Synchronous motor technology (AC) or direct current motor (DC)

- The permanent magnets built into the synchronous motor ensure a high holding torque even in a de-energized condition. (AC)
- The motor speed depends solely on the voltage frequency. Therefore a constant and load-free actuating time is ensured.

Classic shut-off system via switching cams and micro switches

- No voltage supply necessary for position indication and shut-off. Nano actuators are 100% connection compatible to ARIS actuators sold before 2014; perfectly suitable as exchange actuators.
- Tool-free adjustable aluminum switching cams allow a fast and exact actuator setup.

Mechanical data

- Robust aluminum body allows usage in rough industrial environment; high operational safety.
- Fiber-glass reinforced cover protects reliably all functional parts and serves as optimal isolation of the electric components; high operational safety.
- Captive cover screws allow a safe and easy attachment and screwing of the cover; short initial setup times.
- Variety of standard retaining bores, incl. ISO 5211, allow an easy adaption of nearly all valves without expensive mounting brackets.
- The compact design allows usage even in constricted spaces.
- Short delivery times of special adaptations by a special changeable shaft system.

Self-adjusting potentiometer

- Optional potentiometer allows a permanent feedback of the current actuator position.
- The potentiometer self-adjusts automatically to the path after setup via an integrated friction clutch.
- Several types allow an ideal utilization of the full potentiometer range:
Nano S 90°/180°/320°, Nano M 30...40 Nm 10°...150°, Nano M 50...60 Nm 10°...100°.

Options

Cam shapes

- 330° / 180°

Mechanical position indicator

- Freely adjustable

Connection set (option)

- 3x cable glands M16x1.5 (IP 65)

Options

PMR-Nano (AC)

- Power supply: 230 V $\pm$ 10%, 50/60 Hz
Special voltages/frequencies available
- Nominal value input: 0 (4) upto 20 mA (DC), optional 0 (2) upto 10 V
Burden 250 Ω , overload protection 25 mA
Reverse voltage protection up to -25 mA
Resolution 10 bit
- Actual value output: Fixed limits: 0 or 4-20 mA (Option 0 or 2-10 V)
Current sink, burden max. 500 Ω
Resolution 10 bit

Two additional auxiliary switches

- Adjustment via tool-free switching cams
- Various cam shapes allow different functions of the auxiliary switches

Service switch (Standard with DC)

- Manual/Automatic operation
- Left/Right hand rotation
- Integrated into the actuator

Current output (additional board)

- Position feedback 4–20 mA

Potentiometer

- 1 k Ω /10 k Ω
- Resolution: Nano S 90°/180°/320°, Nano M 30...40 Nm 10°...150°, Nano M 50...60 Nm 10°...100°.

Parallel relay/Single-wire control (AC)

- AC relay
- Completely wired
- Operating voltage=Motor voltage
- Parallel operation of several actuators

Heater

- For heating the actuator's interior to avoid water condensation

Type list

Type	AC		Type	DC	
	Torque [Nm]	Time [s/90°]		Torque [Nm]	Time [s/90°]
Nano S 05-03	5	3	Nano S-DC 05-03	5	3

Specifications

	AC	DC
Motor	Synchronous motor, short circuit-proof	Direct current brush motor
Protection class	IP 65 (optional IP 66)	
Ambient temperature	-15 °C...+60 °C/optional -40 °C...+80 °C (mit PMR: 0 °C...+60 °C)	
Housing	Alu die cast (EN AC-44200) untreated	
Gear	Metal	
Cover	Polycarbonate	
Shaft	1.4021	
Position indicator	optional	
Power supply	230 V AC (optional 115 V AC/24 V AC)	24 V DC ±20%
Additional switches	2 pcs (optional)	
Potentiometer	optional	
Travel	10°...330°	
Duty cycle	100%	
Connection	3 cable entries M16x1.5	
Path cutoff	Switch cams/Micro switches	
Maintenance	Lifetime lubrication (maintenance free)	
Control	3-point-step	2-wire-system

Dimensions

Nano S

ISO shaft
Internal four square
(Option)

D shaft
(Option)

Round shaft
with feather key
(Option)

Nano M

Type list

Type	AC		Type	DC	
	Torque [Nm]	Time [s/90°]		Torque [Nm]	Time [s/90°]
