“Simplicity is the most difficult thing to secure in this world:
it is the last limit of experience and the last effort of genius”

George Sand

AIREKA

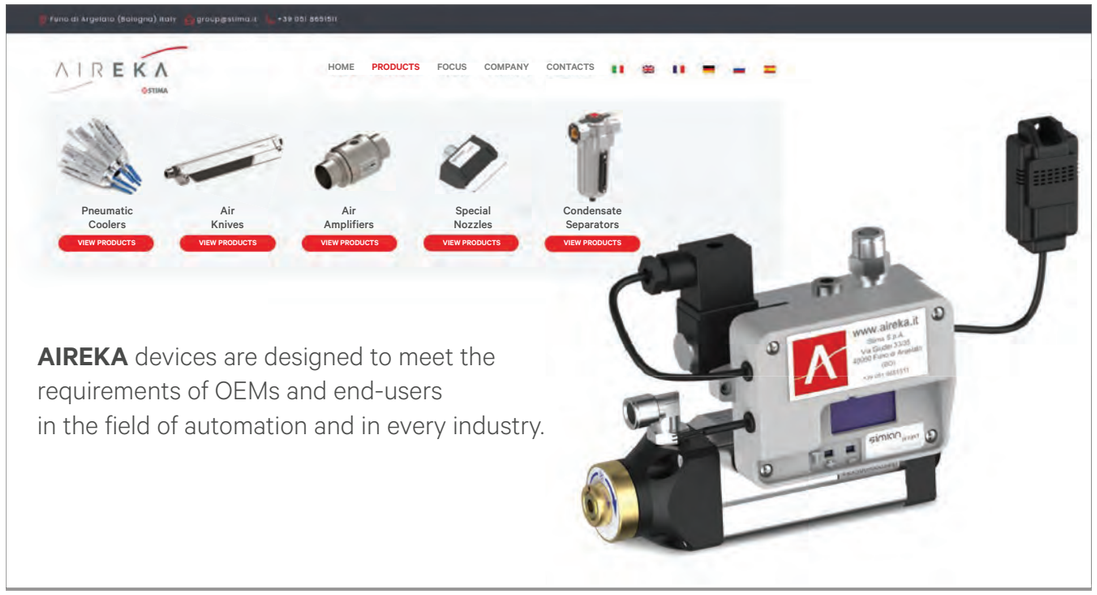
WHY AIREKA

AIREKA is the new brand under which Stima S.p.A. has decided to gather a series of diverse products that share the common feature of being simple and yet innovative solutions to long-standing and complex issues, for which we believe the market does not offer adequate answers. The simplicity is the result of creative work, know-how, and extensive experience that the designers instilled in these products. So, special features make them one-of-a-kind.
Always with a great focus on customers' demands.

Simian Project S.r.l. was started in 2007 as a result of the business flair and experience of Leonardo Lombardi as a designer in the automotive and packaging industries. Creativity, dynamism, and efficiency are the qualities that characterise both the products and the work methods of the company, by offering customers tailor-made solutions with quick turnaround time and high added value.
Made in italy

TABLE OF CONTENTS

WHY CHOOSE AIREKA DEVICES



AIREKA devices are designed to meet the requirements of OEMs and end-users in the field of automation and in every industry.

They stand out in the market because of:

- Unique and innovative design;
- High performances;
- Robustness, simplicity of use, and high reliability;
- Customised versions (in dimensions and materials) easily available;
- High quality standards and scrupulous tests;
- Employ of electronics on many devices.

For more information, you can also check our website:
www.aireka.it

AIREKA

EXAMPLES OF SECTORS OF APPLICATION

PNEUMATIC COOLERS

- **MACHINE TOOLS / MACHINING**
  Cooling of machined parts and of tools: milling, turning, cutting, etc.; cooling of blades and saws, etc.
- **AUTOMATIC MACHINERY / PACKAGING**
  Cooling of control cabinets, of closing points of bags, of welding points, of glues, of foils for packaging, of control displays, of touch panels, etc.
- **COMPOSITE MATERIALS**
  Tooling, machining, etc.; carbon fibres' processing.
- **MOULDING**
  Both for plastics and metals. Cooling of moulds, sprues, and moulded parts.
- **AUTOMOTIVE**
  Cooling of plastic components.
- **FOUNDRIES**
  Cooling of moulds and workpieces.
- **PRESSES**
  Cooling of electric motors and of parts of the press itself.
- **PAPER PROCESSING**
  Cooling of blades.
- **TEXTILE**
  Cooling of needles.
- **LASER CUTTING**
- **TUBES EXTRUSION**
- **LINEAR MOTORS**.

AIR KNIVES

- **PACKAGING**
  Cleaning of parts on conveyor belts, opening of plastic bags, blowing plastic films, etc.
- **MACHINE TOOLS / MACHINING**
  To clean and dry machined parts, cleaning of machine windows, etc.
- **WOODWORKING**
  To clean panels, to blow-off chips, etc.
- **AUTOMOTIVE**
  Cleaning and drying of vehicles' bodies before finishing.
- **FINISHING**
  Drying of surfaces before painting.
- **FOODSTUFFS**
- Drying of bottles after filling, to clean vegetables, to clean photocells and optical sensors.
- **PAPER PROCESSING**
  Sheeting, browsing of foils, to remove scraps, etc.
- **TILES / CERAMICS**
  To dry and clean tiles.
- **INDUSTRIAL LAUNDERING**
  To dry parts.

AIR AMPLIFIERS

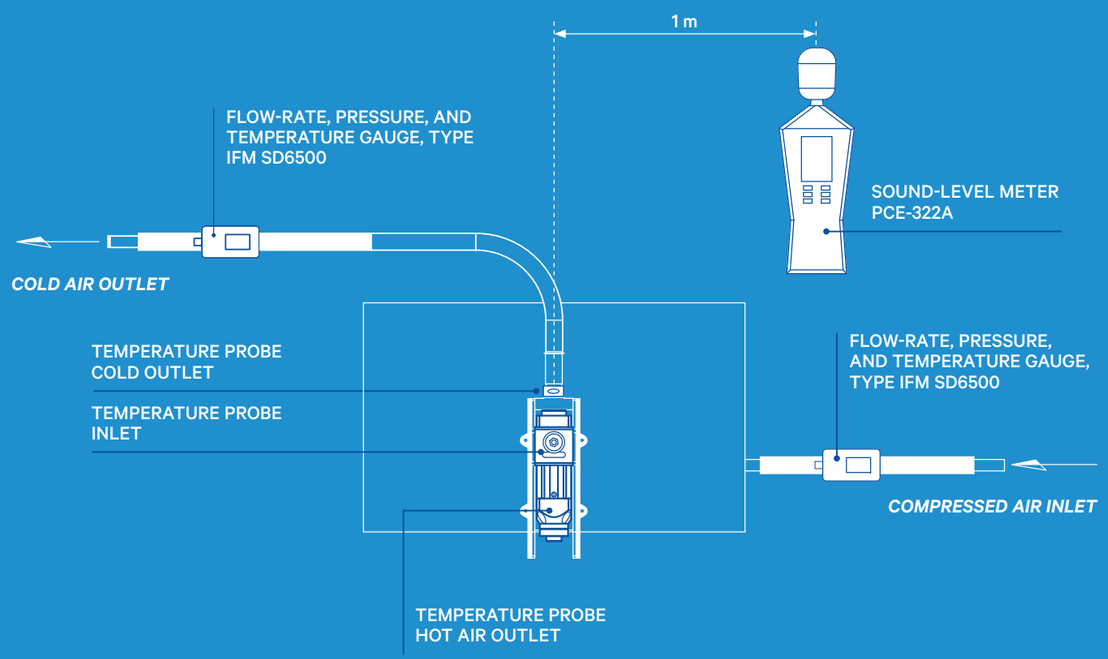
- **PACKAGING / AUTOMATIC MACHINERY**
  To convey granules, tobacco, coffee powder, etc., to either blow-off and suction shavings.
- **MACHINE TOOLS**
  To blow-off shavings and scraps, to empty tanks of emulsified water, etc.
- **WOODWORKING**
  To blow-off chips.
- **WELDING**
  Aspiration of fumes and gases
- **PHARMACEUTICAL**
  Conveying of pills.
- **WIRES EXTRUSION**
  To clean the wire.
- **3D PRINTERS**
  Conveying of plastic granules.

SPECIAL NOZZLES

- **DEVICES FOR BLOW-OFF AND CLEANING**
  Automatic machinery, metal processing, plastic industry, woodworking, ceramic, marble processing.

AIREKA

Description of the set-up and instrumentation used for our tests on pneumatic coolers.



The **VR / VRX / VR U-G SERIES** coolers are state-of-the-art solutions for compressed-air cooling based on the principle of the Vortex Tube.
The excellent performances of flow-rate and ΔT generated, the design, the fastenings that make them extremely versatile to mount, and the possibility to combine them in a patented system with the air amplifiers (to use the hot air flow), offer customers an innovative, effective, and inexpensive solution to cool down metal and plastic parts, electric and electronic control cabinets, and mechanical applications. All this with a simple connection to the compressed-air line.

- ΔT up to -40°C for the cold flow and +60°C for the hot flow, in comparison to the temperature of air at inlet
- Easy to install, thanks to flanges and magnetic supports
- Patented system of hot air's recovery to actuate an amplifier/conveyor
- Made of corrosion-resistant materials
- No moving part, so not subject to wear and tear
- No electricity or chemical substances required
- They do not cause either sparkles or interferences
- Instant operation
- Reliable and maintenance-free

Ranque-Hilsch tube (Vortex tube)

DESCRIPTION OF VORTEX TUBES

The Ranque-Hilsch tube, in the industrial sector better known as “Vortex tube”, is a device that splits a compressed-air flow in 2 separate streams: one of cold air, and one of hot air.

The core of the system is the vortex chamber, which is connected to 2 opposed tubes, one of which features a valve. When the compressed air is injected tangentially in the chamber, this causes the rotary movement of air towards one of the exits. This vortex moves rotating at high speed and brushing against the inner side of the tube, increasing in temperature; the valve placed at the hot air outlet enables some of it to be exhausted. The remaining part goes back, creating a low pressure vortex moving towards the other exit and giving away heat to the first vortex. So, this flow is much colder.

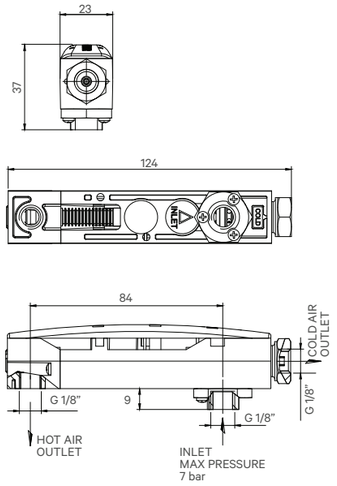
The ΔT generated is inversely proportional to the volume of the flow.
The differences in temperature are considerable and can reach -40°C for the cold flow and 60°C for the hot flow.

In the industrial field the Vortex tubes have been employed for a long time and have found a variety of applications in which they offer a major added value.
They have great cooling performances, are very easy to install and have instant operation, have no moving part and therefore are maintenance-free. Plus, they do not require electric power, so they are suitable for dangerous environments and humid areas.

If the application enables their use, they are price-worthier than electric coolers.
Our coolers SERIES VR and VRX, beside the excellent performances in comparison to the other products in the market, were designed to be easily customised according to customers’ demands.

AIREKA

SERIES VR-100
MODULAR PNEUMATIC COOLERS



GENERAL FEATURES - VR-100

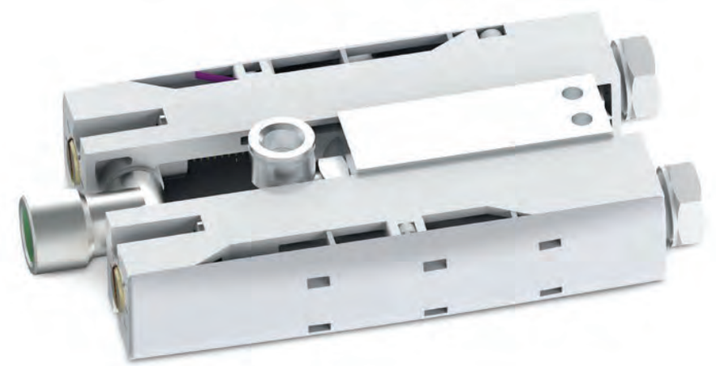
Materials	Body and cover: Nylon 6.6
	Air connections and nozzles: brass
Air inlet port	G-1/8" F
Outlet port (cold flow)	G-1/8" F
Exhaust port (hot flow)	G-1/8" F
Recommended hose	Ø-8x1
Air supply pressure	3 ÷ 7 bar
Cooling power*	120 W - 100 Kcal/h - 400 BTUH
Optional magnetic support	KACM-VR100

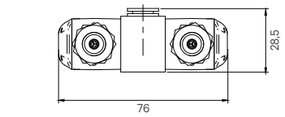
*with inlet pressure 7 Bar and inlet temperature 20°C

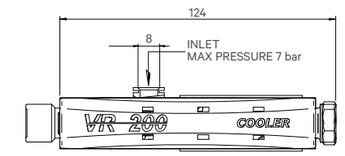
PERFORMANCES AND CONSUMPTION TABLE (with air temperature at inlet 20°C)

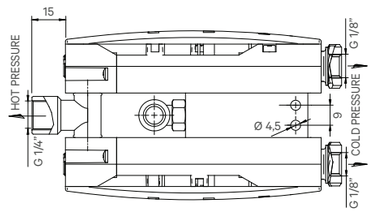
Pressure bar	Outlet temperature cold flow °C	Consumption NL/min
1	-1.5	32
2	-8	53
3	-15	74
4	-21,5	94
5	-24,5	115
6	-26,5	135
7	-28	154

SERIES VR-200
MODULAR PNEUMATIC COOLERS









GENERAL FEATURES - VR-200

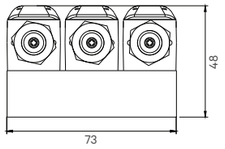
Materials	Body and cover: Nylon 6.6
	Air connections and nozzles: brass
Air inlet port	Push-in fitting Ø-8x6
Outlet port (cold flow)	2 x G-1/8" F
Exhaust port (hot flow)	2 x G-1/8" F
Recommended hose	Ø-8x1
Air supply pressure	3 ÷ 7 bar
Cooling power*	240 W - 200 Kcal/h - 800 BTUH
Optional magnetic support	KACM-VR200

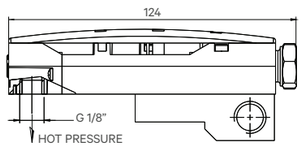
*with inlet pressure 7 Bar and inlet temperature 20°C

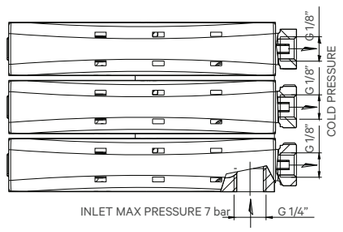
PERFORMANCES AND CONSUMPTION TABLE (with air temperature at inlet 20°C)

Pressure bar	Outlet temperature cold flow °C	Consumption NL/min
1	-1,5	64
2	-8	106
3	-15	148
4	-21,5	196
5	-24,5	230
6	-26,5	270
7	-28	308

SERIES VR-300T • 3 OUTLETS
MODULAR PNEUMATIC COOLERS







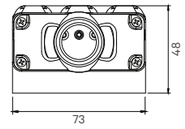
GENERAL FEATURES - VR-300T	
Materials	Body and cover: Nylon 6.6 Air connections and nozzles: brass
Air inlet port	G-1/4" F
Outlet port (cold flow)	3 x G-1/8" F
Exhaust port (hot flow)	3 x G-1/8" F
Recommended hose	Ø-8x1
Air supply pressure	1 ÷ 7 bar
Cooling power*	360 W - 300 Kcal/h - 1200 BTUH
Optional magnetic support	KACM-VR300

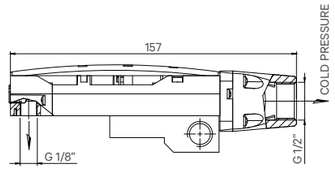
*with inlet pressure 7 Bar and inlet temperature 20°C

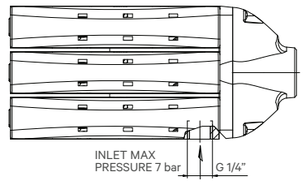
PERFORMANCES AND CONSUMPTION TABLE (with air temperature at inlet 20°C)

Pressure bar	Outlet temperature cold flow °C	Consumption NL/min
1	-1,5	96
2	-8	159
3	-15	222
4	-21,5	282
5	-24,5	345
6	-26,5	405
7	-28	462

SERIES VR-300U • SINGLE OUTLET
MODULAR PNEUMATIC COOLERS







GENERAL FEATURES - VR-300U	
Materials	Body and cover: Nylon 6.6 Air connections and nozzles: brass
Air inlet port	G-1/4" F
Outlet port (cold flow)	1 x G-1/2" F
Exhaust port (hot flow)	3 x G-1/8" F
Recommended hose	Ø-8x1
Air supply pressure	3 ÷ 7 bar
Cooling power*	360 W - 300 Kcal/h - 1200 BTUH
Optional magnetic support	KACM-VR300

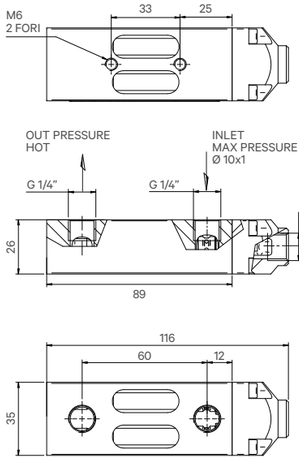
*with inlet pressure 7 Bar and inlet temperature 20°C

PERFORMANCES AND CONSUMPTION TABLE (with air temperature at inlet 20°C)

Pressure bar	Outlet temperature cold flow °C	Consumption NL/min
1	-1,5	96
2	-8	159
3	-15	222
4	-21,5	282
5	-24,5	345
6	-26,5	405
7	-28	462

SERIES VR-200U • SINGLE OUTLET

HIGH-PERFORMANCE COMPACT PNEUMATIC COOLERS



*Test made with insulated LOC-LINE flexible tube at cold outlet, and tube L= 1 m at hot air outlet.

GENERAL FEATURES - VR-200U

Materials	Body and cover: Delrin Ports and nozzles: Brass
Air inlet port	G-1/4" F
Outlet port (cold flow)	G-1/4" F
Exhaust port (hot flow)	G-1/4" F
Recommended hose	Ø-8x1
Air supply pressure	max 7 bar
Cooling power*	264 W - 220 Kcal/h - 880 BTUH
Optional magnetic support	By means of 2 threads M6 on the body
Weight	210 g

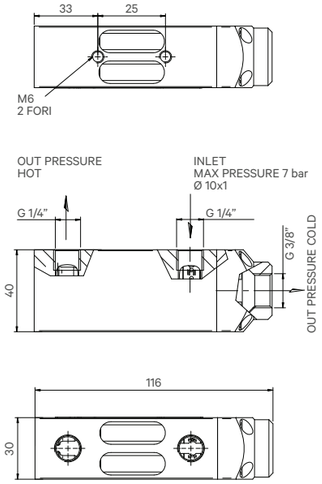
* With inlet pressure 7 Bar and inlet temperature 20°C.

PERFORMANCES AND CONSUMPTION TABLE (with air temperature at inlet 20°C)

Pressure bar	Outlet temperature cold flow °C	Consumption NL/min	Noise level* dBA
1	-2	64	50
2	-12	106	54
3	-18	148	58
4	-23	188	61
5	-26	230	65
6	-28	270	68
7	-31	308	70

SERIES VR-400U • SINGLE OUTLET

HIGH-PERFORMANCE COMPACT PNEUMATIC COOLERS



*Test made with insulated LOC-LINE flexible tube at cold outlet, and tube L= 1 m at hot air outlet.

GENERAL FEATURES - VR-400U

Materials	Body and cover: Delrin Ports and nozzles: Brass
Air inlet port	G-1/4" F
Exhaust port (hot flow)	G-1/4" F
Recommended hose	Ø-10x1
Supply pressure	max 7 bar
Cooling power*	528 W - 440 Kcal/h - 1760 BTUH
Optional fixation of magnetic kit	By means of 2 threads M6 on body
Weight	285 g

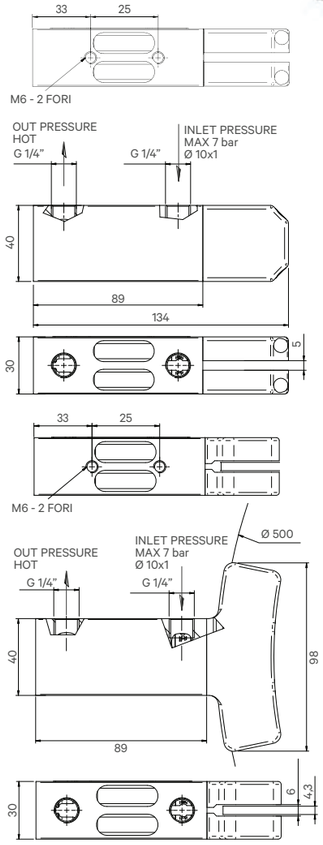
* With inlet pressure 7 Bar and inlet temperature 20°C..

PERFORMANCES AND CONSUMPTION TABLE (with air temperature at inlet 20°C)

Pressure bar	Outlet temperature cold flow °C	Consumption NL/min	Noise level* dBA
1	-2	128	55
2	-12	212	60
3	-18	296	64
4	-23	376	67
5	-26	460	70
6	-28	540	71
7	-31	616	73

SERIES VR-400G • TO COOL DOWN BLADES, BELTS, AND BANDS

HIGH-PERFORMANCE COMPACT PNEUMATIC COOLERS



GENERAL FEATURES - VR-400G

Materials	Body: Derlin Clamps: ABS (other materials on request) Inner spindles: brass
Air inlet port	G-1/4" F
Clamps width (cold flow)	5 mm (customised dimensions on request)
Outlet port (hot flow)	G-1/4" F
Recommended hose	Ø-10x1
Air supply pressure	max 7 bar
Cooling power*	528 W - 440 Kcal/h - 1760 BTUH
Fixation	By means of two M6 threads on body
Weight	340 g

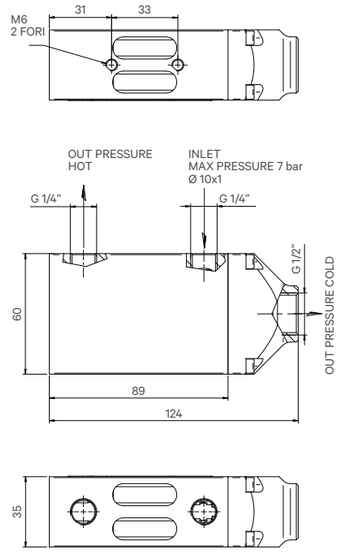
* With inlet pressure 7 Bar and inlet temperature 20°C..

PERFORMANCES AND CONSUMPTION TABLE (with air temperature at inlet 20°C)

Pressure bar	Outlet temperature cold flow °C	Consumption NL/min
1	-2	128
2	-12	212
3	-18	296
4	-23	376
5	-26	460
6	-28	540
7	-31	616

SERIES VR-600U • SINGLE OUTLET

HIGH-PERFORMANCE COMPACT PNEUMATIC COOLERS



*Test made with insulated LOC-LINE flexible tube at cold outlet, and tube L= 1 m at hot air outlet.

GENERAL FEATURES - VR-600U

Materials	Body: Derlin Ports and nozzles: Brass
Air inlet port	G-1/4" F
Clamps width (cold flow)	G-1/2" F
Outlet port (hot flow)	G-1/4" F
Recommended hose	Ø-10x1
Air supply pressure	max 7 bar
Cooling power*	720 W - 600 Kcal/h - 2400 BTUH
Fixation	By means of two M6 threads on body
Weight	460 g

* With inlet pressure 7 Bar and inlet temperature 20°C..

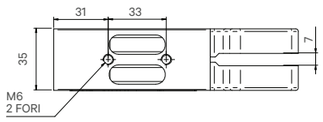
PERFORMANCES AND CONSUMPTION TABLE (with air temperature at inlet 20°C)

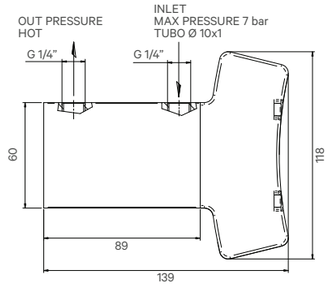
Pressure bar	Outlet temperature cold flow °C	Consumption NL/min	Noise level* dBA
1	-2	192	58
2	-12	318	64
3	-18	444	68
4	-23	564	72
5	-26	690	75
6	-28	810	78
7	-31	924	80

SERIES VR-600G • TO COOL DOWN BLADES, BELTS, AND BANDS

HIGH-PERFORMANCE COMPACT PNEUMATIC COOLERS

SPECIAL VERSION FEATURING INLET
FOR MINIMAL LUBRICATION





GENERAL FEATURES- VR-600G

Materials	Body: Derlin
	Clamps: ABS (other materials on request)
	Inner spindles: Brass
Air inlet port	G-1/4" F
Clamps width (cold flow)	11 mm (customised dimensions on request)
Outlet port (hot flow)	G-1/4" F
Recommended hose	Ø-10x1
Air supply pressure	max 7 bar
Cooling power*	790 W - 660 Kcal/h - 2640 BTUH
Fixation	By means of two M6 threads on body
Weight	540 g

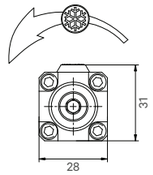
* With inlet pressure 7 Bar and inlet temperature 20°C..

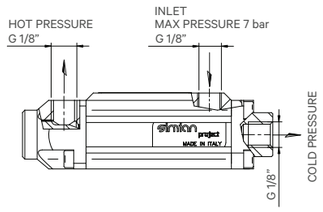
PERFORMANCES AND CONSUMPTION TABLE (with air temperature at inlet 20°C)

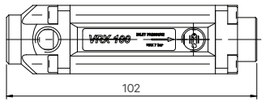
Pressure bar	Outlet temperature cold flow °C	Consumption NL/min
1	-2	192
2	-12	318
3	-18	444
4	-23	564
5	-26	690
6	-28	810
7	-31	924

SERIES VRX-100

HIGH-PERFORMANCE PNEUMATIC COOLERS







*Test made with insulated LOC-LINE flexible tube at cold outlet, and tube L= 1 m at hot air outlet.

GENERAL FEATURES - VRX-100

Materials	Sleeve: anodized aluminium
	Ends: Nylon 6.6
Air inlet port	G-1/8" F
Outlet port (cold flow)	G-1/8" F
Exhaust port (hot flow)	G-1/8" F
Recommended hose	Ø-8x1
Air supply pressure	1 ÷ 7 bar
Cooling power*	132 W - 110 Kcal/h - 440 BTUH
Optional magnetic support	KACM-VRX-100
Weight	170 g

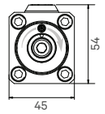
* With inlet pressure 7 Bar and inlet temperature 20°C..

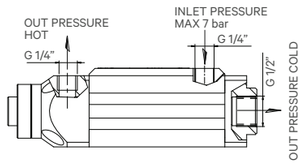
PERFORMANCES AND CONSUMPTION TABLE (with air temperature at inlet 20°C)

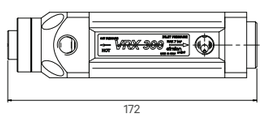
Pressure bar	Outlet temperature cold flow °C	Consumption NL/min	Noise level* dBA
1	-2	32	54
2	-12	53	58
3	-18	74	62
4	-23	94	64
5	-26	115	64
6	-28	135	66
7	-31	154	68

SERIES VRX-300

HIGH-PERFORMANCE PNEUMATIC COOLERS







*Test made with insulated LOC-LINE flexible tube at cold outlet, and tube L= 1 m at hot air outlet.

GENERAL FEATURES - **VRX-300**

Materials	Sleeve: anodized aluminium Ends: Delrin100
Air inlet port	G-1/4" F
Outlet port (cold flow)	G-1/2" F
Exhaust port (hot flow)	G-1/4" F
Recommended hose	Ø 10x1
Air supply pressure	1 ÷ 7 bar
Cooling power*	600 W - 523 Kcal/h - 2075 BTUH
Optional magnetic support	KACM-VRX500
Weight	740 g

* With inlet pressure 7 Bar and inlet temperature 20°C..

PERFORMANCES AND CONSUMPTION TABLE (with air temperature 20°C)

CONTROL UNITS XTRONIC2

1 / 2 / 3 SOLENOID VALVES

CONTROL UNIT XTRONIC2 C EV-1S/C

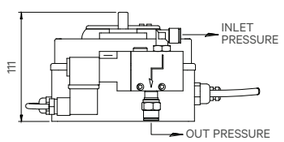
DESCRIPTION

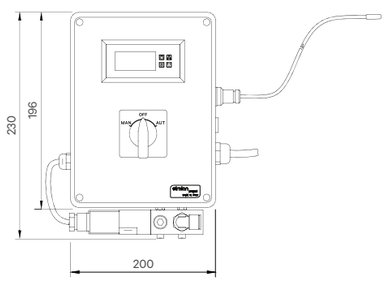
Control box featuring:

1. Switch for automatic/manual operation
2. Solenoid valve
3. Electronic kit with 7-segment display
4. Temperature probe and safety fuses (high-temperature kit available on request).

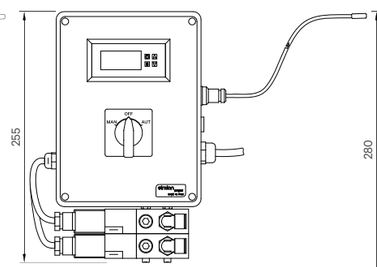
GENERAL FEATURES - XTRONIC2 (1/2/3 SOLENOID VALVES)

Supply voltage	220 V AC
Recommended hose	Ø 10x1
Supply pressure	max 7 bar
Probe length	1 m
Application	Outside of cabinets
Weight	
XTRONIC2 C-EV-1S/C (1 solenoid valve)	1300 g
XTRONIC2 C-2EV-1S/C (2 solenoid valves)	1600 g
XTRONIC2 C-3EV-1S/C (3 solenoid valves)	1900 g

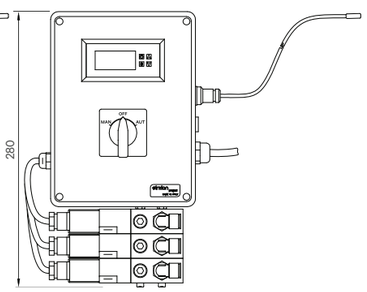




XTRONIC2 C-EV-1S/C
1 SOLENOID VALVE



XTRONIC2 C-2EV-1S/C
2 SOLENOID VALVES



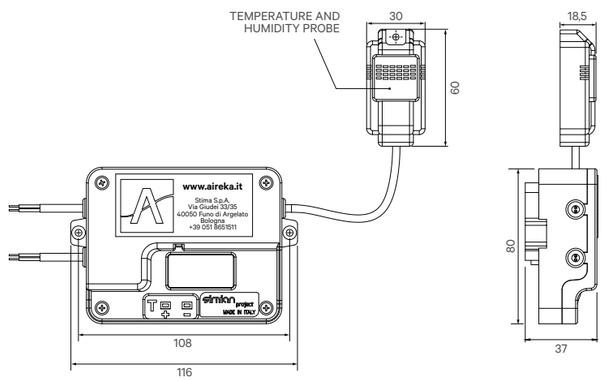
XTRONIC2 C-3EV-1S/C
3 SOLENOID VALVES

CONTROL UNITS XTRONIC 345 B

PNEUMATIC COOLERS

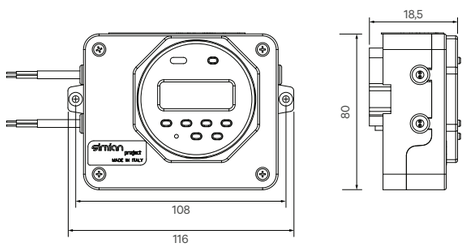
GENERAL FEATURES - XTRONIC 345 B

Supply voltage	24 V DC
Probe length	1 m
Temperature range	-20°C +60°C
Humidity range	00% 100% RH
Accuracy	0.1°C , 0.1 % RH
Current capacity	max 10 A
Coil voltage and power	24 V - 3.1 W
Electric wires' section	0.75 mm
Supply cable length	1.5 m
Application	Inside cabinets



CONTROL UNITS XTRONIC 345 T
PNEUMATIC COOLERS

GENERAL FEATURES - **XTRONIC 345 T**	
Supply	24 V DC
Probe length	1 m
Time setting	Weekly / h24
Humidity range	0% - 100% RH
Accuracy	0.1°C , 0.1 % RH
Current capacity	max 10 A
Coil power	24 V - 3.1 W
Electric wires' section	0.75 mm
Application	Inside / outside



EXAMPLES OF INSTALLATION
PNEUMATIC COOLERS

The installation of coolers in control cabinets can be of 3 types:

1. **EXTERNAL unit**
   to have the inner temperature of the cabinet displayed directly;
2. **INTERNAL unit**
   so that to have a compact solution;
3. **HYBRID systems** where the pneumatic cooler works in combination with an already existing air conditioning unit.

- Hot air
- Cold air

STAND-ALONE SERIES, VRX-100-XTRONIC

ELECTRONICALLY-CONTROLLED PNEUMATIC COOLERS

STAND-ALONE SERIES

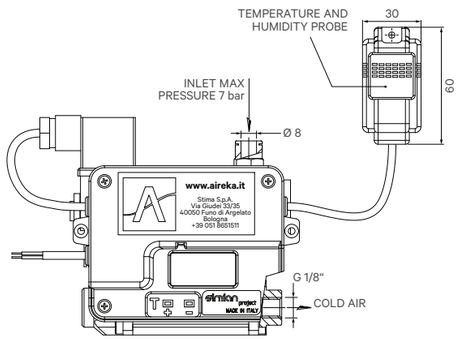
These are pneumatic coolers with temperature-control device, in a single unit.
The market increasingly demands stand-alone devices, which are able to function autonomously, based on the parameters of the ambient temperature.
Therefore, we designed and developed the **XTRONIC** temperature-control units, which are available both for remote control and installed on pneumatic coolers.

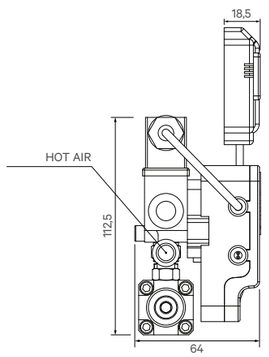
So, it will be enough to place one of these electronically-controlled devices inside the enclosure that has to be cooled, connect the pneumatic hoses and the electric wires, and set the desired temperature range on the display of the unit.

This way, the cooler will start working only when it is necessary, it will maintain the required refrigeration, and it will make it possible to save compressed air and energy.

Our **XTRONIC** control units can be customised too.

GENERAL FEATURES - VRX-100 XTRONIC	
Supply voltage	24 V DC
Recommended hose	Ø 8x1
Supply pressure	max 7 bar
Cooling power and performances	See VRX-100 (page 21)
Probe length	1 m
Temperature range	-20°C +60°C
Humidity range	00% 100% RH
Accuracy	0.1°C , 0.1 % RH
Current capacity	max 10 A
Coil voltage and power	24 V - 3.1 W
Electric wires' section	0.75 mm
Weight	760 g

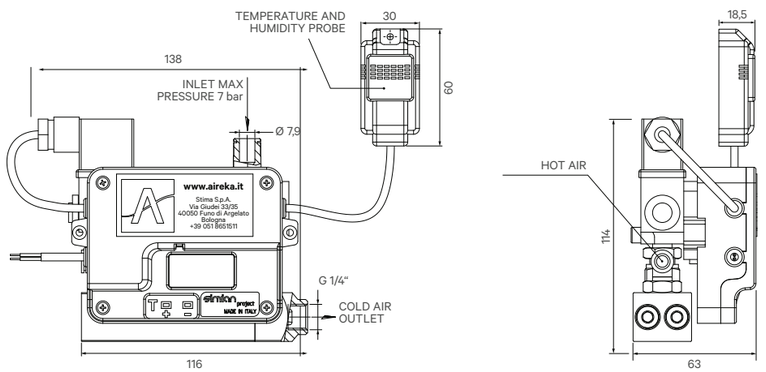




STAND-ALONE SERIES, VR-200U-XTRONIC

ELECTRONICALLY-CONTROLLED PNEUMATIC COOLERS

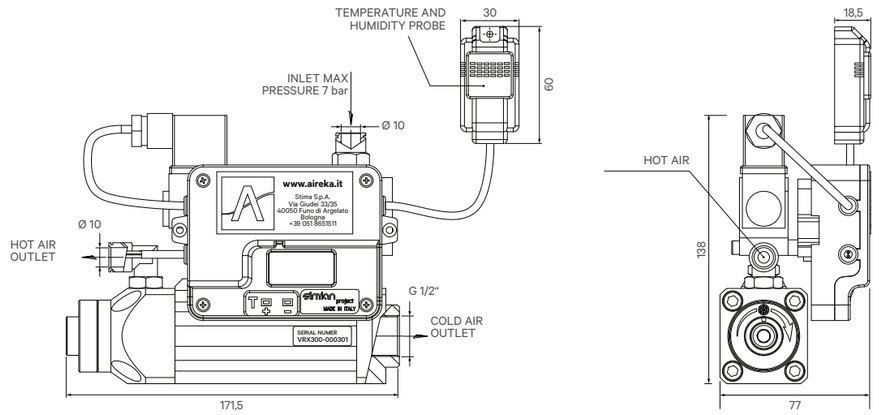
GENERAL FEATURES - **VR-200U XTRONIC**	
Supply voltage	24 V DC
Recommended hose	Ø 8x1
Supply pressure	max 7 bar
Cooling power and performances	See VR-200U (page 16)
Probe length	1 m
Temperature range	-20°C +60°C
Humidity range	00% 100% RH
Accuracy	0.1°C , 0.1 % RH
Current capacity	max 10 A
Coil voltage and power	24 V - 3.1 W
Electric wires' section	0.75 mm
Weight	770 g



STAND-ALONE SERIES, VRX-300 XTRONIC

ELECTRONICALLY-CONTROLLED PNEUMATIC COOLERS

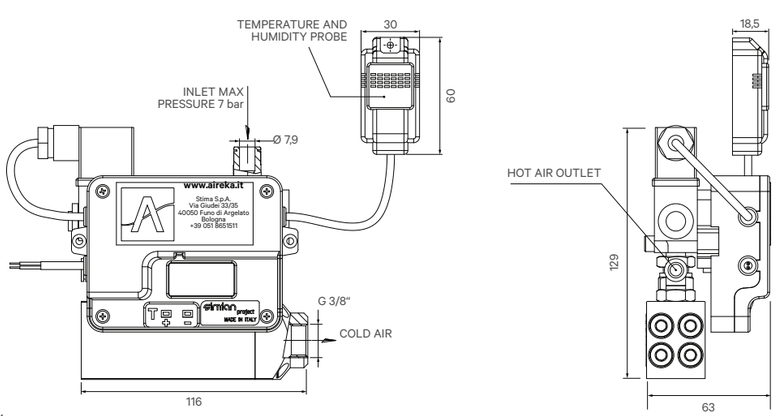
GENERAL FEATURES - **VRX-300 XTRONIC**	
Supply voltage	24 V DC
Recommended hose	Ø 10x1
Supply pressure	max 7 bar
Cooling power and performances	See VRX-300 (page 22)
Probe length	1 m
Temperature range	-20°C +60°C
Humidity range	00% 100% RH
Accuracy	0.1°C , 0.1 % RH
Current capacity	max 10 A
Coil voltage and power	24 V - 3.1W
Electric wires' section	0.75 mm
Weight	1310 g



STAND-ALONE SERIES, VR-400U-XTRONIC

ELECTRONICALLY-CONTROLLED PNEUMATIC COOLERS

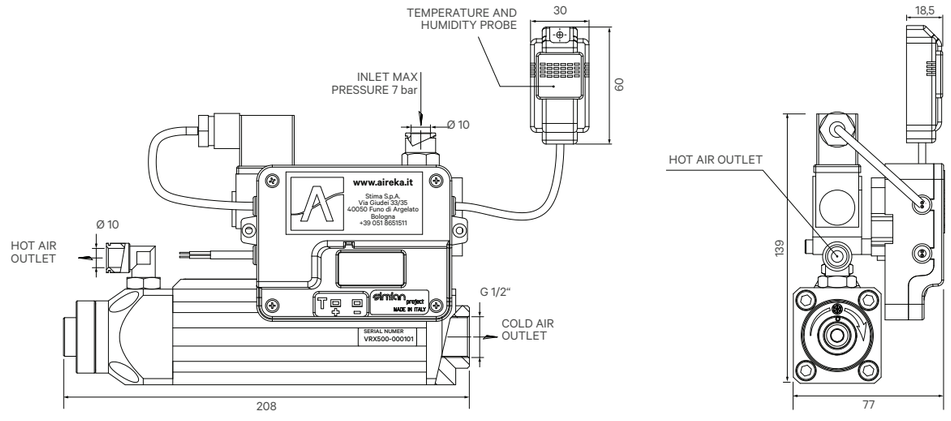
GENERAL FEATURES - **VR-400U XTRONIC**	
Power supply	24 V DC
Recommended hose	Ø 8x1
Supply pressure	max 7 bar
Cooling power and performances	See VR-400U (page 16)
Probe length	1 m
Temperature range	-20°C +60°C
Humidity range	00% 100% RH
Accuracy	0.1°C , 0.1 % RH
Current capacity	max 10 A
Coil voltage and power	24 V - 3.1 W
Electric wires' section	0.75 mm
Weight	845 g



STAND-ALONE SERIES, VRX-500 XTRONIC

ELECTRONICALLY-CONTROLLED PNEUMATIC COOLERS

GENERAL FEATURES - **VRX-500 XTRONIC**	
Supply voltage	24 V DC
Recommended hose	Ø 10x1
Supply pressure	max 7 bar
Cooling power and performances	See VR-400U (pag. 23)
Probe length	1 mt
Temperature range	-20°C +60°C
Humidity range	00% 100% RH
Accuracy	0.1°C , 0.1 % RH
Current capacity	max 10 A
Coil voltage and power	24 V - 3.1 W
Electric wires' section	0.75 mm
Weight	1430 g



STAND-ALONE SERIES VRX-1000-XTRONIC

ELECTRONICALLY-CONTROLLED PNEUMATIC COOLERS

GENERAL FEATURES - **VRX-1000 XTRONIC**	
Power supply	24 V DC
Recommended hose	Ø 12x1
Supply pressure	Max 7 bar
Cooling power and performances	Vedi VRX-1000 (pag. 24)
Probe length	1 m
Temperature range	-20°C +60°C
Humidity range	00% 100% RH
Accuracy	0.1°C , 0.1 % RH
Current capacity	max 10 A
Coil voltage and power	24 V - 3.1 W
Electric wires' section	0.75 mm
Weight	1630 g

COOLER AIR SAVING
PATENTED SYSTEM

The best practice in cooling down enclosures involves also a correct distribution of the cold air, after it has been produced.

To make it possible, we supply air-blowing modules, connection fittings in technopolymer, and tubes with double insulation.
All this to have zero losses of cold energy and to get the highest effectiveness in your application.

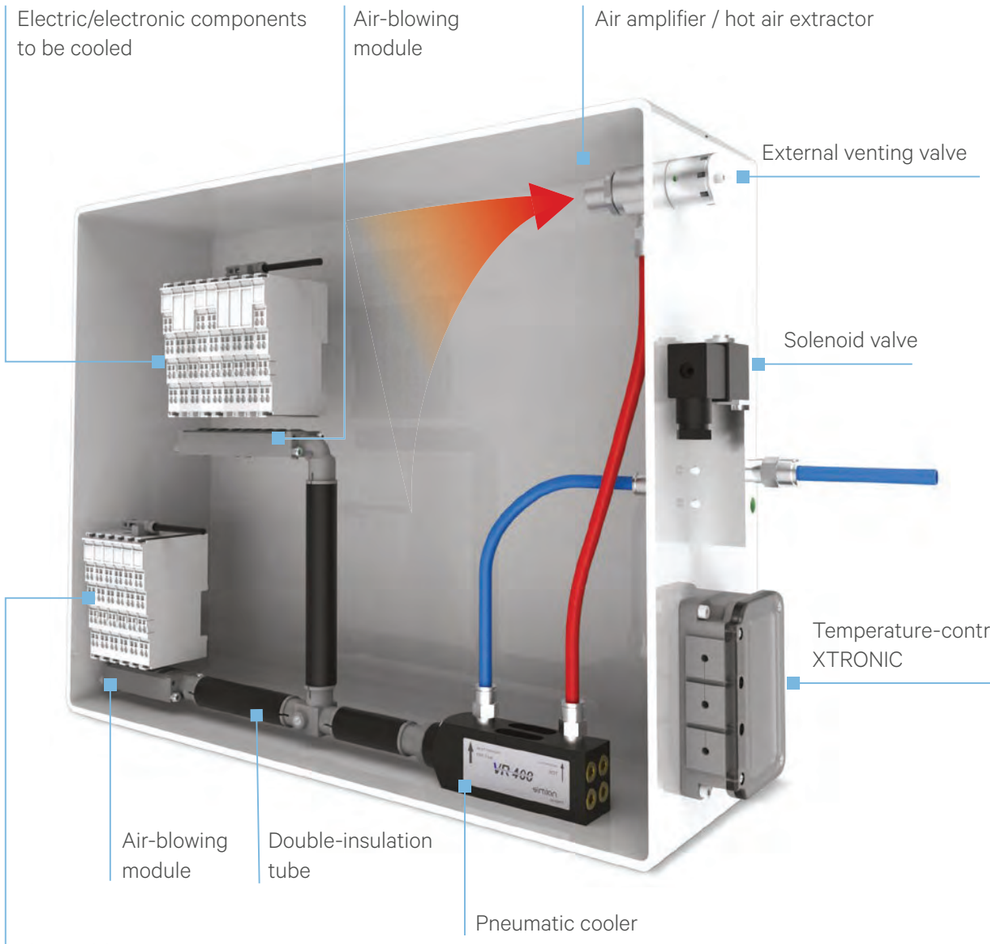
All these accessories are customisable, to meet your specific demands.

Filter against impurities, for the fixation of the hot air extractor

Fittings for cold air distribution

Customisable air-blowing module

Single air-blowing module



COOLER AIR SAVING

PATENTED SYSTEM

VR Series coolers and **AM Series** amplifiers used together to introduce cold air and extract hot air from electrical cabinets at the same time, using a single compressed air supply.

- Effective ventilation of the electrical cabinet
- Reduction of compressed air consumption
- Optimisation of cooling results

No matter how much cold air is introduced into an electrical cabinet, the effectiveness and efficiency of cooling will never be optimal unless the hot air generated by the electrical components is properly ventilated at the same time. With ventilation we mean both the creation of convection flows inside the cabinet which effectively distribute the air around the components, and the actual extraction of hot air from the cabinet itself.

By using the Cooler Air Saving patented system by Simian Project, two results are obtained: the first, using the VR Series coolers, is the prompt and precise cooling of the components that heat the cabinet the most. This thanks to the flexibility of installation (brackets and magnets) and the fact that the flow of cold air can be precisely directed on the main heat sources (by using adjustable nozzles). The second result is the proper ventilation of the electrical cabinet, thanks to the extraction power generated by the AM Series air amplifier, which is actuated by the hot air exhausted from the cooler.

The picture shows the system set up inside an electrical cabinet:

The VRX-500 cooler (fig.1) is actuated with compressed air from outside; the flow of cold air is directed, by using adjustable nozzles, on the electrical components that give off the most heat, while the exhaust of hot air is channelled by the red hose (fig. 3) to actuate the AM Series amplifier

The amplifier (fig.2) is mounted on the top right-hand side of the electrical cabinet; the pass-through installation allows it to suction and extract air from the cabinet; in the example of the picture, its position in the upper part of the cabinet ensures that the extraction occurs where most of the hot air accumulates and that even the electrical components located on the opposite side of the source of cold air remain at a temperature suitable for optimal functioning.

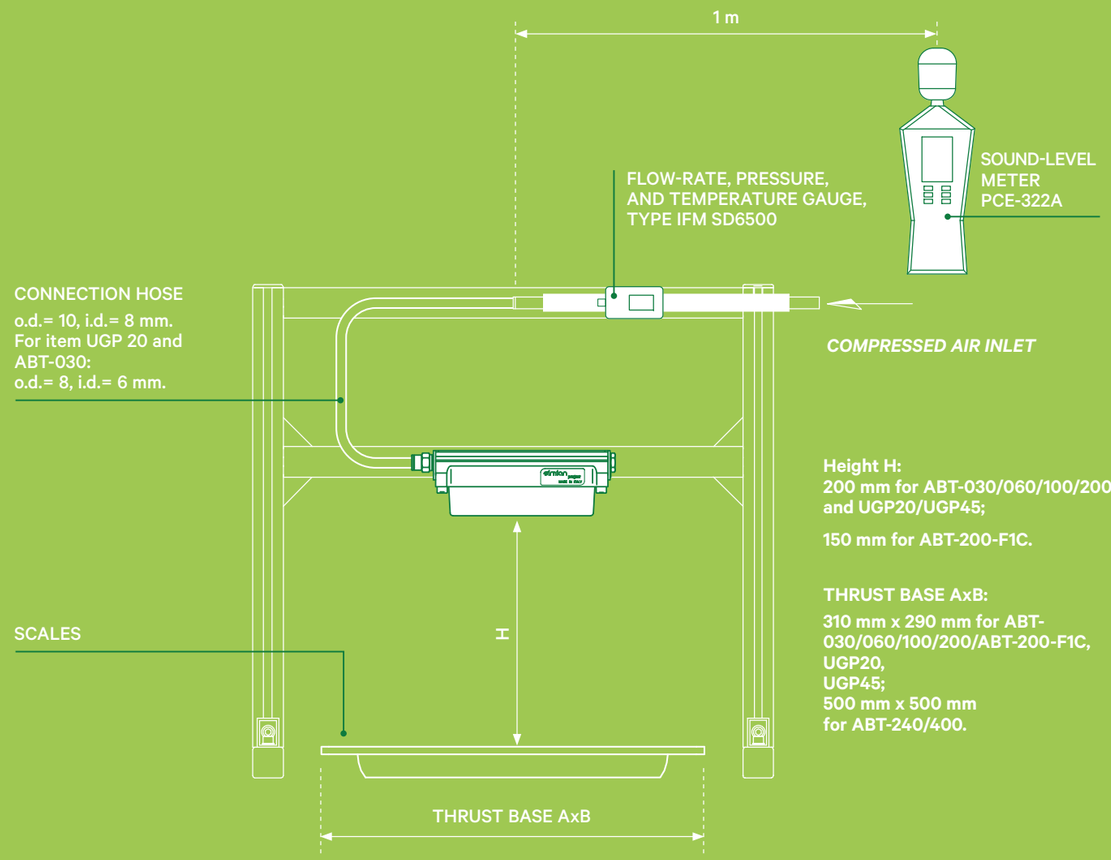
Even where pass-through mounting is not possible (for example in the event of installations in cabinets where IP protection must be guaranteed), the fitting of the amplifier inside the cabinet ensures forced recycling of air, which eliminates the concentration of hot air in the areas located furthest away from sources of cold air.

The patented system also works well together with industrial air-conditioners in electrical cabinets with the following characteristics:

- Large electrical cabinets where the cold air generated by the air-conditioner has trouble in reaching all parts of the cabinet;
- Electrical cabinets with electrical components laid out in such a way that the convection of air around the components is tricky;
- Electrical cabinets where the heat is generated by a few components that are located far from the area where the air-conditioner introduces the cold air.

N.B.: The Cooler Air Saving system works with VRX-300, VRX-500, and VRX-1000 coolers together with AM-20ES and AM-40ES amplifiers.

Description of the set-up and instrumentation used for our tests on air knives.

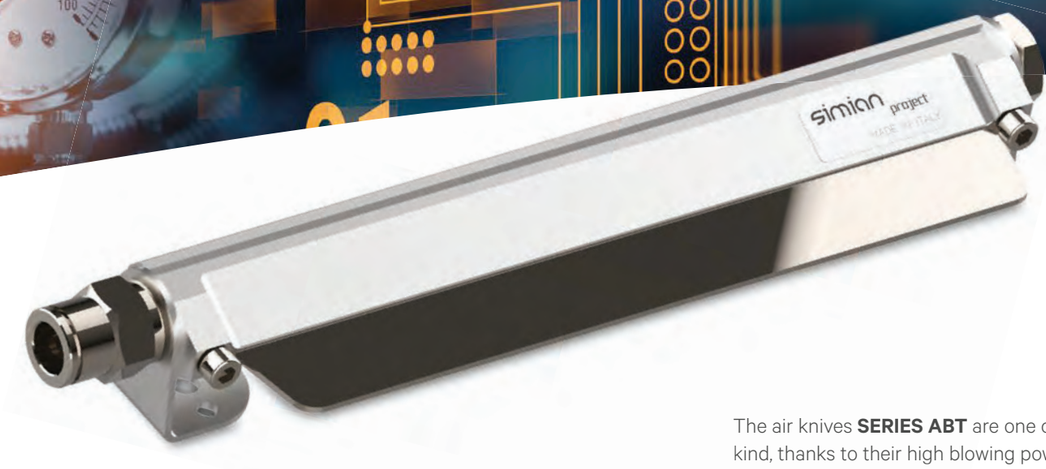


Height H:
200 mm for ABT-030/060/100/200 and UGP20/UGP45;

150 mm for ABT-200-F1C.

THRUST BASE AxB:

310 mm x 290 mm for ABT-030/060/100/200/ABT-200-F1C, UGP20, UGP45;
500 mm x 500 mm for ABT-240/400.



The air knives **SERIES ABT** are one of a kind, thanks to their high blowing power, which is a result of the air flow on both sides of the blade, and thanks to their easy installation, by means of two neodymium magnets and of brackets, which make it possible to direct the knife according to all demands. These products are very effective for cleaning, drying, and cooling.

- Design geometries optimised to maximise the Coanda effect
- Double blow-off flow (both sides of the blade)
- Powerful, uniform flow, suitable for cleaning small and large surfaces
- Modular design and possibility of customisation
- No moving parts, so maintenance-free

AIREKA

SERIES ABT-030

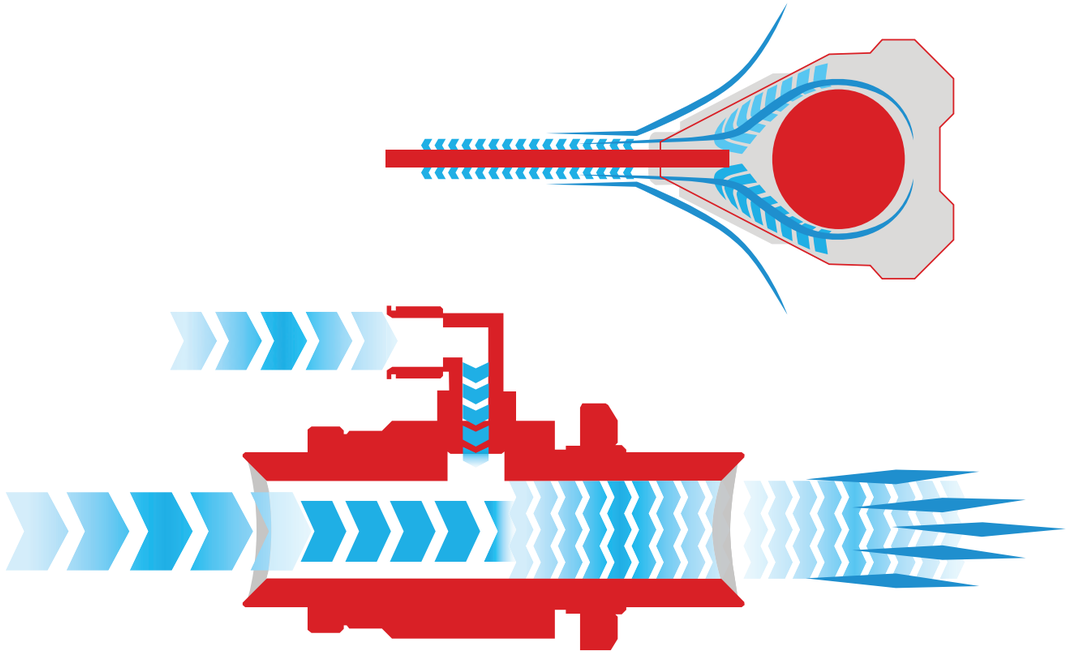
DOUBLE-SLOT AIR KNIVES

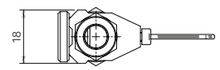
DESCRIPTION OF THE COANDA EFFECT

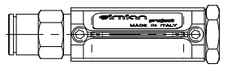
The air amplifiers and the air knives exploit the Coanda effect.

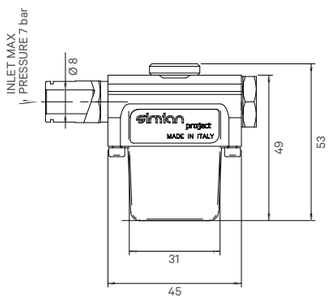
This phenomenon can be explained as the tendency of a fluid to follow the contour of a surface nearby. It is named after the pioner of aerodynamics Henri Coanda, who in 1936 patented some instruments that exploited the capacity to deviate a flow.

The compressed air introduced in an amplifier or in an air knife is forced to pass through a reduced section, from 0.02 mm to 0.08 mm, and, by lapping the surface nearby, the surrounding air is attracted towards the flow's direction, so that the volume of air becomes from 5 to 20 times bigger than it was at the inlet.









GENERAL FEATURES - ABT-030	
Materials	Anodized aluminium and AISI304 s.s.
Air supply port	Fitting Ø-8
Fixation	Optional angular bracket
Blade length	32 mm
Air supply pressure	1-7 bar
Optional magnetic support	KACM-ABT030
Weight	110 g

PERFORMANCES AND CONSUMPTION TABLE

Pressure bar	Consumption Nl/min	Thrust a 200 mm in g	Noise level dBA

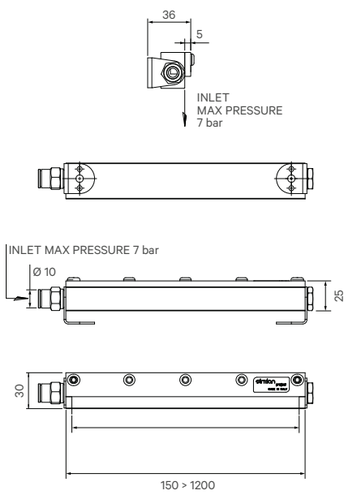
CUSTOMISED VERSIONS

On request we can supply versions customised in shape and/or material.



GENERAL FEATURES - ABT-F1C	
Materials	Aluminium and Delrin
Air supply port	Fitting Ø 10
Fixation	Integrated feet
Flow width	From 150 mm to 1200 mm
Supply pressure	max 7 bar
Noise level for every 200 mm length	Range from 62 to 82 dBA
Optional magnetic kit	KACM-ABT200

PERFORMANCE AND CONSUMPTION TABLE (For length 100 mm)

Pressure bar	Consumption Nl/min	Thrust force at 150 mm, in g
1	109	61
2	195	135
3	279	220
4	341	310
5	416	400
6	483	520
7	566	635

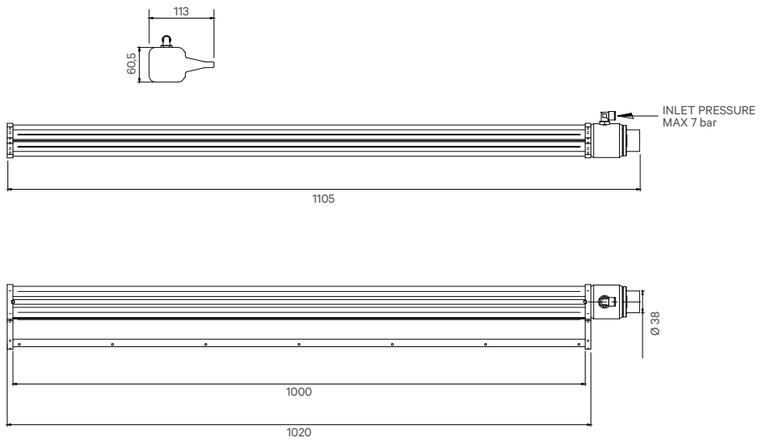
SERIES ABX-1000

LONG AIR KNIVES SUPPLIED BY AIR AMPLIFIER

GENERAL FEATURES - **ABX-1000**

Materials	Anodised aluminium / Stainless steel
Fixation	On request
Flow width	1000 mm
Supply pressure	Based on the type of air supply

On request: supply connection at 90°.



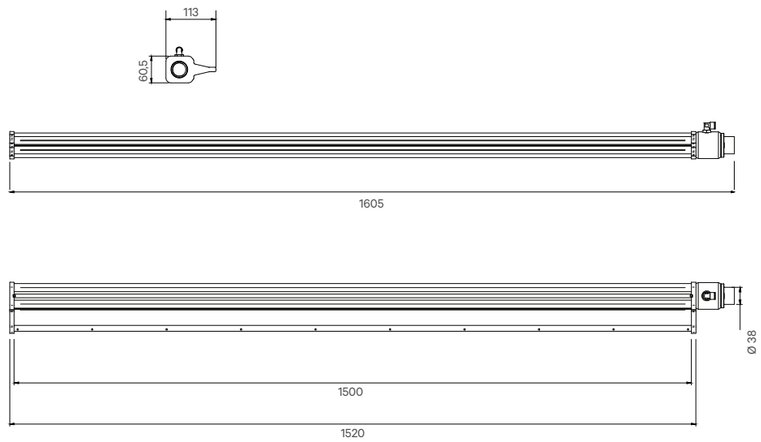
SERIES ABX-1500

LONG AIR KNIVES SUPPLIED BY AIR AMPLIFIER

GENERAL FEATURES - **ABX-1500**

Materials	Anodised aluminium / Stainless steel
Fixation	On request
Flow width	1500 mm
Supply pressure	Based on the type of air supply

On request: supply connection at 90°.



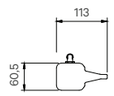
SERIES ABX-2000

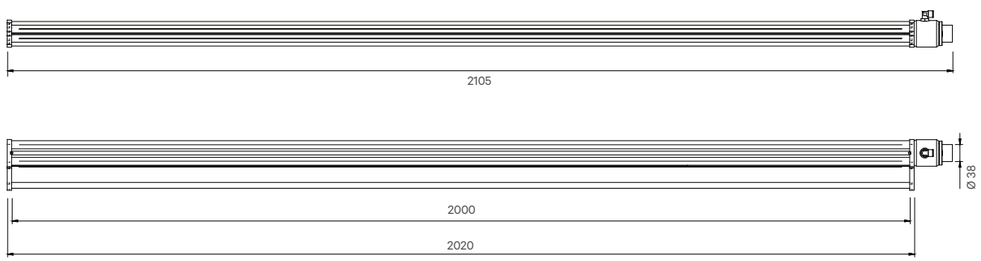
LONG AIR KNIVES SUPPLIED BY AIR AMPLIFIER

GENERAL FEATURES - **ABX-2000**

Materials	Anodised aluminium / Stainless steel
Fixation	On request
Flow width	2000 mm
Supply pressure	Based on the type of air supply

On request: supply connection at 90°.





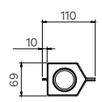
SERIES ABZ-1000

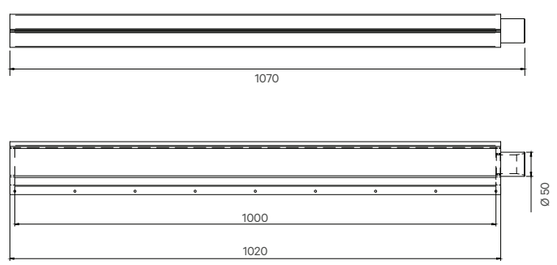
LONG AIR KNIVES TO BE SUPPLIED BY ELECTRIC BLOWER

GENERAL FEATURES - **ABZ-1000**

Materials	Zinc-plated metal sheet
Fixation	On request
Flow width	1000 mm
Supply pressure	Based on the type of air supply

On request: supply connection at 90°.





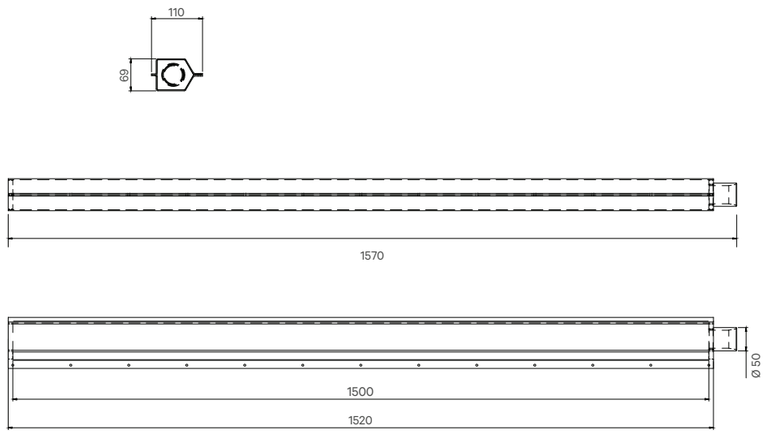
SERIES ABZ-1500

LONG AIR KNIVES TO BE SUPPLIED BY ELECTRIC BLOWER

GENERAL FEATURES - **ABZ-1500**

Materials	Zinc-plated metal sheet
Fixation	On request
Flow width	1500 mm
Supply pressure	Based on the type of air supply

On request: heated air flow.



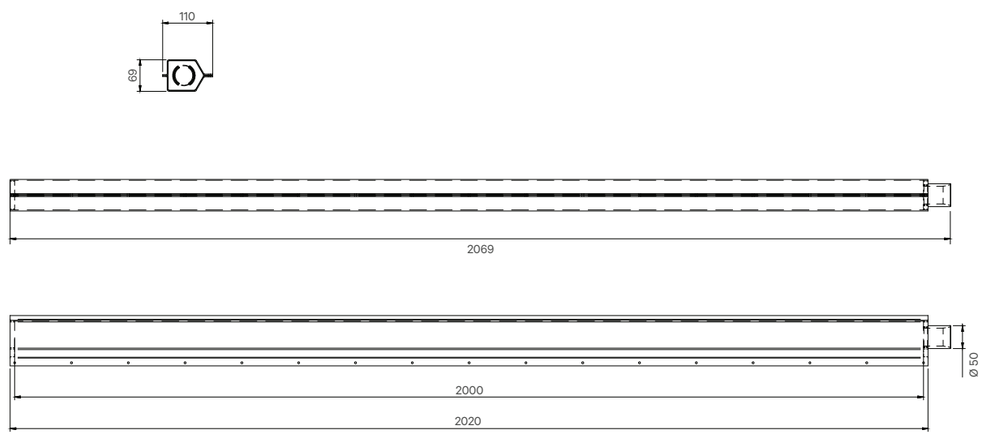
SERIES ABZ-2000

LONG AIR KNIVES TO BE SUPPLIED BY ELECTRIC BLOWER

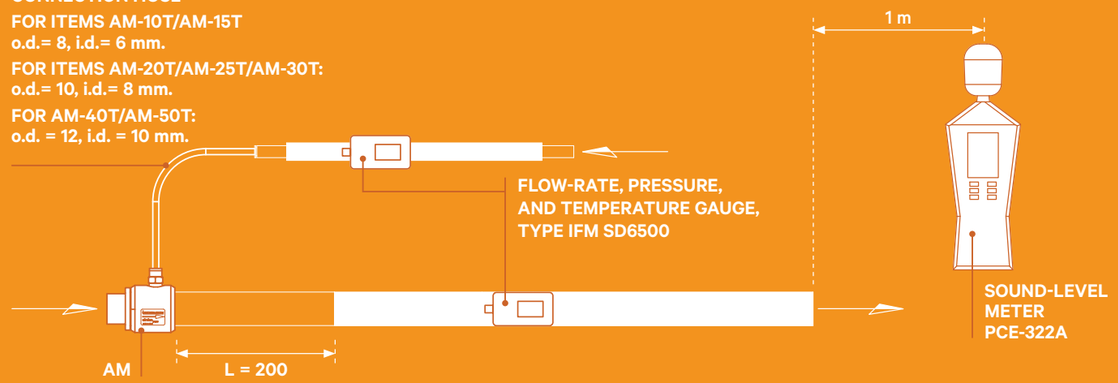
GENERAL FEATURES - **ABZ-2000**

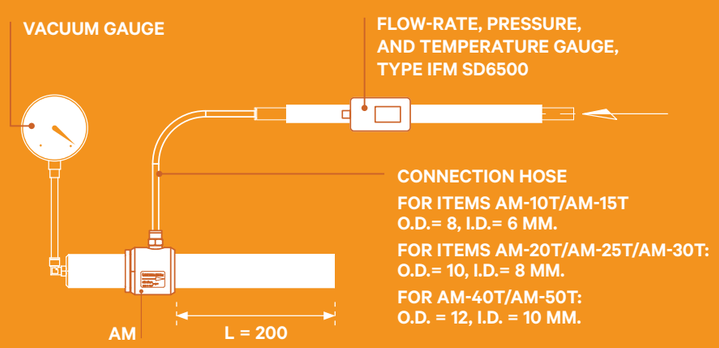
Materials	Zinc-plated metal sheet
Fixation	On request
Flow width	2000 mm
Supply pressure	Based on the type of air supply

On request: heated air flow.



Description of the set-up and instrumentation used for our tests on air amplifiers.





The **AM-T Series** air amplifiers offer excellent performance for both suction and blow-off. The quality of design and construction optimises the Coanda effect, so they use a small amount of compressed air to generate a powerful, high-speed flow. Their capability to perform both functions of suction and blow-off make them useful for many applications, including ventilating electric cabinets, conveying fumes and lightweight particles produced by machining, conveying and handling of light parts, drying, and cooling. When combined with the VR Series coolers, they create an effective patented system where, by conveying the hot air flow exhausted by the cooler to actuate an AM Series amplifier, the cooling power is optimised, so that to make it possible to drawn hot air out of enclosures and ventilate closed areas to be cooled. The flow-rate can be adjusted by simply turning the nut.

- Design geometries optimised to maximise the Coanda effect
- Adjustable flow-rate
- Wide section for suction and blow-off, suitable for a variety of applications
- Instant operation
- No moving part, so not subject to wear and tear
- No electricity or chemical substances required
- More efficient than venturis and ejectors
- It does not cause neither sparks nor interferences
- Reliable and maintenance-free

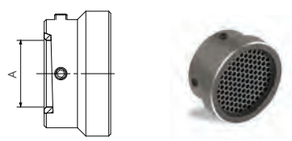
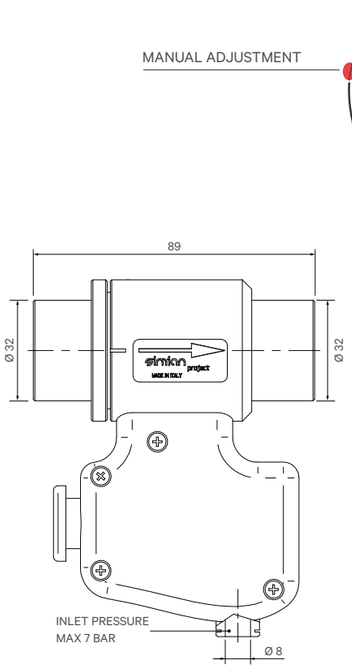
FIXATION BRACKET	
Part Number	Air amplifier
ABT-05T	AM-10T / AM-15T
ABT-05	AM-20T / AM-25T

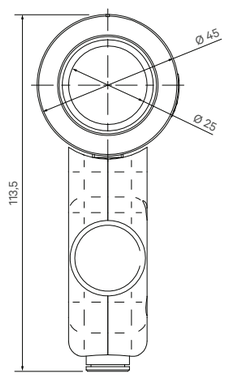
On request, with fixation holes*.



FILTERS FOR FIXATION TO CABINETS		
Part Number	Air amplifier	A Ø
AC32	AM-10T / AM-15T	19
AC31	AM-20T / AM-25T	32
AC26	AM-30T	38
AC43	AM-40T	50
AC44	AM-50T	63

SPECIAL APPLICATIONS
AIR-SPEED 25 • SUCTION GUN





GENERAL FEATURES - **AIR-SPEED 25**	
Materials	Aluminium
Supply connection	Ø 8 x 1
Inlet diameter	Ø 32
Outlet diameter	Ø 32
Air supply pressure	max 7 bar

On request, available in version for blowing.

SPECIAL APPLICATIONS
AIRCLEAN 30

FUNCTIONING PRINCIPLE

By opening the rear ball valve, the compressed air activates the **AM-30T** amplifier (recommended pressure: 3 - 5 bar), whose amplified and powerful flow gets out from the tapered outlet.

The handle has length 1 m.

BENEFITS

- Manageability and robustness, as it is made of aluminium.
- Reduction of consumption, thanks to the air amplifier.
- High power of the air flow.

FIELDS OF USE

- Cleaning of large conveyor belts (waste sector, mining sector, etc.);
- Cleaning of hoppers in the construction industry, etc.;
- Cleaning of large components in the aeronautic, rail, and marine sectors;
- Cleaning of silos, metallic carpentry, etc.

SERIES UGP 20A - UGP 20B

FLAT-FLOW NOZZLES

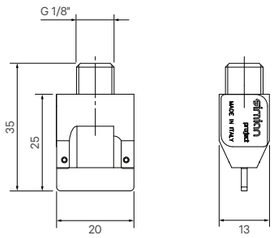
DEVICES DESIGNED TO RESPOND TO VARIOUS REQUIREMENTS IN THE AUTOMATION FIELD, AS LISTED BELOW:

- **Nozzles series UGP** - In-line blowing
- **Nozzles series UGL** - Cleaning of rectangular photocells
- **Nozzles series UGD** - Cleaning of optical sensors and photocells
- **Nozzles series UGF** - Cleaning of optical fibers
- **Nozzles series UGF** - Cleaning of optical fibers

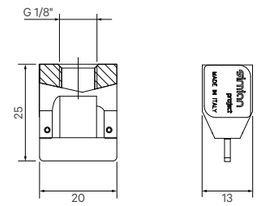
Possibility of customisation, both in terms of materials and dimensions

UGP 20A

UGP 20B



UGP 20A



UGP 20B

GENERAL FEATURES - UGP 20A - UGP 20B	
Material	Delrin and AISI304 stainless steel
Inlet port	G 1/8" M (UGP 20A)
	G 1/8" F (UGP 20B)
Flow width	20 mm
Supply pressure	1 ÷ 7 bar
Weight	18 g (UGP 20A)
	12 g (UGP 20B)

PERFORMANCES AND CONSUMPTION TABLE

PRESSURE bar	AIR CONSUMPTION Nl/min	THRUST* Grams	NOISE LEVEL dBA
1	95	50	62
2	154	130	67
3	220	200	71
4	286	290	75
5	345	370	78
6	404	460	80
7	460	550	83

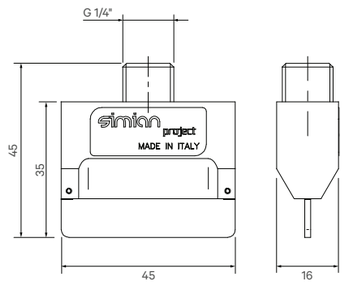
*Thrust force (in grams) measured at a distance of 200 mm.

SERIES UGP 45A - UGP 45B

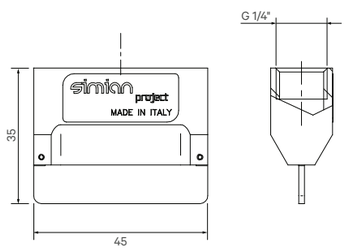
FLAT-FLOW NOZZLES

UGP 45A

UGP 45B



UGP 45A



UGP 45B

GENERAL FEATURES - UGP 45A - UGP 45B

Material	Delrin and AISI304 s.s.
Inlet port	G 1/4" M (UGP 45A)
	G 1/4" F (UGP 45B)
Flow width	45 mm
Supply pressure	1 ÷ 7 bar
Weight	32 g (UGP 45A)
	25 g (UGP 45B)

PERFORMANCES AND CONSUMPTION TABLE

PRESSURE bar	AIR CONSUMPTION Nl/min	THRUST* Grams	NOISE LEVEL dBA

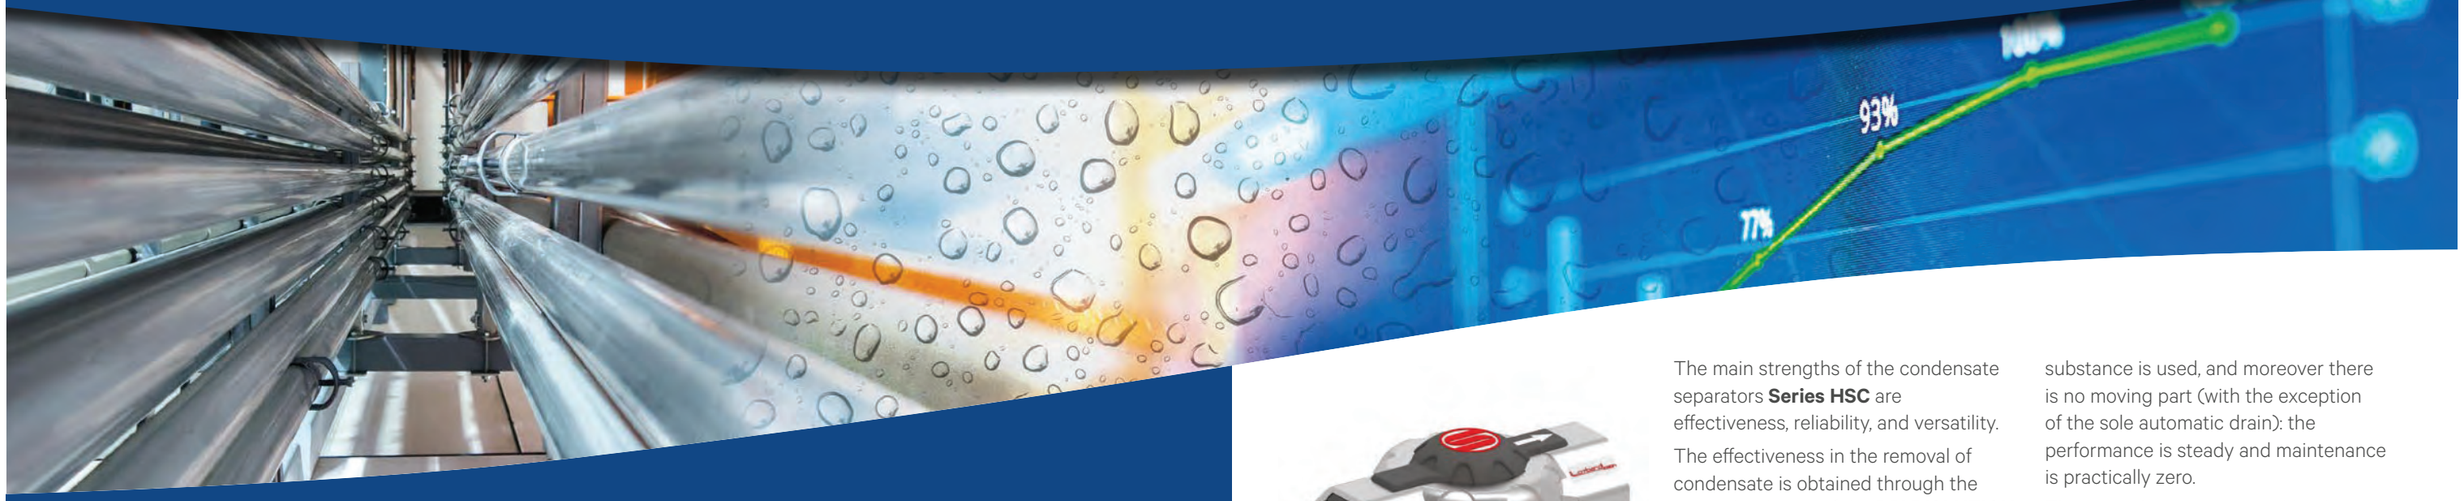
CONDENSATE SEPARATORS

SERIES HSC



Series HSC

Effective, maintenance-free, and suitable for any flow-rate and application

The main strengths of the condensate separators **Series HSC** are effectiveness, reliability, and versatility.

The effectiveness in the removal of condensate is obtained through the particular design of the **DRYVOLUTION** system: thanks to a series of concentric flanges, assembled with a precise angle of incidence with respect to the direction of inlet flow, they generate a compressed air expansion (which takes place inside a chamber downstream of the flanges) that brings about a considerable decrease in the temperature and consequently the condensation of humidity.
This is then directed to the bottom of the bowl.

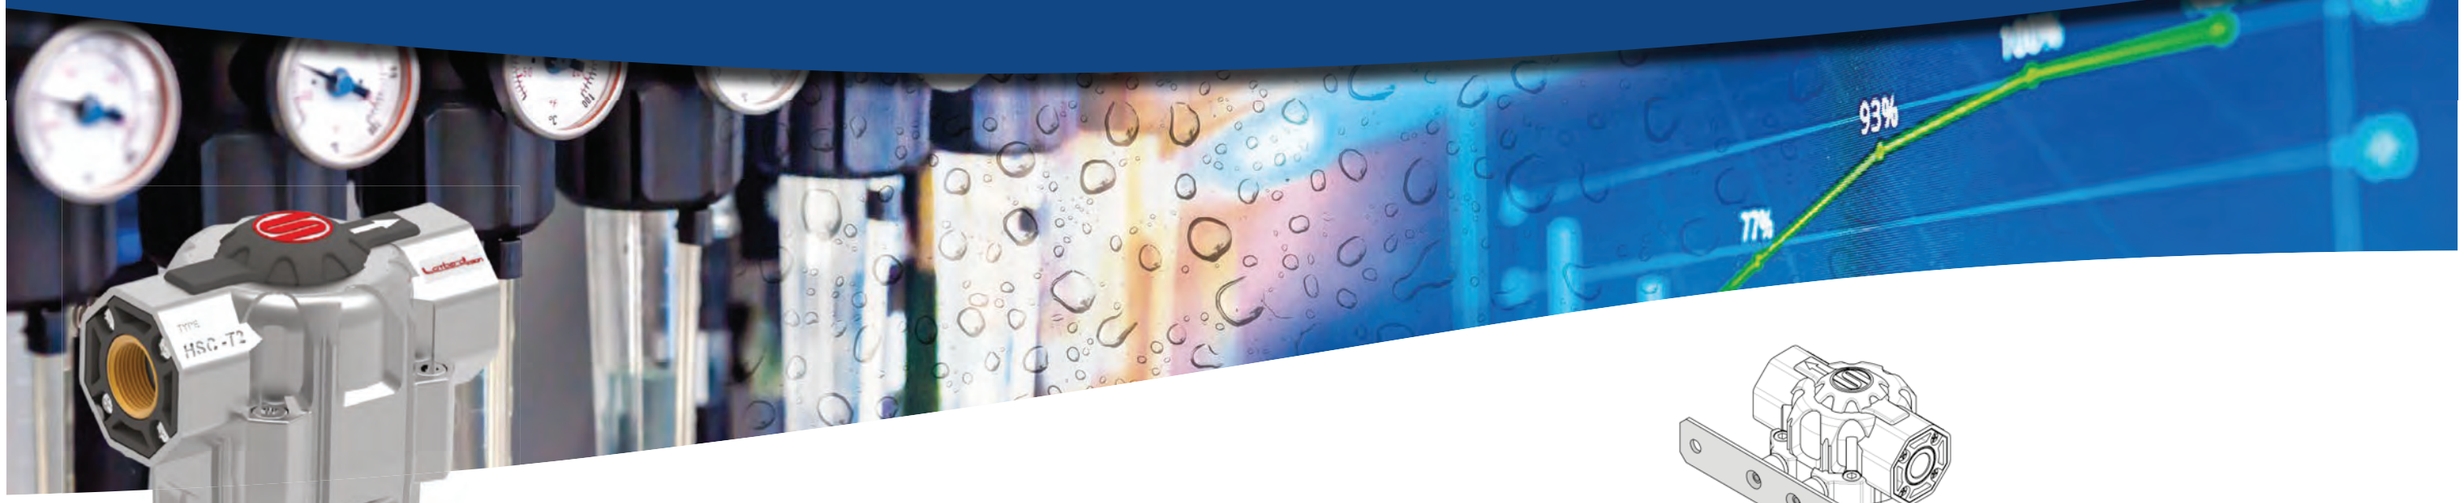
The reliability derives from the fact that no electric power and no chemical substance is used, and moreover there is no moving part (with the exception of the sole automatic drain): the performance is steady and maintenance is practically zero.

The versatility is guaranteed by the performances and the technical features: the range covers a wide spectrum of flow-rates and the materials used, together with the assembly, make it a very sturdy product. Therefore, it perfectly suits many different applications: upstream of coalescing filters (cleaning of air inside clean rooms), downstream of big compressors for air distribution inside factories, on board of trucks and agricultural machines, upstream of pneumatic tools, etc.

- Water separation through the decrease in the temperature of compressed air
- No moving part, except for the automatic drain
- Easy to install
- Made in technopolymer and brass OT58
- One size, with 3 possible flow-rate settings
- Maintenance-free
- No electricity or chemical substances required
- No sparks or interferences caused
- Instant operation
- Possibility of combination with cooler VR50 to further lower temperatures

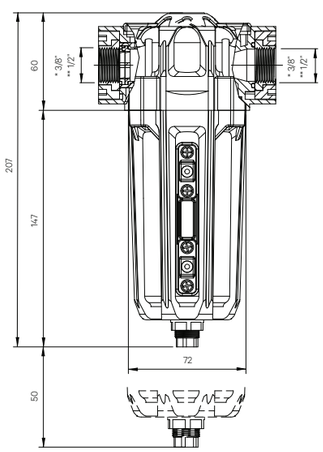
AIREKA

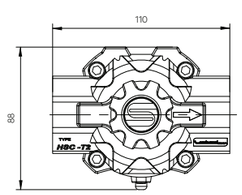
SERIES - HSC - T2 - HIGH SEPARATOR CONDENSE
THERMODYNAMIC DRYER



GENERAL FEATURES - **HSC - T2**	
Type of functioning	Thermodynamic
Materials	Technopolymer
Ports	1/2" G (with bushings in brass)
Weight	500 g
Installation	Vertical
Operating temperature	-10°C + 50°C
Condensate drain	Automatic, by float
Medium	Compressed air
Operating pressure	Max. 12 Bar
Max. flow-rate (3 possible settings)	1266* Nl/min at max. opening
Factory setting	Intermediate opening (1100 Nl/min)

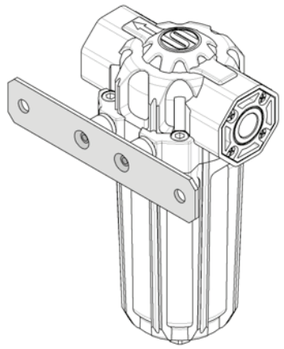
*values at P1= 6 Bar and Delta P= 0.5 Bar.

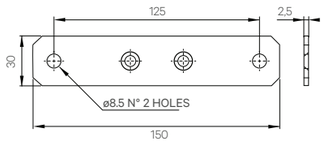




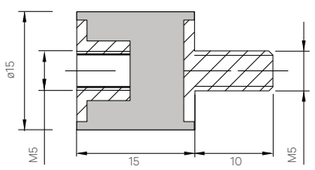
*HSC-02-38-SCC
**HSC-02-12-SCC

ACCESSORIES
THERMODYNAMIC DRYER



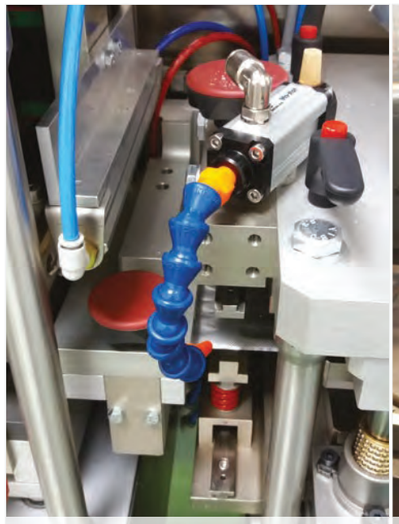


WALL BRACKET	
PART-NUMBER	**DIMENSIONS**
HSC-13	150 x 30 x 2,50



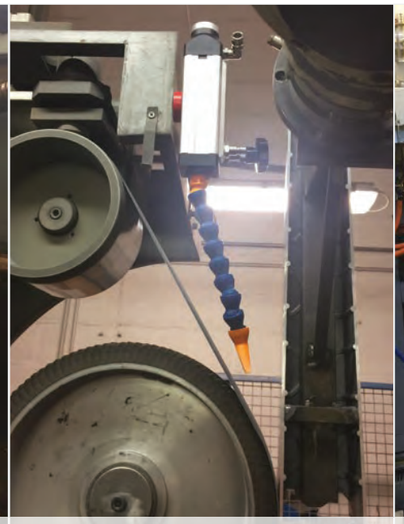
ANTI-VIBRATION SUPPORT	
PART-NUMBER	**DIMENSIONS**
HSC-17	15 x 15 M5

SOME EXAMPLES OF APPLICATIONS

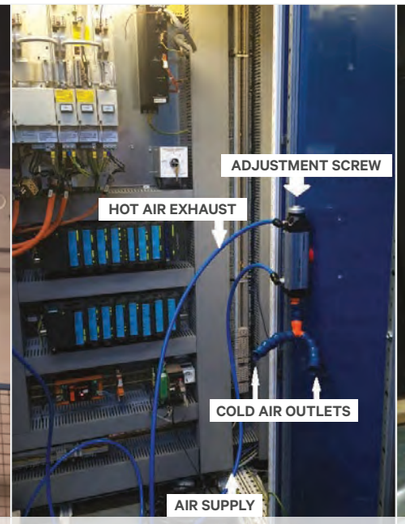


Cooling of blisters

Cooling of tools



Cooling of belt sander



Cooling of control cabinets

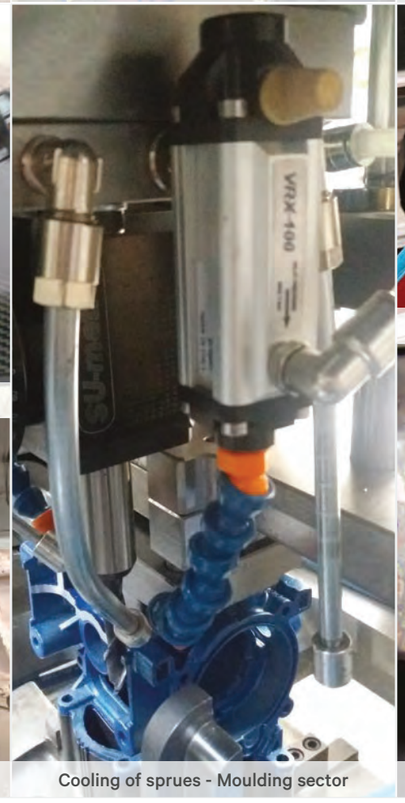
Cooler for plastics' processing

Amplifier for suction of liquids

Cooling of blades

Air knife to clean tiles

Cooler for carbon fiber's tooling



Cooling of sprues - Moulding sector

Cooler for making window fixtures

Cooler for machine-tool

Cooling of moulds in foundries

Cooling of grinder

Cabinet cooling - Ceramic industry

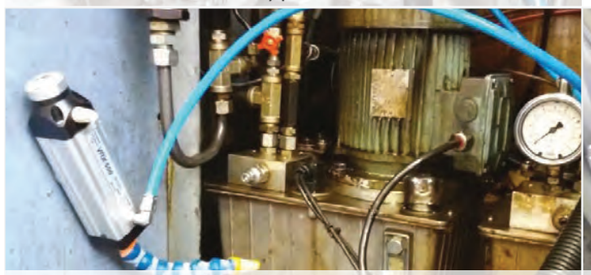
SOME EXAMPLES OF APPLICATIONS

Air knife to dry pharma containers

Cooling of glueing station

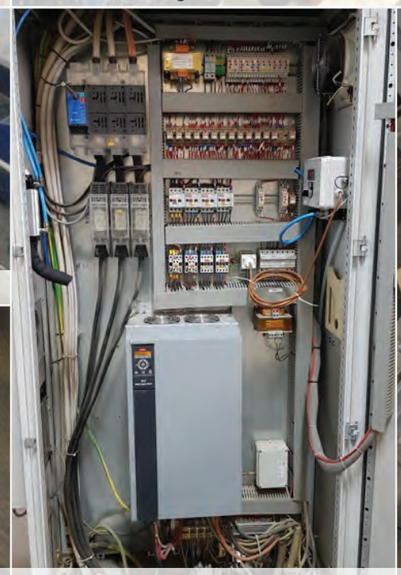
Cooling down of tool - Woodworking sector

Air knife for defective parts' discard

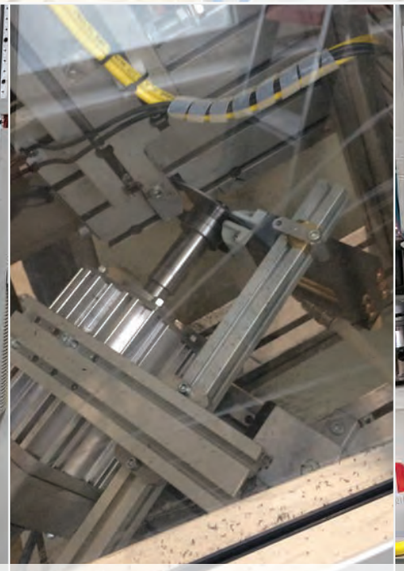


Cooler for hydraulic application

Amplifier to dry plastic wire



Cooling of cabinets (with control unit)



Cooling of blades

Cooling of control cabinets

Air amplifiers for profiles' cleaning

Air knife to clean machine-tool window

Air-knife to stretch films

Cooling of cabinets

Cooling of junction boxes

Cooling of a tool - Plastics sector

Air knives to detach metal sheets
