Inhaltsverzeichnis / index / table des matières / indice / indice

GWS-Werkzeughalter für Querschlitten

- toolholder for cross slides
- porte-outil pour chariots transversaux
- porta-util para carros transversales
- supporto per slitta trasversale

GWS-Grundhalter / baseholder / base porte-outils / porta-util base /supporto di base **Section 1**
(AD... / AF... / AE...)

GWS-Einstelllehre für Grundhalter Querschlitten / **Section 2**
- setting device for cross-slide baseholder /
- dispositif de réglage des bases sur coulisses /
- transversaux / dispositivo de reglaje para porta-utiles base transversales /
- calibro di messa apunto per supporto di base trasversale
(VA...)

GWS-Zwischenhalter / -intermediate holder / -corps / **Section 3**
-porta-util intermedio / -supporto intermedio
(CJ... / CK... / CU...) (für / for / pour / para / per AD...)

GWS-Wechselhalter / -toolholder / -têtes porte-outils / -porta-util / -portautensile **Section 4**
(BA... / ES... / EJ... / EB... / EF... / KJ... / FH... / FE...)
(für / for / pour / para / per CJ.../ CK.../ CU... / AF... / AE...)

GWS-Wechselhalter für Flachformmeißel / **Section 5**
-changeholder for dovetail tools /
- porte-outils prismatiques /
- porta-util para cuchillas de forma /
- supporto multiuso per utensile prismatico
(PA... / PD...) (für / for / pour / para / per für AD...)

GWS-Kalibrierwerkzeughalter / -shavetool holder / -porte-outils à calibrer / **Section 6**
-porta-util calibrador / -portautensile calibratore
(TA...) (für / for / pour / para / per AD...)

GWS-Zwischenhalter für Gewinderollkopf / intermediate holder for thread rolling head / **Section 7**
-corps pour tête à rouler les filets /
-porta-util intermedio para cabezal para rodar roscas /
-supporto intermedio testa a rullo per filetto
(CQ...) (für / for / pour / para / per AD...)

GWS-Werkzeughalter für Längsschlitten/
-toolholder for main slide endworking /
-porte-outils pour chariots longitudinaux /
-porta-util para carros longitudinales /
-portautensile per slitta longitudinale

A) für Bohroperationen /for drilling / pour perçage /para operaciones de taladrado / per foratura

GWS -Schnellbohrspindeln / GWS-Bohrpinolen

Section 8

-high speed boring spindle /
-broches rotatives /
-husillo de taladrado rápido /
-mandrini di foratura ad alta velocità
(XC... / XD...)

GWS -Modular Grundhalter

Section 9

-modular baseholder /
-base perceurs modular /
-porta-util base modular /
-portautensile di base modulare
(MAF... / MAR... / MAX... / MAS.. / MAN...)

GWS-Modular Wechselhalter / -changeholder / -Têtes modular / -porta-util /

Section 10

-portautensile modulare
(MSE... / MSF... / MSF.../MWF... / B72... / MVS...)

B) für Drehoperationen / for turning / pour tournage / para torneado / per tornitura

GWS -Grundhalter /

Section 11

-baseholder (kneeturner) /
-porte-outil de base /
-porta-util base /
-portautensile di base
(AA... / AB... / AG... / AL...)

GWS -Wechselhalter / -changeholder / -porte-outil / -porta util /

Section 12

-portautensile a cambio rapido
(BA... / ES... / EJ... / EB... / EF... / KJ... / FH... / FE...)
(für / for / pour / para / per AA... / AB... / AG... / AL...)

Aufbauanleitung für GWS-Grundadapter auf Voreinstellgeräte

1. Rundschtittsch in Position fahren *(falls Voreinstellgerät mit Rundschtittsch)
2. GWS-Grundadapter aufsetzen und in ? ? -Achse mit 0.001 Meßuhr ausrichten
Achtung !!!
Zwischen Vorderkante GWS-Grundadapter und Durchlichtvorderkante sollte ein Mindestabstand von 5mm bestehen!!
3. Die vier Befestigungsschrauben 1-4 und Stiftbohrungen 5+6 abkören.
GWS-Grundadapter vom Rundschtittsch nehmen und Gewindebohrungen M10 sowie Paßbohrungen 8 H7 bohren und reiben.
Achtung !!!
Beim Voreinstellgeräte-Hersteller nachfragen, in welcher Rundschtittsch -Position gebohrt werden kann.
4. Jetzt müssen die Paßstifte Ø 8x36 DIN 7979 gesetzt werden .
Den Grundadapter wieder aufsetzen, mit vier M10x30 DIN 912 Schrauben leicht festziehen und in der ? ? -Achse mit 0.001 Meßuhr auf ± 0.002mm ausrichten.
5. Nun die vier Schrauben M10x30 DIN 912 festziehen.
Anschließend die Flucht in ? ? -Achse nochmals überprüfen und den Zwischenraum der Bohrungen zu den Paßstiften 8x36 DIN 7979 mit Kunstharz ausgießen.
*** Hinweis (das Gießharz ist nicht im Lieferumfang enthalten!!)**

Benötigtes Montagematerial

- 4x Zyl.-Schraube M10x30 DIN912
- 2x Zyl.-Stift Ø 8x36 DIN7979
- Kunstharz

MOUNTING INSTRUCTION FOR GWS BASIC ADAPTER ON PRESETTER

1. Move presetter into position
2. Place GWS adapter on presetter into position and align X-axis within 0.001mm accuracy.
ATTENTION: have at least 5mm clearance between front edge of optical light holder and front edge of GWS adapter.
3. Mark centers for mounting holes 1-4 and alignment 5&6
Remove GWS adapter from presetter and drill and tap the four M10 holes, drill and ream the two 8H7 alignment bores.
ATTENTION: check with presetter manufacturer, in which position mounting holes can be bored
4. Now insert two dowel pins 8x36 DIN 7979. Then mount GWS adapter and bolt down with four M10x30 DIN912 screws, tightening screws only lightly. Align X-axis with 0.01mm indicator within +/- 0.002mm. Then tighten four M10 DIN912 screws.
5. Check alignment again in X-axis. Then fill the gap between the bores and dowel pins with resin-epoxy.
ATTENTION: Resin-epoxy is not include in the specification!!

Assembly equipment required:

- ☞ 4x Socket Head Cap Screws M10x30 DIN912
- ☞ 2x Cylindrical Dowel Pins Ø 8x36 DIN7979
- ☞ Resin Epoxy

Mode de fixation de l'adaptateur de base GWS sur des appareils de prereglage

1. Amener le plateau de transfert en position
2. Placer l'adaptateur de base GWS et régler sur l'axe "X" avec le comparateur au 1/1000ème de mm.
ATTENTION: entre l'arête avant de l'adaptateur de base GWS et le bord avant de l'orifice de passage de la lumière, laisser au moins 5mm d'espace.
3. Ensuite pointer les percages de fixation 1 à 4 ainsi que les percages des goupilles 5+6. Prendre l'adaptateur de base GWS du plateau de transfert et réaliser les taraudages M10 ainsi que les trous de goupilles de diamètre 8H7.
ATTENTION: demander auprès du fabricant des appareils de prereglage dans quelle position du plateau on doit percer.
4. Maintenant il faut placer les goupilles de 8x36 Din 7979. Replacer l'adaptateur de base, serrer légèrement avec les 4 vis M10x30 DIN912 et régler sur l'axe "X" avec le comparateur au 1/1000 à $\pm 0.002\text{mm}$.
5. Enfin, vérifier encore une fois l'alignement dans l'axe "X" et boucher l'espace entre le trou et la goupille 8x36 DIN7979 avec de la résine artificielle.

Matériel nécessaire à la pose

- 4x vis cylindriques, diamètre M10x30 DIN912
- 2x vis tiges cylindriques, diamètre Ø 8x36 DIN7979
- Resin artificielle

Guida di montaggio per adattatori di base GWS sudispositivi di impostazione

1. Posizionare la tavola circolare orientabile (se corredato con)
2. Posizionare adattatore GWS e allineare con comparatore l'asse X con una precisione di 0,001 mm
Attenzione: garantire una distanza minima di 5 mm tra il lato frontale dell'adattatore GWS e il lato frontale della linea ottica
3. Punzonare i quattro fori per le viti di fissaggio 1-4 e i fori per spina 5-6
Estrarre l'adattatore GWS dalla tavola circolare orientabile, filettare i fori M10 e alesare i fori di accoppiamento 8H7.
Attenzione: chiedere al produttore del dispositivo di preimpostazione, dove forare la tavola di preimpostazione orientabile.
4. Inserire le spine di accoppiamento 8 x 36 DIN 7979.
Riposizionare l'adattatore GWS, serrare solo leggermente le quattro viti M10 x 30 DIN 912 e allineare con il comparatore l'asse X con 0,001 mm +/- 0,002 mm.
Infine serrare le quattro viti M10 DIN 912.
5. Verificare l'allineamento sull'asse X e colare con resina epossidica lo spazio intermedio tra i fori e le spine di assestamento 8 x 36 DIN 7979.
Nota: la resina epossidica non è compresa nella fornitura.

Materiale di montaggio richiesto

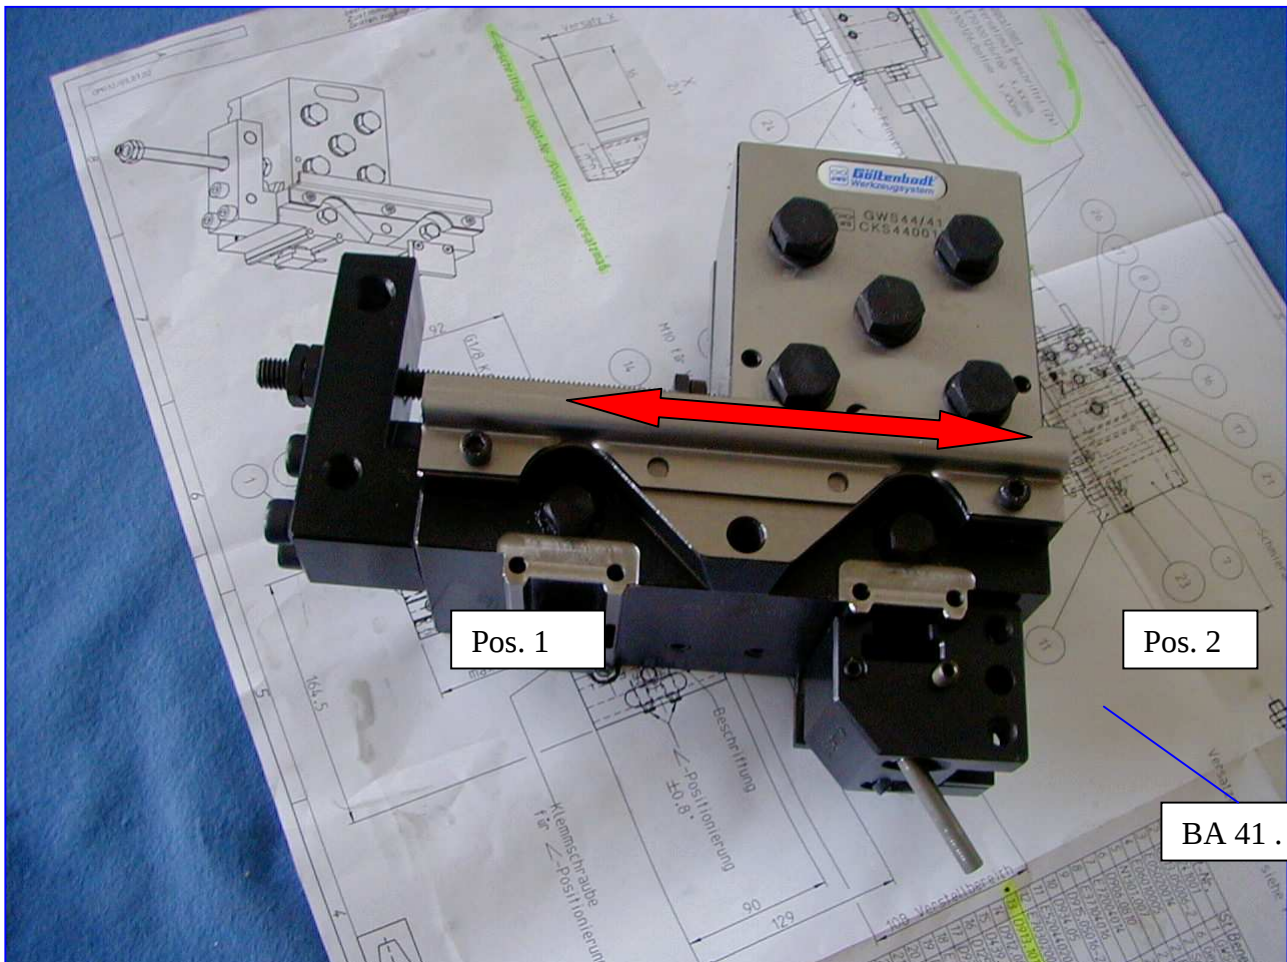

- 4x Socket Head Cap Screws M10x30 DIN912
- 2x Cylindrical Dowel Pins Ø 8x36 DIN7979
- Resin Epoxy
