

CYLINDERS WITH INTEGRATED GUIDE

SERIES QC

Double-acting, magnetic piston, guided
 ø 20, 25, 32, 40, 50, 63 mm

- Magnetic sensors can be mounted on both sides.
- Series QCT:
 - Bronze bushings version.
- Series QCB:
 - Ball bearing guide version.
- Movement and guidance in one unit.

These actuators, suitable for use in very limited space, are available in two versions.

- QCT version: with sintered bronze bushes, suitable when the side loads applied to the cylinder are high.
- QCB version: with linear ball bearings, suitable for high precision and fast cycling applications.

Both versions are equipped with fixed cushioning to prevent direct impact with the end covers.

The design of the cylinder body allows the mounting of the cylinder using either top, bottom or side faces.

Several "T" shaped grooves in two faces allow sensors to be fitted in a number of positions.

Out of standard strokes are available on demand only.

GENERAL DATA

Type of construction	Compact guided QCT = sintered bronze bushes QCB = linear ball bearings
Operation	Double-acting
Materials	Body = anodized AL Flange = zinc-plated steel Piston rod = rolled stainless steel AISI 303 QCT columns = rolled stainless steel 420B QCB columns = hardened steel C50 Seals = PU
Mounting	Threaded and non-threaded holes in the body
Strokes min. max	(see table)
Operating temperature	0°C ÷ 80°C (with dry air - 20°C)
Speed	50 ÷ 500 mm/s
Operating pressure	1 ÷ 10 bar
Fluid	Clean air, non lubricated. If lubricated air is used, it is recommended to use oil ISOVG32. Once applied the lubrication should never be interrupted.
