution battery-less absolute encoder compatible

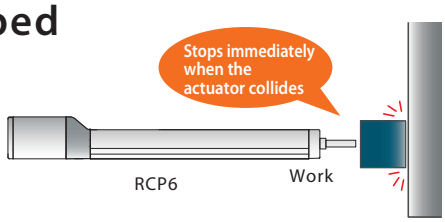
The RCP6 equipped with a high-resolution battery-less absolute encoder is supported. Since no battery is needed to retain position data, less space is required in the control panel, which in turn leads to lower cost of your equipment. The resolution is increased from 800 pulses /rev to 8192 pulses/rev.

2 PowerCon Equipped

PowerCon (high-output driver) which can enable the pulse motor to perform at its maximum capacity is now installed. By using PowerCon, the output of the pulse motor is increased by 50%. It contributes to cycle time reduction and productivity improvement.

3 Collision Detection Function Equipped

This function stops the operation immediately when the actuator comes into contact with an object.
The actuator stops without crashing, so that damage to the actuator can be minimized.



4 Enhanced Monitor Functions

The PC compatible software can display information about the actuator and controller in operation as waveforms.

*Information that can be displayed: Command current value, current speed/position, and PIO signals (start, positioning completion, alarm, etc.)

Using the trigger function, the end user can specify a particular moment, either a change in PIO signals or a designated moment during the actuator's operation time, to begin displaying the waveforms.

Monitor function screen (example)

Model Specification Items

< Controller>

PCON — [Type] — [Motor Type] [Encoder Type] — [I/O Type] — [I/O Cable Length] — **0** — [Simple Absolute Specification] — [Controller Mounting Specification]

Series | Type | Motor Type | Encoder Type | I/O Type | I/O Cable Length | Power Supply Voltage | Simple Absolute Specification | Controller Mounting Specification

Type	
CB	Standard
CGB	Safety category compliant type
CFB	56SP/60P/86P motor-compatible type
CGFB	Safety category compliant, 56SP/60P/86P motor-compliant type

Motor Type	
20P	20□ Pulse motor
20SP	20□ High-thrust pulse motor
28P	28□ Pulse motor
28SP	28□ High-thrust pulse motor
35P	35□ Pulse motor
42P	42□ Pulse motor
42SP	42□ High-thrust pulse motor
56P	56□ Pulse motor
56SP	56□ High-thrust pulse motor
60P	60□ High-thrust pulse motor
86P	86□ High-thrust pulse motor

(e.g.) 20P : For 20□ pulse motor

Encoder Type	
WAI	Battery-less absolute specification Incremental specification
SA	Simple absolute speficication

I/O Type	
NP	PIO (NPN)
PLN	Pulse train (NPN)
PN	PIO (PNP)
PLP	Pulse train (PNP)
DV	DeviceNet
CC	CC-Link
PR	PROFIBUS-DP
CN	CompoNet
EC	EtherCAT
EP	EtherNet/IP
PRT	PROFINET IO

I/O Cable Length	
0	No cable
2	2m
3	3m
5	5m

* When a field network specification is selected, the I/O cable length is "O".

Power Supply Voltage	
0	24VDC

Simple Absolute Specification	
(Blank)	Battery-less absolute specification Incremental specification
AB	Simple absolute specification (With absolute battery. No battery unit included)
ABU	Simple absolute specification (With absolute battery and battery unit)
ABUN	Simple absolute specification (Without absolute battery and battery unit)

* PCON-CFB/CGFB does not support a simple absolute specification.

Controller Mounting Specification	
(Blank)	Screw mounting specification
DN	DIN rail mounting specification

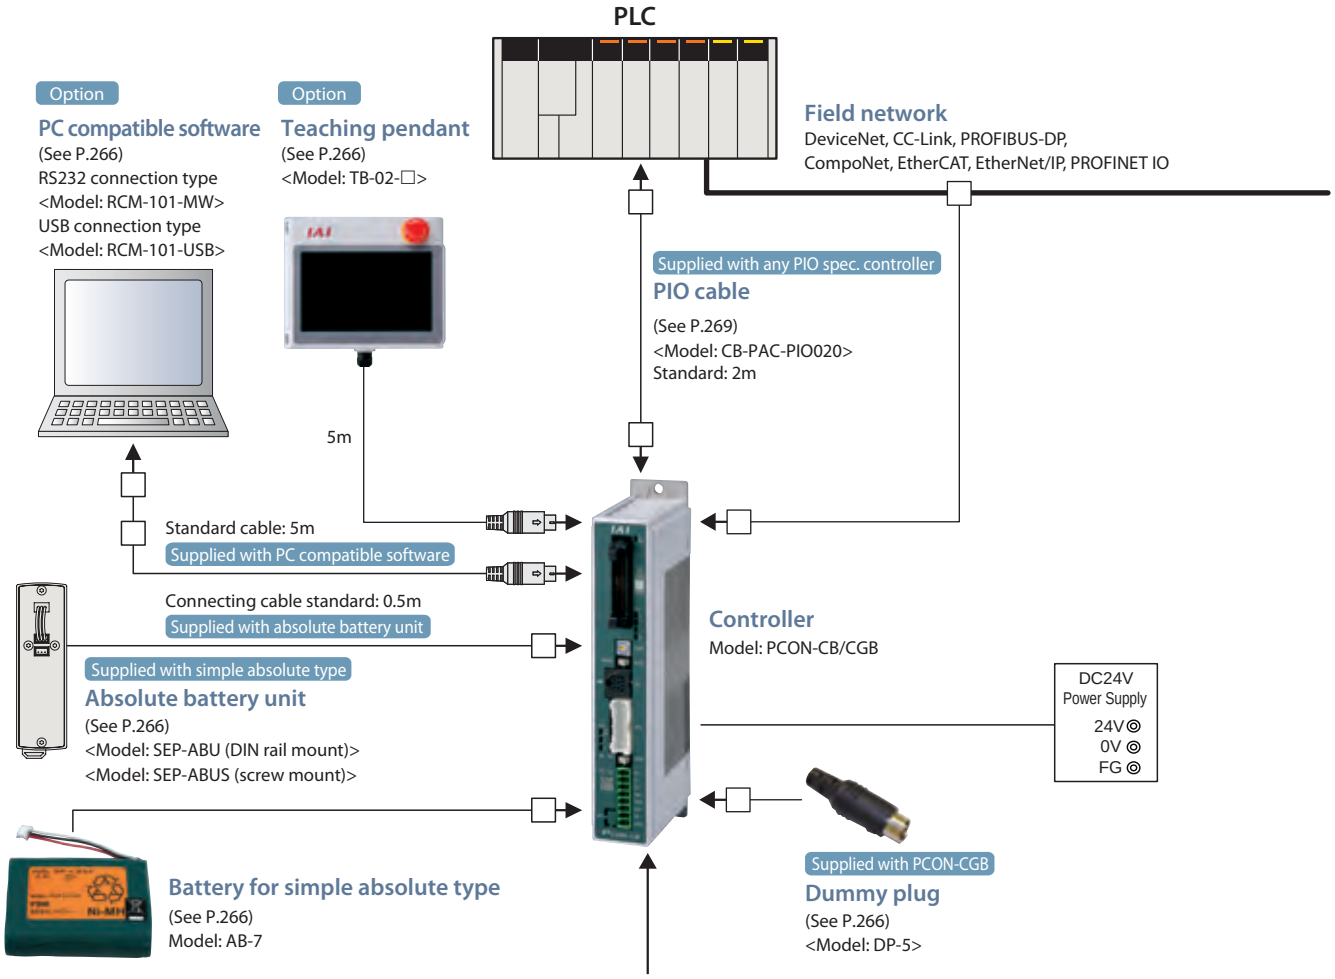
* The mounting type (screw or DIN rail) of the absolute battery unit and the controller must be the same.

Note

In general, the model number for motor type will be the same as the model number of the actuator's motor, but there is a few exceptions which the model number of controller and actuator do not match. Below is the list of those models. Please be careful when these item(s) are selected.
<28SP applicable actuator> • Controller Motor Type [28SP] RCP2-RA3C

System Configuration

■ PowerCON150 <PCON-CB/CGB>



< Connectable actuators>

*Motor/encoder cable type varies depending on the actuator type. When ordering a replacement cable, please refer to P. 267.

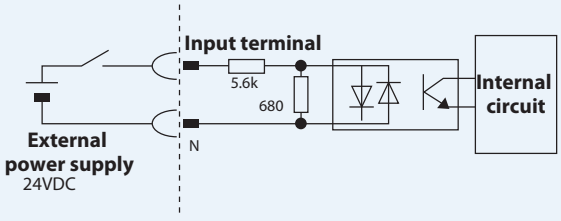
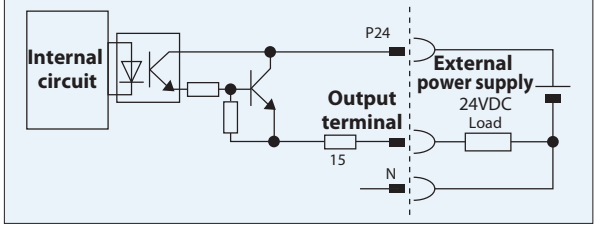
PNP specification



PNP specification



Types of PIO Patterns (Control Patterns)

This controller has eight different control methods.
Please select the PIO pattern that best suits your application in Parameter No.25, "PIO Pattern Selection".

Type	Set value of parameter No.25	Mode	Overview
PIO Pattern 0	0 (Factory setting)	Positioning mode (Standard type)	• Number of positioning points: 64 points • Position number command: Binary Coded Decimal (BCD) • Zone signal output*1 : 1 point • Position zone signal output*2 : 1 point
PIO Pattern 1	1	Teaching mode (Teaching type)	• Number of positioning points: 64 points • Position number command: Binary Coded Decimal (BCD) • Position zone signal output*2 : 1 point • Jog (inching) operation using PIO signals is supported. • Current position data can be written to the position table using PIO signals.
PIO Pattern 2	2	256-point mode (256 positioning points)	• Number of positioning points: 256 points • Position number command: Binary Coded Decimal (BCD) • Position zone signal output*2 : 1 point
PIO Pattern 3	3	512-point mode (512 positioning points)	• Number of positioning points: 512 points • Position number command: Binary Coded Decimal (BCD) • No zone signal output
PIO Pattern 4	4	Solenoid valve mode 1 (7-point type)	• Number of positioning points: 7 points • Zone signal output*1 : 1 point • Position number command: Individual number signal ON • Position zone signal output*2 : 1 point
PIO Pattern 5	5	Solenoid valve mode 2 (3-point type)	• Number of positioning points: 3 points • Position number command: Individual number signal ON • Completion signal: A signal equivalent to a LS (limit switch) signal can be output. • Zone signal output*1 : 1 point • Position zone signal output*2 : 1 point
PIO Pattern 6 (Note 1)	6	Pulse-train control mode for incremental	• Differential pulse input (200 kpps max.) • Home return function • Zone signal output*1 : 2 points • No feedback pulse output
PIO Pattern 7 (Note 1)	7	Pulse-train control mode for absolute	• Reference point setting (1 point) • Home return function • Differential pulse input (200 kpps max.) • No feedback pulse output • Zone signal output*1 : 2 points

*1 Zone signal output: Please set the desired zone range in Parameter No.1/2 or 23/24, and it will remain effective once home return is completed.
*2 Position zone signal output: This command function relates to the position number. Set the desired zone range in the position table, and this function will only become enabled when the corresponding position is specified; it will be disabled for all other position commands.
(Note 1) Pulse train control mode is available only the pulse train control type is specified (PCON-CB-PLN and PLP) at the time of purchase.

PIO Patterns and Signal Assignments

The table below lists the signal assignments for the I/O flat cable under different PIO patterns. Connect an external device (such as a PLC) according to this table.

Pin No.	Category	PIO function	Parameter No.25, "PIO Pattern Selection"					
			0	1	2	3	4	5
			Positioning mode	Teaching mode	256-point mode	512-point mode	Solenoid valve mode 1	Solenoid valve mode 2
	Input	Number of positioning points	64 points	64 points	256 points	512 points	7 points	3 points
		Home return signal	○	○	○	○	○	—
		Jog signal	—	○	—	—	—	—
		Teaching signal (writing of current position)	—	○	—	—	—	—
		Brake release	○	—	○	○	○	○
	Output	Moving signal	○	○	—	—	—	—

16B		OUT15	LOAD/TRQS *ALML	*ALML	LOAD/TRQS *ALML	LOAD/TRQS *ALML	LOAD/TRQS *ALML	*ALML
17B	Pulse Input	-						
18B		-						
19B	0V	N						
20B	0V	N						

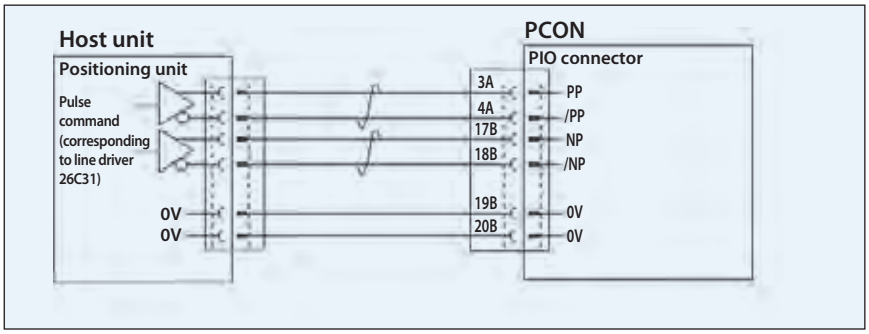
(Note) In the table above, asterisk * symbol accompanying each code indicates a negative logic signal. PM1~PM8 are alarm binary code output signals that are used when an alarm generates.
(Note 1) In all PIO patterns other than 3, this signal can be switched with PZONE by setting Parameter No. 149 accordingly.
(Note 2) The setting will not become effective until the home return is completed.

Reference) Negative logic signal

Signals denoted by * are negative logic signals. Negative logic input signals are processed when turned OFF. Negative logic output signals normally remain ON while the power is supplied, and turn OFF when the signal is output.

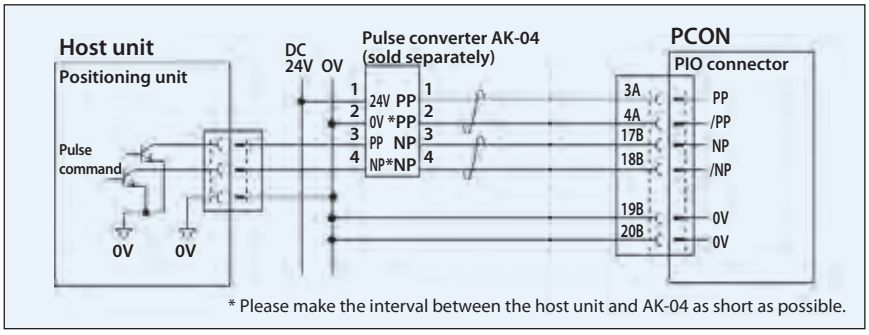
Pulse-train Control Circuit

■ Host Unit = Differential Type



■ Host Unit = Open Collector Type

The AK-04 (optional) is needed to input pulses.



⚠ Caution: Use the same power supply for open collector input/output to/from the host and for the AK-04.

Command Pulse Input Patterns

	Command pulse-train pattern	Input terminal	Forward	Reverse
Negative logic	Forward pulse-train	PP•/PP		
	Reverse pulse-train	NP•/NP		
	A forward pulse-train indicates the amount of motor rotation in the forward direction, while a reverse pulse-train indicates the amount of motor rotation in the reverse direction.			
	Pulse-train	PP•/PP		
	Sign	NP•/NP	Low	High
	The command pulses indicate the amount of motor rotation, while the sign indicates the rotating direction.			
	Phase A/B pulse-train	PP•/PP		
		NP•/NP		
	Command phases A and B having a 90° phase difference (multiplier is 4) indicate the amount of rotation and the rotating direction.			
Positive logic	Forward pulse-train	PP•/PP		
	Reverse pulse-train	NP•/NP		
	Pulse-train	PP•/PP		
	Sign	NP•/NP	High	Low
	Phase A/B pulse-train	PP•/PP		
		NP•/NP		

I/O Signals in Pulse-train Control Mode

The table below lists the signal assignments for the flat cable in the pulse-train control mode. Connect an external device (such as PLC) according to this table.

Pin number	Category	I/O number	Signal abbreviation	Signal name	Parameter No.25, "PIO pattern 6/7"
1A	24V		P24	Power supply	I/O power supply +24V
2A	24V		P24	Power supply	I/O power supply +24V
3A	Pulse Input		PP	Differential pulse-train input (+)	Differential pulses are input from the host. Up to 200kpps can be input.
4A			/PP	Differential pulse-train input (-)	
5A	Input	IN0	SON	Servo ON	The servo is ON while this signal is ON, and OFF while the signal is OFF.
6A		IN1	RES	Reset	Present alarms are reset when this signal is turned ON.
7A		IN2	HOME	Home return	Home return operation is performed when this signal is turned ON.
8A		IN3	TL	Torque limit selection	When this signal is turned ON, the motor torque is limited to the value set by the parameter.
9A		IN4	CSTP	Forced stop	The actuator is forcibly stopped when this signal has remained ON for 16ms or more. The actuator decelerates to a stop at the torque set in the controller and the servo turns OFF.
10A		IN5	DCLR	Deviation counter clear	This signal clears the deviation counter.
11A		IN6	BKRL	Forced brake release	The brake is forcibly released.
12A		IN7	RMOD	Operation mode switching	The operation mode can be switched when the MODE switch on the controller is set to AUTO. (AUTO when this signal is OFF, and to MANU when the signal is ON.)
13A		IN8	RSTR*1	Reference position movement command	When this signal turns on, the actuator moves to the reference position set in parameter No.167. *1: Used only in PIO Pattern 7.
14A		IN9	NC	-	Not used
15A		IN10	NC	-	Not used
16A		IN11	NC	-	Not used
17A		IN12	NC	-	Not used
18A		IN13	NC	-	Not used
19A		IN14	NC	-	Not used
20A		IN15	NC	-	Not used
1B	Output	OUT0	PWR	System ready	This signal turns ON when the controller becomes ready after the main power supply has been turned on.
2B		OUT1	SV	Servo ON status	This signal turns ON when the servo is ON.
3B		OUT2	INP	Positioning complete	This signal turns ON when the amount of remaining travel pulses in the deviation counter falls within the in-position band.
4B		OUT3	HEND	Home return complete	This signal turns ON upon completion of home return.
5B		OUT4	TLR	Torque limited	This signal turns ON upon reaching the torque limit while the torque is limited.
6B		OUT5	#ALM	Controller alarm status	This signal turns ON when the controller is normal, and turns OFF when an alarm generates.
7B		OUT6	#EMGS	Emergency stop status	This signal turns ON when the emergency stop of the controller is cancelled, and turns OFF when an emergency stop is actuated.
8B		OUT7	RMDS	Operation mode status	The operation mode status is output. This signal turns ON when the controller is in the manual mode.
9B		OUT8	ALM1	Alarm code output signal	An alarm code is output when an alarm generates. For details, refer to the operation manual.
10B		OUT9	ALM2		
11B		OUT10	ALM4		
12B		OUT11	ALM8		
13B		OUT12	#ALML	Minor failure alarm	This signal turns ON when the controller is normal, and turns OFF when a message-level alarm has been generated.
14B		OUT13	REND*1	Reference position movement complete	This signal turns ON when movement to the reference point set in parameter No. 167 is completed. *1: Used only in PIO Pattern 7.
15B		OUT14	ZONE1	Zone signal 1	This signal turns ON when the current position of the actuator falls within the parameter-set range.
16B		OUT15	ZONE2	Zone signal 2	
17B	Pulse Input		NP	Differential pulse-train input (+)	Differential pulses are input from the host. Up to 200kpps can be input.
18B			/NP	Differential pulse-train input (-)	
19B	0V		N	Power supply	I/O power supply 0V
20B	0V		N	Power supply	I/O power supply 0V

Note) # indicates a negative logic signal. Negative logic signals are normally ON while the power is supplied, and turn OFF when the signal is output.

Field Network Specification: Explanation of Operation Modes

If the PCON-CB is controlled via a field network, you can select one of the following five modes to operate the actuator. Please note that the data areas required on the PLC side will vary depending on the mode.

■ Mode Description

	Mode	Description
0	Remote I/O mode	Similarly to the PIO specification, this mode operates by directing bytes to ON/OFF via a network. The number of positioning points and functions will vary depending on the operation patterns (PIO patterns) set by the controller's parameters.
1	Position/simple direct value mode	The target position value is directly input, while all other operational conditions (speed, acceleration, etc) are set by indicating the position number corresponding to the desired operating conditions from the position data table.
2	Half direct value mode	The actuator is operated by directly inputting values for speed, acceleration rate and push current, as well as the target position.
3	Full direct value mode	The actuator is operated by directly inputting values for the target position, speed, acceleration rate and push current, etc. In addition, you are able to read the current position, current speed, and the specified current, etc.
4	Remote I/O mode 2	This mode is the same as the remote I/O mode above, with the added functionality of reading current position and the command motor current.

■ Required Data Size for Each Network

		DeviceNet	CC-Link	PROFIBUS-DP	CompoNet	EtherCAT	EtherNet/IP	PROFINET IO
0	Remote I/O mode	2 bytes	1 station	2 bytes	2 bytes	2 bytes	2 bytes	2 bytes
1	Position/simple direct value mode	8 bytes	1 station	8 bytes	8 bytes	8 bytes	8 bytes	8 bytes
2	Half direct value mode	16 bytes	2 stations	16 bytes	16 bytes	16 bytes	16 bytes	16 bytes
3	Full direct value mode	32 bytes	4 stations	32 bytes	32 bytes	32 bytes	32 bytes	32 bytes
4	Remote I/O mode 2	12 bytes	1 station	12 bytes	12 bytes	12 bytes	12 bytes	12 bytes

■ List of Functions by Operation Mode

	Remote I/O mode	Position/simple direct value mode	Half direct value mode	Full direct value mode	Remote I/O mode 2
Number of positioning points	512 points	768 points	Unlimited	Unlimited	512 points
Operation by direct position data input	—	○	○	○	—
Direct speed/ acceleration input	—	—	○	○	—
Push-motion operation	○	○	○	○	○
Current position read	—	○	○	○	○
Current speed read	—	—	○	○	—
Operation by position number input	○	○	—	—	○
Completed position number read	○	○	—	—	○

* ○ indicates that the operation is supported, and — indicates that it is not supported.

Specification List

Item				Description	
				PCON-CB/CGB	PCON-CFB/CGFB
Number of controlled axes				1 axis	
Power supply voltage				24VDC±10%	
Load current (including control-side current consumption) (Note 1)	RCP2 RCP3	Motor type	20P, 28P, 28SP	1A max.	
			35P, 42P, 56P	2.2A max.	
			60P, 86P		6A max.
	RCP4 RCP5	Motor type	28P, 35P, 42P, 42SP, 56P	High-output setting disabled: 2.2A max.	
				High-output setting enabled: 3.5A rated/4.2A max.	
			56SP, 60P, 86P		6A max.
	RCP6	Motor type	28P, 35P, 42P, 56P	High-output setting disabled: 2.2A max.	
				High-output setting enabled: 3.5A rated/4.2A max.	
			56SP, 60P		5.7A max.
Electromagnetic brake power (for actuator with brake)				24VDC±10% 0.15A max.	24VDC±10% 0.5A max.
Inrush current (Note 2)				8.3A	10A
Momentary power failure resistance				500μs max.	
Compatible encoder				High-resolution battery-less absolute encoder: Resolution 8192 pulses/rev	
				Battery-less absolute encoder: Resolution 800 pulses/rev	
				Incremental encoder: Resolution 800 pulses/rev	
Actuator cable length				20m max.	
External interface	PIO specification			Dedicated 24VDC signal input/output (NPN/PNP selection) ... Input max. of 16 points, output max. of 16 points, cable length max. of 10m	
	Field network specification			DeviceNet, CC-Link, PROFIBUS-DP, CompoNet, EtherCAT, EtherNet/IP, PROFINET IO	
Data setting, input method				PC compatible software, touch panel teaching pendant	
Data retention memory				Position data and parameters are saved in non-volatile memory. (No limit to rewrite)	
Operation mode				Positioner mode / pulse-train control mode (selectable by parameter setting)	
Number of positioner-mode positions				Up to 512 points for positioner type or up to 768 points for network type *The total number of positioning points varies depending on which PIO pattern is selected.	
Pulse-train interface	Input pulse			Differential type (line-driver type): 200kpps max., cable length up to 10m	
				Open-collector method: Not supported * If the host uses open-collector outputs, use AK-04 (optional, sold separately) to change them to differential outputs.	
	Command pulse magnification (Electronic gear: A/B)			1/50 < A/B < 50/1 Setting range of A and B (set by parameters): 1~4096	
	Feedback pulse output			None	
Insulation resistance				Not less than 10MΩ at 500VDC	
Electric shock protection mechanism				Class I, basic insulation	
Mass (Note 3)	Battery-less absolute specification / Incremental specification			Screw mounting type: Not more than 250g DIN rail mounting type: Not more than 285g	Screw mounting type: Not more than 270g DIN rail mounting type: Not more than 305g
	Simple absolute specification (including 190g for battery)			Screw mounting type: Not more than 450g DIN rail mounting type: Not more than 485g	
Cooling method				Natural air cooling	Forced air cooling
Environment	Ambient operating temperature			0~40°C	
	Ambient operating humidity			Not more than 85% RH (non-condensing)	
	Operating ambience			Free from corrosive gases	
	Degree of protection			IP20	

Note 1) 0.3A higher for the field network specification.
Note 2) Inrush current flows for approx. 5msec after the power is input (at 40°C). Please note that the inrush current value varies depending on the impedance of the power line.
Note 3) 30g heavier for the field network specification.

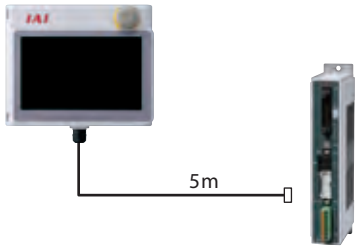
Options

Touch panel teaching pendant

Features A teaching device equipped with functions such as position teaching, trial operation, and monitoring.

Model **TB-02-□**

Configuration



Specifications

Rated voltage	24VDC
Power consumption	3.6W or less (150mA or less)
Ambient operating temperature	0~40°C
Ambient operating humidity	20~ 85% RH (Non-condensing)
Environmental resistance	IP20
Weight	470g (TB-02 unit only)

PC compatible software (Windows only)

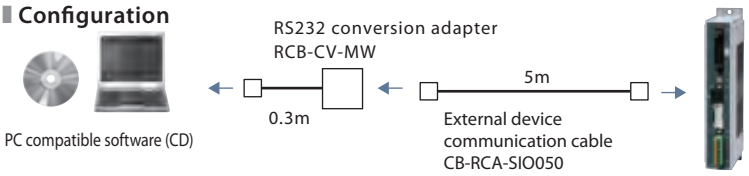
Features The start-up support software which comes equipped with functions such as position teaching, trial operation, and monitoring.
A complete range of functions needed for making adjustments contributes to a reduced start-up time.

Supported Windows versions:
7 / 8 / 10

Model **RCM-101-MW** (with an external device communication cable + RS232 conversion unit)

Please contact IAI for the current supported versions.

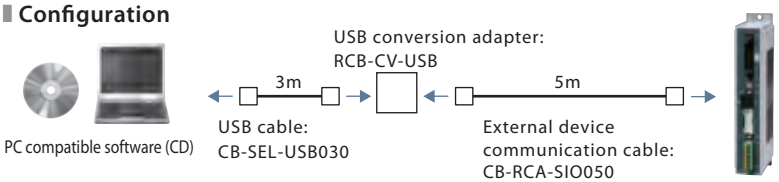
Configuration



Model **RCM-101-USB** (with an external device communication cable +USB conversion adapter + USB cable)

Please contact IAI for the current supported versions.

Configuration



Absolute battery unit

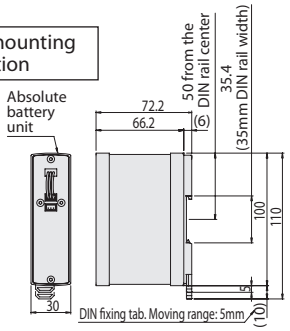
Overview A battery unit, supplied as an accessory for the simple absolute specification, which serves to back up the current position of the controller.

Model **SEP-ABU** (DIN rail mounting specification)
SEP-ABUS (Screw mounting specification)

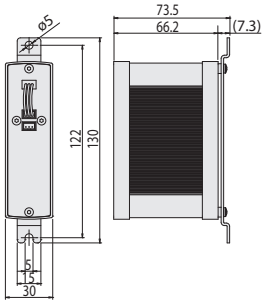
Specification

Item	Specification
Ambient operating temp. & humidity	0~40°C (around 20°C is desirable), 95% RH or less (non-condensing)
Operating ambience	Free from corrosive gases
Absolute battery	Model: AB-7 (Ni-MH battery/Life: approx. 3 years)
Absolute battery unit connecting cable	Model: CB-APSEP-AB005 (length: 0.5m)
Weight	Standard type: approx.230g/Dust-proof type: approx.260g

DIN rail mounting specification



Screw mounting specification



Replacement battery

Overview Replacement battery used with the absolute battery box.

Model **AB-7**

Dummy plug

Overview This plug is required when the safety category specification (PCON-CGB/CGFB) is used.

Model **DP-5**

Maintenance Parts

When placing an order for the replacement cable, please use the model number shown below.

■Table of Applicable Cables

	Model Number		Integrated Motor-encoder Cable	Integrated Motor-encoder Robot Cable

RCP6S with Built-in Controller

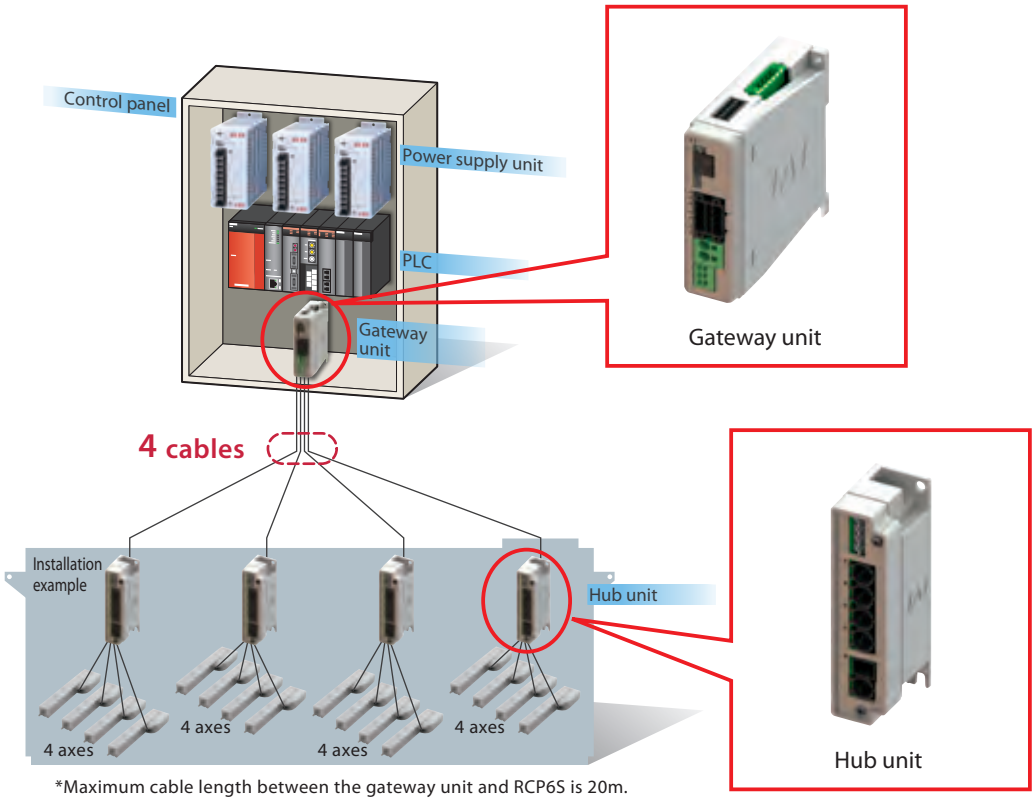
Built-in controller for RCP6S

Features

By using the gateway unit, a maximum of 16 axes* of RCP6S (relayed through a hub unit) can be operated via a field network with less wiring.
Hub unit allows us to keep the cable connected to the actuator of each axis short, and motor power supply and control signal lines can be connected as one cable between the hub unit and the RCP6S.

*The number of connectable axes will vary depending on the type of field network and its mode. Please refer to P. 272 for more information.

Control Panel for the RCP6S Built-in Controller Actuator



*Maximum cable length between the gateway unit and RCP6S is 20m.
If there is a hub unit in between, the maximum length is still 20m.
The cable length from the gateway unit to the hub unit needs to be 10m or less.

RCP6S Peripheral Equipment

Gateway unit is required in order to operate RCP6S.

○ Gateway unit:	This unit is used in order to connect RCP6S to the field network.	See P. 272
○ Hub unit:	This unit can expand the number of axes connected to the gateway unit.	See P. 275
○ PLC connection unit:	This unit is used to connect RCP6S directly to the PLC using Modbus serial communication.	See P. 276

Basic Controller Specification List

Specification			Specification Description
Number of controlled axes			1 axis
Power supply voltage			24VDC±10%
Control power capacity			0.3A (Built-in controller only)
Load current (including control-side current consumption)	Motor type	28P, 35P, 42P, 56P	Maximum 3.2A (High-output Enabled) Maximum 1.7A (High-output Disabled)
		56SP, 60P	5.7A max.
Electromagnetic brake power (for actuator with brake)			24VDC±10% 0.15A (Note) For releasing brake, 0.7A for 0.2 sec is required.
Heat output			5W (Motor type 28P, 35P, 42P, 56P) 19.2W (Motor type 56SP, 60P)
Inrush current (Note 1)	Motor type	28P, 35P, 42P, 56P	8.3A (With inrush current protection circuitry)
		56SP, 60P	10A (With inrush current protection circuitry)
Motor control method			Weak field vector control
Compatible encoder			Resolution of battery-less absolute encoder: 8,192 pulses/rev
Serial communication interface (SIO port)			RS485: 1CH (Modbus protocol RTU/ASCII compliant) Speed: 9.6~230.4Kbps 1CH (Modbus protocol RTU)
External interface			Field bus connection: DeviceNet, CC-Link, PROFIBUS-DP, EtherCAT, EtherNet/IP, PROFINET-IO. (Note) Additional gateway unit connection is required.
Data setting, input method			PC compatible software, touch panel teaching pendant
Data retention memory			Position data and parameters are saved in non-volatile memory. (No limit to rewrite)
LED display			SV (green) / ALM (red): Servo ON / Alarm triggered and emergency stop
Insulation resistance			Not less than 10MΩ at 500VDC
Electric shock protection mechanism			Class I basic insulation
Cooling method			Natural air cooling

Note1: Inrush current will flow for approximately 5msec after the power is turned on (at 40°C).
Inrush current value differs depending on the impedance on the power supply line.

<The Calculation of Number of Connectable Axes and Power Capacity>

To calculate the number of axes connectable to one gateway unit and the current amperage of 24VDC, figure out (1) to (4) below and follow (5).

(1) The Calculation of Number of Connectable Axes, and Motor Current Consumption

Condition 1: Sum of motor current consumption connectable to one hub unit: 12.8A or less

Condition 2: Number of controlled axes connectable to corresponding 1 unit: 4 axes or less

* By adjusting the number of connected axes or motor type, select the connected axes so each hub unit satisfies the formulas below.

● Sum of motor current consumption for hub unit = Motor current consumption of 1st axis + Motor current consumption of 2nd axis (if connected)
+ Motor current consumption of 3rd axis (if connected)
+ Motor current consumption of 4th axis (if connected) ≤ 12.8A ·····①

● Sum of motor current consumption = Motor current consumption of hub unit 1st unit
+ Motor current consumption of 2nd hub unit (if connected)
+ Motor current consumption of 3rd hub unit (if connected)
+ Motor current consumption of 4th hub unit (if connected) ·····②

(2) Control Power Current Consumption: 0.3A × Number of actuator + 0.6A (gateway unit) + 0.3A × Number of hub unit ·····③

(3) Inrush Current: 8.3A (RCP6S Motor type 28P, 35P, 42P, 56P, RCM-P6PC)
10A (RCP6S Motor type 56SP, 60P, RCM-P6AC, RCM-P6DC) ·····④

(4) Current Consumption of Brake Release(RCP6, RCP6S) : Number of actuators with brake × 0.7A ·····⑤

* When servo is on, it should be 0.5sec or less, after that retaining of released status should be 0.1A / axis.
When using control power and motor power in common, calculate by the number of actuators x 0.1A.

(5) Selection of Power Supply:

Usually, the rated current is to be approximately 1.2 times higher than the total of Control Power ② + ③ + ⑤ above considering approximately 20% of margin to the load current.

However, although it is for a short time, current of ④ will flow, so please take this into account and select a "peak load support" specification or select a power supply that has sufficient headroom. Avoid having all of the current from ④ from flowing at the same time by turning the servos on at different times from each other (Note 1).

If a power supply with insufficient headroom is selected, voltage may drop instantaneously. Be careful especially when selecting a power source equipped with remote sensing.

Note 1: The timing to turn the servo on can be tuned in Parameter No. 165 [Latency after Shutdown Release].

(Note) Ensure motor and control power supplies reference the same potential when using multiple power supplies.

Options

Gateway Unit (RCM-P6GW)

Features:

This unit is used in order to connect RCP6S to the field network.

Details:

- Compatible with many field networks.
  (Applicable networks: CC-Link, DeviceNet, PROFIBUS-DP, EtherCAT, EtherNet/IP, PROFINET-IO)
- Motor power and control power for all of the connected axes can be supplied through the gateway unit.
- Monitoring during AUTO is possible.
- A mini-USB connection comes standard.
- Each channel has MPO/MPI for drive source cutoff.
- Brake can be forcibly released by supplying power to the brake release input terminal for each channel. (In the case that the actuator is directly connected)
- When RCP6S is directly connected to the gateway unit, the communication time is 10msec. When RCP6S is connected to the gateway unit through the hub unit, the communication time is 40msec.
  The communication time does not become longer even if the connected axes increase.

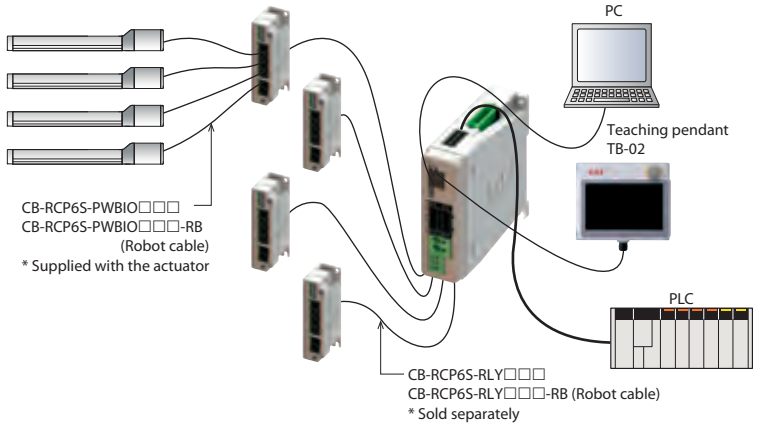
Connection Image



Up to 16 axes (*1) of RCP6S can be connected per gateway unit with hub units. (*2)
Because both the motor power and control power for all the axes connected to the gateway unit can be supplied together, the required wiring for RCP6S can be connected as one cable between the hub and RCP6S.
Also RCP6S can be directly connected to the gateway unit.

(*1) Number of connectable axes varies depending on the type of the field network. Please see "Number of connectable axes" table for details.
(*2) Hub unit: Refer to P. 275 for the details.

The Number of Connectable Axes:

Maximum connectable axes are as shown below.

	Direct value mode	Simple direct value mode	Positioner 1	Positioner 2	Positioner 3	Positioner 5
CC-Link	16	16	16	16	16	16
DeviceNet	8	16	16	16	16	16
PROFIBUS-DP	8	16	16	16	16	16
EtherCAT	8	16	16	16	16	16
EtherNet/IP	8	16	16	16	16	16
PROFINET IO	8	16	16	16	16	16

Field Network Control Operation Mode

These control modes are available to choose from when using the RCP6S via field network.
Data required for operation (target position, speed, acceleration, push current value, etc.) are written by a PLC or other host controller into the specified addresses.

Operation mode	Description	Overview
Positioner 1/ Simple direct numerical value mode (Simple direct mode)	Positioner 1 mode can store up to 768 points of position data, and can move to the stored position. Both modes allow monitoring the current position numerically with 0.01mm increments. The simple direct numerical value mode can modify any of the stored target positions by numerical value. Both modes allow monitoring the current position numerically with 0.01mm increments.	Direct numerical control mode (Direct indication/ Full mode)	This mode allows designating the target position, speed, acceleration/deceleration, and motor current percentage for pushing numerically. Also, it is capable of monitoring the current position, current speed, and the motor current command value with 0.01mm increments.	Positioner 2 mode	Positioner 2 mode can store up to 768 points of position data, and can move to the stored position. This mode does not allow monitoring of the current position. This is a mode that has less in/out data transfer volume than the Positioner 1 mode.	Positioner 3 mode	Positioner 3 mode can store up to 256 points of position data, and can move to the stored position. This mode does not allow monitoring of the current position. This is a mode that has less in/out data transfer volume than the Positioner 2 mode, and operates with a minimum number of signals.	Positioner 5 mode	Positioner 5 mode can store up to 16 points of position data, and can move to the stored position. This is a mode that has less position table than the Positioner 2 mode, and allows monitoring the current position numerically with 0.01mm increments.	
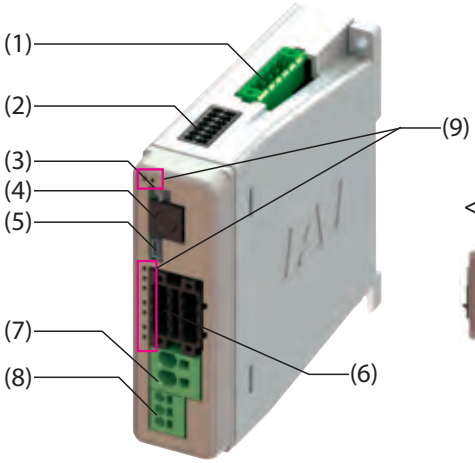
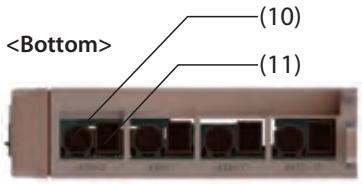
List of Functions by Operation Mode

	Simple direct value mode	Positioner 1 mode	Direct numerical control mode (Direct indication/Full mode)	Positioner 2 mode	Positioner 3 mode	Positioner 5 mode
Number of positioning points	768 points	768 points	Unlimited	768 points	256 points	16 points
Home return operation	○	○	○	○	○	○
Positioning operation	○	△	○	△	△	△
Speed, acceleration/deceleration settings	△	△	○	△	△	△
Different acceleration and deceleration settings	△	△	—	△	△	△
Pitch Feed (Incremental)	△	△	○	△	—	△
Push-motion operation	△	△	○	△	△	△
Speed changes while moving	△	△	○	△	△	△
Pausing	○	○	○	○	○	○
Zone signal output	△	△	△	△	△	△
Position zone signal output	△	△	—	△	—	—
Current position reading (Resolution)	○ (0.01mm)	○ (0.01mm)	○ (0.01mm)	—	—	○ (0.1mm)

* ○ indicates that direct setting is possible, △ indicates position data or parameter input is required, — indicates the operation is not supported.

Names and Functions of Each Part





(1) Field network connector
The connector used to connect to the field network.

(2) System I/O connector
The connector for emergency stop input, external AUTO/MANU switchover input, and brake release input in case of directly connecting RCP6S to a gateway unit.

(3) Operation mode setting switch
For switching the operation mode between automatic (AUTO) and manual (MANU).

(4) SIO connector
The connector used to connect a teaching pendant or PC software.

(5) USB connector
The connector used to connect the PC software.

(6) Drive power cut-off connector
The connector used to connect an external drive power cut-off relay to the 24VDC power supply from the motor power connector.

(7) Motor power supply connector
For 24VDC motor power supply for a gateway unit.

(8) Control power supply connector
The connector for the gateway unit 24VDC control power supply and the frame ground (FG).

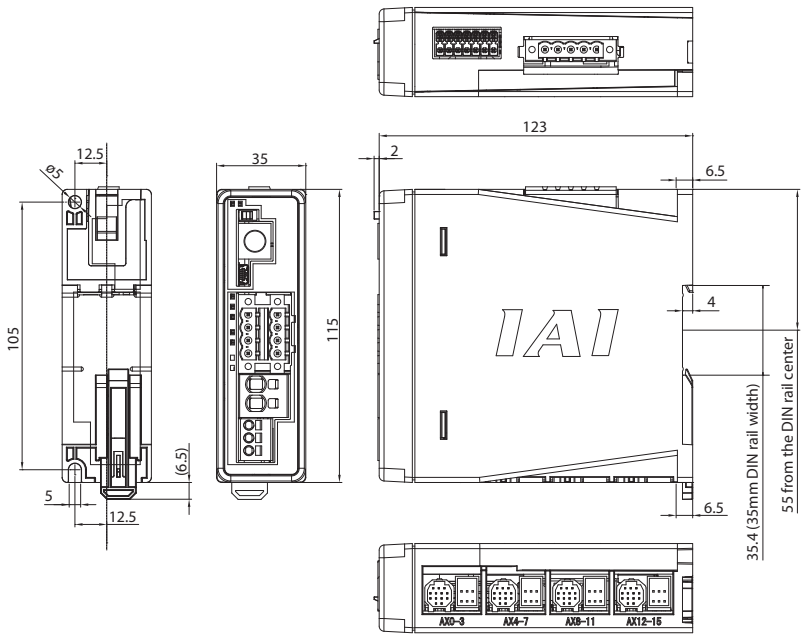
(9) Status display LED
Displays the status of the gateway unit.

Code	LED	Display color and operating status.
LED1	SYS	System status Ready (Green) Alarm (Red)
LED2	AUTO	Operation mode (AUTO/MANU) status Automatic operation mode (Green)
LED3	EMG	Emergency stop (EMG) status Emergency stop (EMG)(Red)
LED4	T. ERR	Bus communication error in the controller T.ERR (Orange)
LED5	C. ERR	Field bus network communication error C.ERR (Orange)

(10) Axis control connector
The connector used to supply power and control signals (24VDC control power, 24VDC motor power, communication line, brake release signal, emergency stop status, etc.) from the gateway unit to the hub unit or RCP6S.

(11) Axis power supply connector
The connector used to supply 24VDC motor power via gateway unit to either a RCP6S or a hub unit.

External Dimensions



Gateway Unit Basic Specifications

Specification	Description
Number of controlled axes	16 axes max. (4 axes with a single gateway unit)*1
Power supply voltage	24VDC±10%
Control power capacity	0.6A (0.3A with a single gateway unit + field bus module 0.3A)
Motor power capacity	51.2A max. from connected axes
Cooling method	Natural air cooling
Emergency stop input	B contact input
Enable input	None
T.P. enable input	Yes
Enable operation	Servo OFF
Backup memory	FRAM (256kbit), No. of overwrites: Unlimited
Calendar function	Yes (retains data for 10 days after power off)
Gateway board LED display	SYS LED × 1 (RUN/ALM), EMG LED × 1, MODE LED × 1 (AUTO/MANU), T.ERR LED × 1, C.ERR LED × 1 Field bus module status LED × 2
Tool connection	T/P connector: RS485 1ch (Modbus protocol compliant) USB connector: USB 1ch
Electromagnetic braking forced release mechanism	System I/O connector: External brake release signal input (24VDC) *Only used when an RCP6S unit is directly connected to the gateway unit. Disabled when a hub is connected.
Electric shock protection mechanism	Class 1, basic insulation
Insulation withstanding voltage	500VDC 10MΩ
Weight	250g
External dimensions	35W × 115H × 123D

*1 See P.272

Options

Hub Unit (RCM-P6HUB)

The hub unit cannot be used alone.
It must be used with a gateway unit.

Features:

The connection between gateway unit - hub unit and hub unit - RCP6S can be established using serial communication. By using a gateway unit with hub units, up to 16 axes can be controlled.

* The number of connectable axes will vary depending on the type of field networks and its mode. Please see P. 272 for the details.

Options

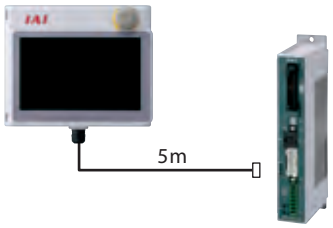
Touch panel teaching pendant

■ **Features** A teaching device equipped with functions such as position teaching, trial operation, and monitoring.

■ **Model** **TB-02-□**

■ **Configuration**



■ **Specifications**

Rated voltage	24VDC
Power consumption	3.6W or less (150mA or less)
Ambient operating temperature	0 to 40°C
Ambient operating humidity	20~85% RH (Non-condensing)
Environmental resistance	IP20
Mass	470g (TB-02 unit only)

PC compatible software (Windows only)

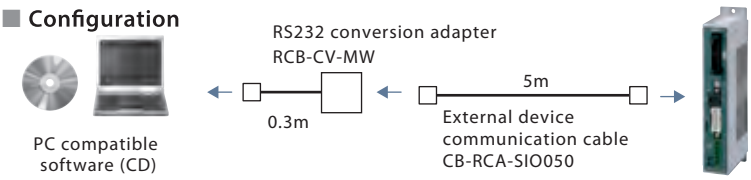
■ **Features** The start-up support software which comes equipped with functions such as position teaching, trial operation, and monitoring. A complete range of functions needed for making adjustments contributes to a reduced start-up time.

Supported Windows versions: 7/8/10

■ **Model** **RCM-101-MW** (with an external device communication cable + RS232 conversion unit)

Please contact IAI for the current supported versions.

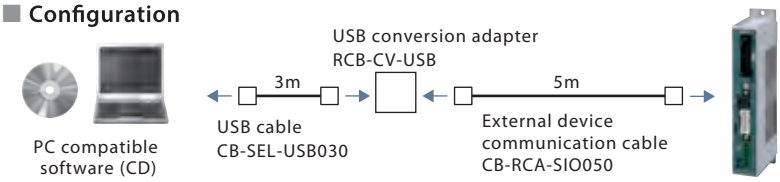
■ **Configuration**



■ **Model** **RCM-101-USB** (with an external device communication cable +USB conversion adapter + USB cable)

Please contact IAI for the current supported versions.

■ **Configuration**



Maintenance Parts

When placing an order for the replacement cable, please use the model name shown below.

*There are restrictions on the total cable length. Please check with the [Notes] on P. 270 and 278.

■ **Cable Compatibility Chart**
