The Gast Group Difference

For over 90 years, Gast Manufacturing has been providing innovative air solutions to a broad breadth of customers. With the relatively recent addition of JUN-AIR, we have expanded our capabilities and formed, "The Gast Group." Together, our diverse engineering background and pneumatic experience allow us to provide both component and system solutions to meet all of your pneumatic needs. And, all backed by our strong commitment to quality and customer support.

Products for Almost Any Application – Worldwide

We offer an extensive and versatile line of air-moving products, including vacuum pumps, compressors, air motors, gearmotors, vacuum generators, and regenerative blowers. We design and build these components for original equipment manufacturers worldwide, but we also develop complete pneumatic solutions to solve tough customer challenges.

To ensure fast, efficient delivery of products, Gast has a vast network of sales representatives/distributors throughout the United States and the world. Plus, we maintain direct sales and service facilities in Europe, Hong Kong, and Shanghai, China.

Unparalleled Design Expertise

Unlike other manufacturers, who might expect you to modify your pneumatic system to fit their available product(s), Gast is committed to finding the right product to meet your specific needs. If we don't have a high-quality, off-the-shelf product to fit your existing application or meet your anticipated needs, we'll propose customized cost-effective design options that will serve your special requirements. We can even develop and produce your complete pneumatic system for you.

Our experienced Research and Development engineers and Product engineers work together to analyze customer needs and use computer-aided design to generate timely solutions for air-handling problems. The design team has one goal: to create problem-solving solutions that capitalize on the latest available technology, meet all application requirements, and benefit from cost-effective production methods. The end result: products and solutions that are the best value in the marketplace for our customers.

A Lasting Commitment to Quality

We invest heavily in both equipment and people to maintain the consistent quality for which our products are known worldwide, and we have done so since day one. As early as 1983, we implemented a total quality process designed to ensure the quality of our products. In keeping with that tradition, Gast has achieved ISO 9001 certification, making us a member of the elite group of manufacturing companies in the world to receive that certification.

European Community Directives CE

With extensive sales outside the United States, Gast has pledged to conform to the European Community Directives. These directives contain essential requirements concerning health, safety, environment, and consumer protection for all products targeted for the European Community market. Currently, all Gast products available for sale in the European Community are in compliance with the Machinery, Low Voltage, and Electromagnetic Compatibility Directives.

Pictorial and dimensional data is subject to change without notice. The information presented is based on technical data and test results of nominal units. It is believed to be accurate and is offered as an aid in the selection of Gast products. It is the user's responsibility to determine suitability of the product for intended use and the user assumes all risk and liability whatsoever in connection therewith. Environmental and application conditions may affect advertised life.

Why use a Rotary Vane Pump?

Rotary Vane vacuum pumps and compressors have certain significant advantages. In addition to providing smooth, pulse-free air flow without receiver tanks, they are compact (or equivalently offer high flow capacities for a given size), are simple and economical to install and operate, have low starting and running torque requirements, produce minimal noise or vibrations, are capable of long, service-free life, and are easily serviced.

If these features are what you need in your pneumatic application, a Gast Rotary Vane model can provide you the right solution.

Reliable

The moving parts consist of an actuating rod supported by two special synthetic rubber diaphragms. They oscillate laterally, permitting a minimum of 30,000 hours of continuous operation on many models. Other than the occasional filter cleaning, operation is virtually maintenance-free. Replacement parts come in a cassette.

Quiet

Sound insulation was a prime consideration in the design of the pneumatic circuit and mechanical section. The result: a surprisingly low operating noise level – as low as 38 dB(a).

Energy Efficient

Operation is based upon the principles of electromagnetic oscillation. It eliminates the need for sliding parts, minimizing power consumption.

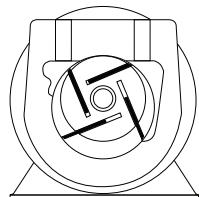

Clean Air

Because there are no sliding parts there is no need for lubrication. An added advantage: the exhausted air is always clean and particle-free.

Smooth Flow

Uniform exhaust rate and minimal pulsation make the Linear products ideal for applications requiring consistent air pressure and supply.

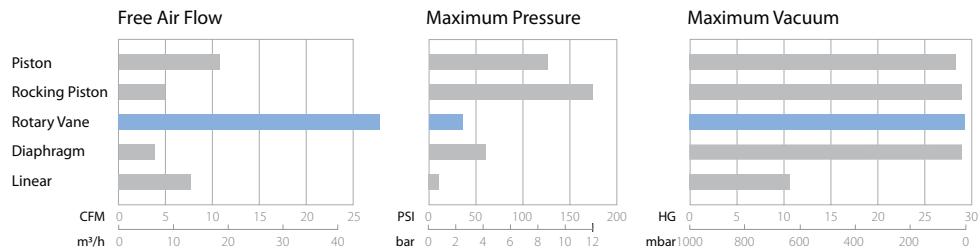

How Does a Rotary Vane Pump Work?

Pumping action is produced by a series of sliding, flat vanes as they rotate in a cylindrical housing. As the diagram shows, an eccentrically mounted rotor turns and the individual vanes slide in and out of their slots by centrifugal and pressure-loading forces. This creates a series of air compartments of unequal volume against the wall of the housing. These compartments get larger during the suction part of the cycle, creating vacuum at the intake port and smaller during the discharge portion of the cycle, creating pressure at the exhaust port.

The vacuum and pressure flows are free of pulsation because the inlet and exhaust ports do not have valves, and the air is moved continuously rather than intermittently.

Gast Rotary Vane and Vacuum Pumps Performance*

*Shown here are performance ranges of our positive displacement models. Performance shown on inside charts is for continuous operation. Higher performance is possible on an intermittent basis (10 min. on/10 min. off) for some of the models listed. Please consult our Factory.

Rotary Vane Performance Overview

*Standard model performance. Soil sparging model capable of 20 psi.

**Soil sparging model.

Catalog Performance Specifications

The specifications listed are that of a unit at sea level with an ambient temperature of 70°F (21°C), operating with normal electrical current conditions. The figures stated in this catalog are nominal approximations for models without accessories. Intake filters and exhaust mufflers, and the accumulation of contaminants in them during operation, will decrease the flow of air as well as the achievable pressure.

The units that we list in this catalog are a small portion of what we actually make. Those listed are considered "standard units" and are normally available from stock in small quantities. Variations are produced for many customers and by passing on to us the application specifications we might find an existing unit that fits your requirement. If we don't and the quantity is sufficient, we will design a "special unit" for the application.

Pictorial and dimensional data is subject to change without notice.

The information presented in this catalog is based on technical data and test results of nominal units. It is believed to be accurate and is offered as an aid in the selection of Gast products. It is the user's responsibility to determine suitability of the product for intended use and the user assumes all risk and liability whatsoever in connection therewith.

Typical Applications

Environmental Applications

- Air sampling
- Breathing air supply
- Sewage aeration
- Soil sparging

Medical Applications

- Dental surgical suction
- Dental vacuum mixers
- Medical aspiration
- Circulation therapy

Graphic Arts Applications

- Envelope openers
- Collating inserters
- Vacuum frames

Other Applications

- Pond aeration
- Vacuum hold-down
- Vacuum forming
- Air bearings
- Oil atomization
- Food processing
- Laboratory vacuum
- Milking equipment

Gast Rotary Vane Compressors and Vacuum Pumps 5

Product and Application Information

Unit Life Expectancy

Many variables determine the life expectancy of a unit.

Among them are:

1. Ambient temperature

Gast's units operate best within a temperature range of 32 °F (0 °C) to 100 °F (38 °C). Lower temperatures affect a unit's ability to start and higher temperatures affect its life. Contact the factory for authorization of unusual ambient conditions.

2. Duty level

3. Operating cycle

4. Operating speed

5. Condition of air handled

- Cleanliness
- Humidity
- Heat
- Chemical vapors present (corrosive, noncorrosive)

6. Unit maintenance

- Lubrication (if required)
- Filter maintenance
- Muffler maintenance

Electric Motors

All electric motors supplied with Gast vacuum pumps are designed to operate at plus or minus 10% of nameplate voltage. Motors to meet special requirements are available upon request. Various brand-name motors are furnished on any model at the discretion of Gast.

Starting Under Load

Rotary vane units will start under load. The vanes permit the internal chamber of the unit to bleed off during the cycle. At start-up, the pump is not subjected to full load until enough centrifugal force has been attained to throw the vanes out against the body. By that time, the motor has gained enough momentum to continue its cycle without stress.

Continuous vs. Intermittent Operation

Continuous vs. intermittent duty usually must be considered. Our definition of intermittent duty is 10 minutes or less on and 10 minutes or more off. Please note that when you refer to performance curves in this catalog, the solid line indicates continuous operation, while the dashed line shows intermittent duty.

European Community's Machinery Directive

Given its international perspective, Gast has also pledged to conform to the European Community's Machinery Directive, a safety certification program for all products targeted for marketing in the European Community. Currently, all Gast products sold in the European Community are in compliance and include a Declaration Certificate.

**Model 1531 Series
(AC & 12 Volt)**

20 inHg max. vacuum
1.5 CFM open flow
10 psi max. pressure

Product Features

- Oilless operation
- Motor mounted
- Rugged construction/low maintenance
- Essentially pulse-free service

Includes

- Muffler/filter AA922H
- Thermal protector (on AC models only)

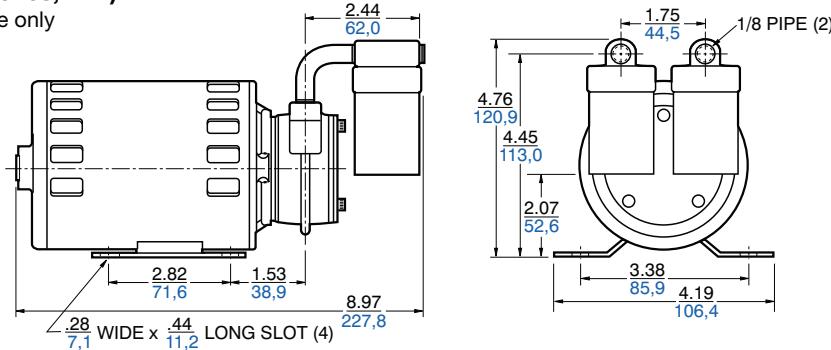

Recommended Accessories

- Vacuum relief valve Aa204
- Vacuum gauge Aa641
- Pressure relief valve Aa203
- Pressure gauge Aa644b
- Repair kit K219

Product Dimensions (inches, mm)

Dimensions are for reference only

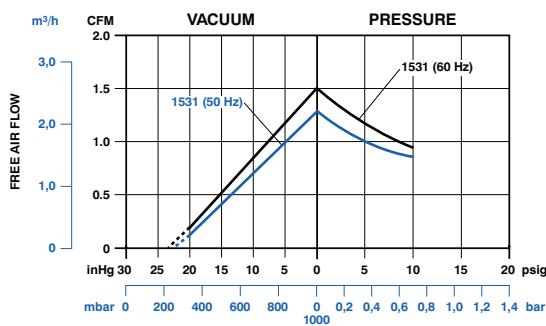

Model 1531 (AC Motor)

**Product Specifications**

Note: All models listed can be used as either a vacuum pump or compressor.

Model Number	Motor	RPM		HP	kW	Thermal Protector	Net Weight	
		60 cycle	50 cycle				lbs	kg

Product Performance

0532 Series

Note:
24V BLDC performance is at approximately 3400 RPM.
Operation beyond 4000 RPM is not recommended.

1032, 1532 Series

Units shown without sound attenuator.

Model 2032 series

26 inHg max. vacuum
2.4 CFM open flow
10 psi max. pressure

Model 3032 series

26.5 inHg max. vacuum
2.6 CFM open flow
10 psi max. pressure

Product Features

- Oilless, pulse-free operation
- Motor mounted
- Low noise levels

Includes

- Internal sound suppression/filtration
- Thermal protector (on all AC Models)
- Capacitor (unattached)
- Motor controls on 24V BLDC (unattached)
- Sound attenuator AK840A (unattached)

Recommended Accessories

- Vacuum relief valve AA204 or AA840A
- Vacuum gauge AA640
- Pressure relief valve AA600 or AA203
- Pressure gauge AA644B
- Repair kit K442A (2032), K554 (3032)

Product Performance

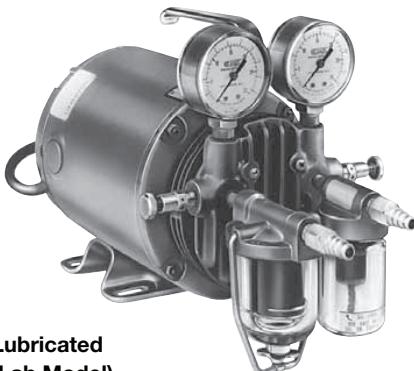

Model 2032

**Note:**

DC models can achieve open flows between 1.25 and 1.85 CFM depending on varying RPM. max. vacuum and pressure is comparable to AC models.

Model 3032

**Lubricated
(Lab Model)**

Oilless Version

Model 0211 Series

Lubricated:

20 inHg max. vacuum
20 psi max. pressure
1.3 CFM open flow

Oilless:

20 inHg max. vacuum
15 psi max. pressure
1.1 CFM open flow

0211 Lab Model

Lubricated:

Specially accessorized for laboratory use
20 inHg max. vacuum
20 psi max. pressure
1.3 CFM open flow

Product Features

- Lubricated or oilless operation
- Motor mounted
- Rugged construction/low maintenance
- Essentially pulse-free service
- Built-in pressure relief valve on standard units (Non-Lab Models)

Includes

Lubricated Standard Models:

- Muffler V425B
- Filter/oiler AA680K

Oilless Standard Models:

- Muffler/filter AA617G (2)

Lab Models (Lubricated):

- Gauges – Vacuum AA640, Pressure AA644B
- Hose barbs AA254C
- Regulators AA986B
- Carrying handle AC174
- Cord with on/off switch AA896
- Foot support assembly AC136
- Oiler/filter AA680J
- Muffler AB580B

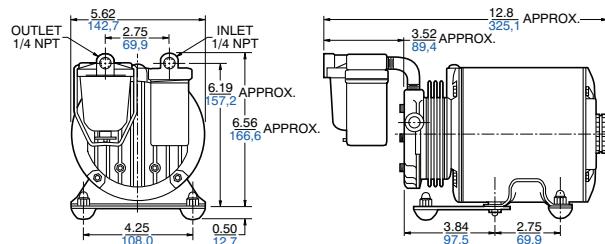

Recommended Accessories

- Vacuum relief valve AA840A
- Vacuum gauge AA640 (Standard models)
- Pressure gauge AA644B (Standard models)
- Oil AD220
- Repair kit K216 (Lubricated vacuum models)
- Repair kit K217 (Lubricated pressure plus lab models)
- Repair kit K218 (Oilless, pressure or vacuum)

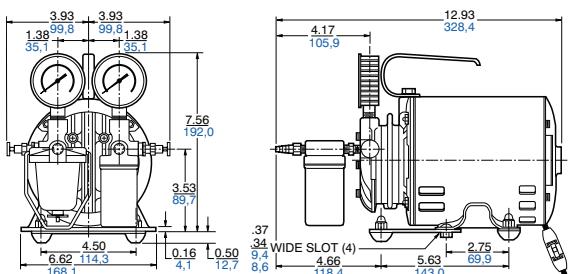

Product Dimensions (inches, mm)

Models 0323/0523

Models 0823/1023

Model 1423

Model 0323 Series

25 inHg max. vacuum
3.2 CFM open flow
10 psi max. pressure
3.2 CFM open flow

Model 0523 Series

26 inHg max. vacuum
4.5 CFM open flow
10 psi max. pressure
4.5 CFM open flow

Model 0823 Series (Vacuum Model)

26 inHg max. vacuum
8.0 CFM open flow
10 psi max. pressure
8.0 CFM open flow

Model 1023 Series

26 inHg max. vacuum
10.0 CFM open flow
10 psi max. pressure
10.0 CFM open flow

Model 1423 Series

25 inHg max. vacuum
13.2 CFM open flow
10 psi max. pressure
13.5 CFM open flow

Product Features

- Oilless operation
- Motor mounted
- Rugged construction/low maintenance
- Essentially pulse-free service

Includes

- Thermal protector (on Single Phase Units only)
- Internal muffler and filter
- External muffler and filter (1423 Model)
- Silencer:
AK840A (0323)
AK840 (0523/0823/1023)
AC432 (1423 Models)
- Foot support assembly AC136 (0323/0523)

Recommended Accessories

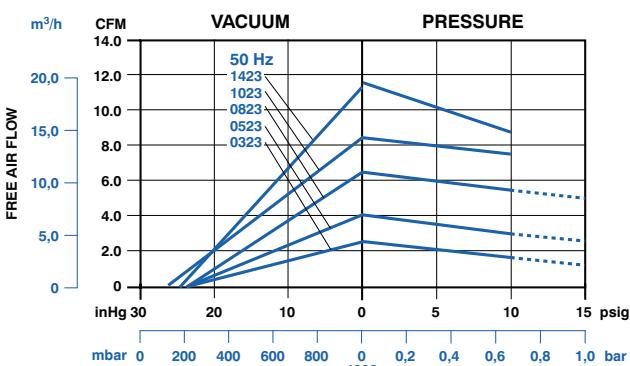

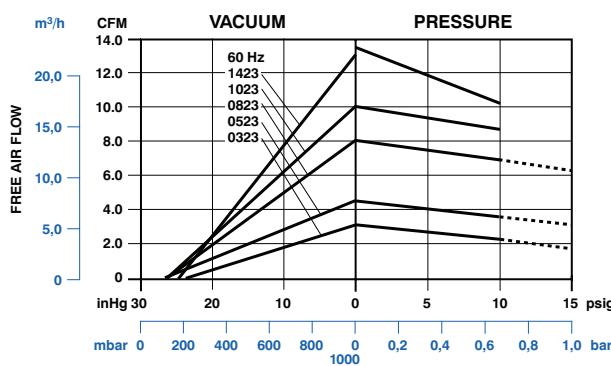

- Vacuum relief valve AA840A (0523/0823/1023/1423)
- Pressure relief valve AA600
- Vacuum gauge AA640
- Repair kit K478 (0323/0523)
- Repair kit K479 (0823/1023)
- Repair kit K575A (1423)

Product Specifications

Note: Models listed below are single function compressors or vacuum pumps except for D101Q models, which are dual function.

Product Performance

**Model AT03 Series**

10 psi max. pressure continuous duty
3.7 CFM open flow

Model AT05 Series

10 psi max. pressure continuous duty
15 psi max. pressure intermittent duty
4.8 CFM open flow

Product Features

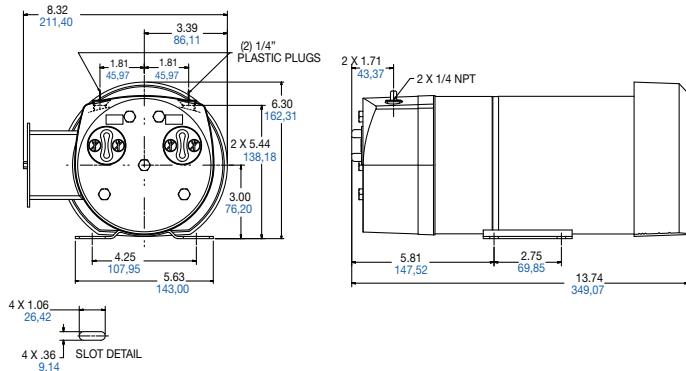

- Oilless operation
- Motor mounted
- New motor design
 - Totally Enclosed Fan Cooled (TEFC) motor offers better protection against environmental conditions.
- Improved mounting stability
- UL Recognized (pressure only)

Includes

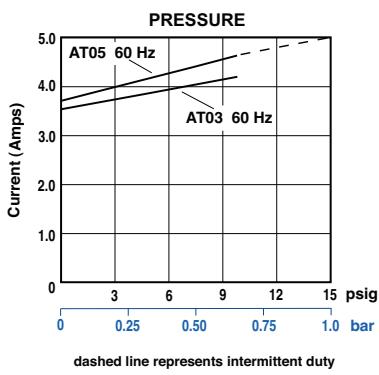

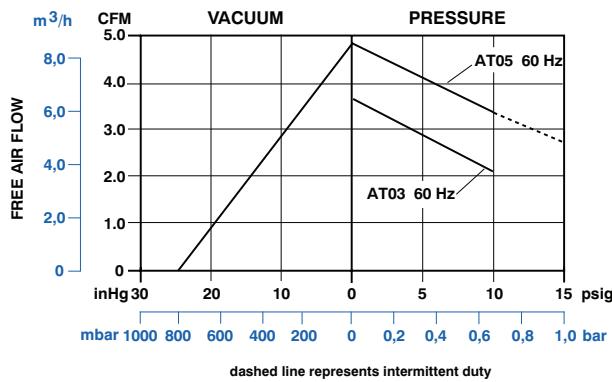

- Thermal protector
- Internal muffler and filter
- External inlet filter

Product Dimensions (inches, mm)

Motor Mounted Rotary Vane

Oilless 70 Series

**10.0
13.5
and
14.0
CFM**

Model 2070 Series

25.0 inHg max. vacuum
20.0 CFM open flow

Product Features

- Oilless operation
- Rugged construction/low maintenance
- Low noise

Includes

- Internal sound suppression
- Heavy duty internal filtration
- Vacuum gauge (AA640)
- Vacuum adjustable relief valve (AN226),

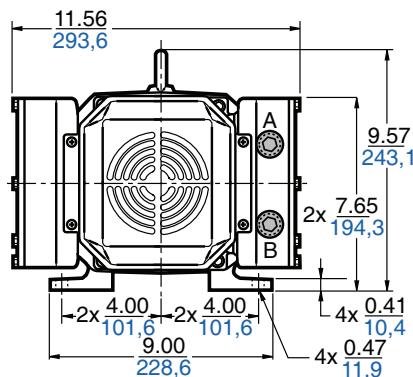

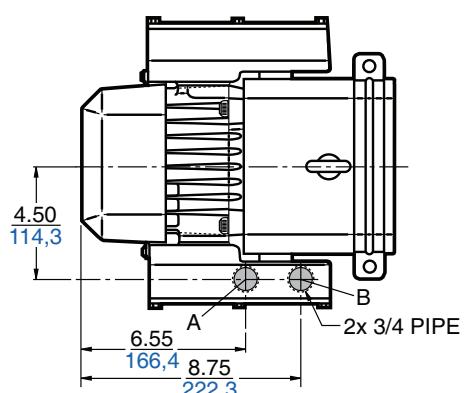

Recommended Accessories

- Gauges and relief valves for separate drive models. See above part numbers.
- Complete repair kit K560
- Filter/muffler kit K561
- Filter/muffler kit K563s

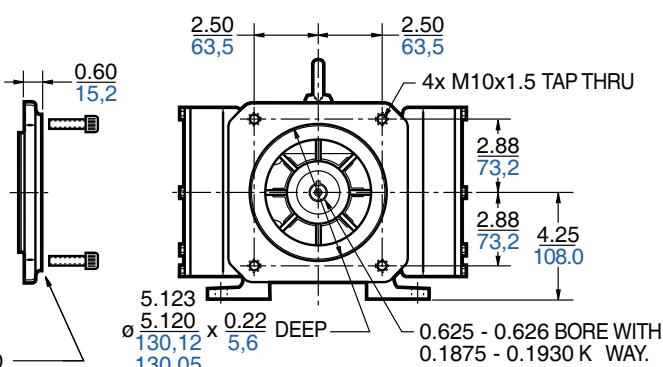

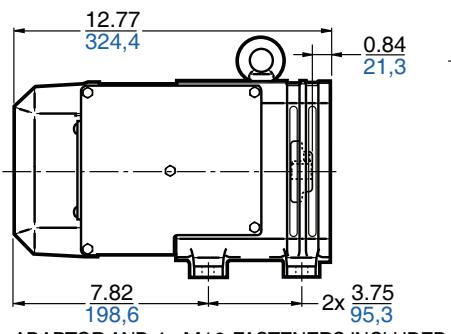

Units pictured without gauges.

Product Dimensions (inches, mm)

Lubricated Vacuum Pump

Model 0240 Series

Lubricated:

15 inHg max. vacuum
1.9 CFM open flow
10 psi max. pressure

Model 0440 Series

Lubricated:

15 inHg max. vacuum
4.0 CFM open flow
10 psi max. pressure

Oilless:

20 inHg max. vacuum
4.0 CFM open flow
10 psi max. pressure

Model 0740 Series

Oilless:

20 inHg max. vacuum
6.0 CFM open flow
10 psi max. pressure

Product Features

- Lubricated or oilless operation
- Rugged construction/low maintenance
- Essentially pulse-free service

INCLUDES

Lubricated

- Oiler AA930B (0240/0440) AA930C (0740) – Vacuum pumps
- Oiler AA930F – Compressors
- Coupling assembly AE541A
- Muffler V425C (0240/0440), V500D (0740)
- Filter V400C (0240/0440)
- Filter B343B – Compressors

Oilless

- Muffler V425A (0240/0440), V525A (0740)

Nema 56 Frame, C Face, Inlet $\frac{3}{4}$ In. Npt

MODEL 2067 SERIES

LUBRICATED:

28 inHg max. vacuum
17 CFM open flow
15 psi max. pressure

OILLESS:

27 inHg max. vacuum
17 CFM open flow
15 psi max. pressure

MODEL 2567 SERIES

LUBRICATED:

28 inHg max. vacuum
21 CFM open flow
15 psi max. pressure

OILLESS:

27 inHg max. vacuum
21 CFM open flow
15 psi max. pressure

Product Features

- Close coupled/easy motor mounting
- Rugged construction/low maintenance
- Essentially pulse-free service

INCLUDES

- Fan guards AC102C, AH194A
- Fan/coupling assembly AH198
- Filter AA900D (Vacuum pump) – Lubricated
- Filter AC435 (Compressor) – Lubricated
- Muffler AA900E (Vacuum pump) – Lubricated
- Filter AA905G (Compressor) – Oilless
- Muffler AA900F (Vacuum pump) – Oilless
- Oil reservoir AA960-1
- Vac lubricator V40C
- Pressure lubricator AA95A
- Pressure gauge AA644B (U.S.) – Lubricated

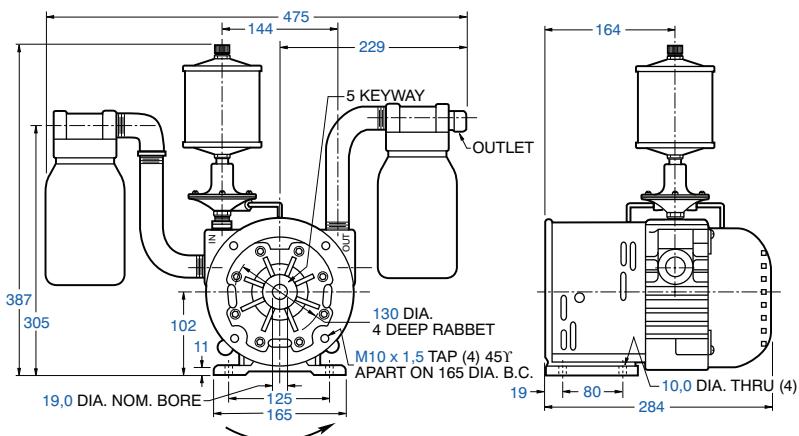

Recommended Accessories

- Vacuum relief valve AA308 (U.S. Models)
- Vacuum gauge AA640 (U.S. Models)
- Pressure relief valve AA307 (U.S. Models)
- Pressure gauge AA644B – Oilless
- Oil AD220
- Repair kit K349 – Lubricated
- Repair kit K350 – Oilless

Lubricated

Oilless

*This dual function series comes with motor attached.

Model 2567 Series

Dual Function

Ideal for graphic arts applications where simultaneous vacuum and pressure are needed.

Max. vacuum (with 5 psi back pressure)

20 inHg

Open flow (vacuum side)

15 CFM

Recommended Accessories

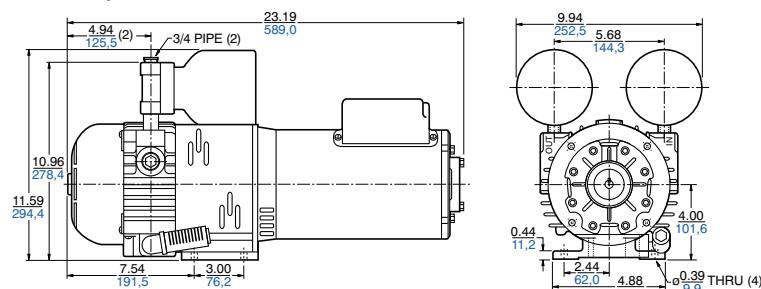

- Vacuum gauge AA640
- Pressure gauge AA644B
- Repair kit K350

Product Features

- Oilless operation
- Dual pump performance with (1) pump/motor
- "Universal" motor included
- Rugged construction/low maintenance

Product Dimensions (inches, mm)

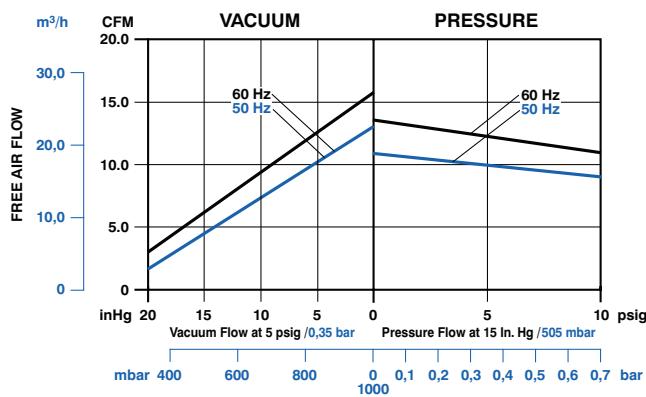

Dimensions are for reference only

45 CFM open flow
15 psi max. pressure

Model 4080 Dual Function

Ideal for graphic arts applications where simultaneous vacuum and pressure are needed.
9 psi max. pressure (@ 18 inHg)
25 CFM open flow (pressure side)

Product Features

- Oilless operation
- Rugged construction/low maintenance
- Low noise

Includes

- Internal sound suppression
- Heavy duty internal filtration
- Vacuum adjustable relief valve *AN226, metric version AN226A (Vacuum pump, dual function)
- Pressure adjustable relief valve *AN225, metric version AN225A (Compressor, dual function)
- Vacuum gauge *AA640 (Vacuum pump, dual function)
- Pressure gauge *AA644B (Compressor, dual function)

* Not included in separate drive models

Lubricated Vacuum Pump

Model 3040 Series

20 inHg max. vacuum
10 psi max. pressure
31 CFM open flow (oilless)
40 CFM open flow (lubricated)

Features

- Lubricated or oilless operation
- Pulley driven (multiple speeds available)
- Rugged construction/low maintenance
- Essentially pulse-free service

Includes

- Filter AA900D (Oilless)
AB650C (Lubricated) – Vacuum pumps
- Filter AD750 – Compressors
- Muffler AA900F (Oilless)
AA900E (Lubricated) – Vacuum pumps
- Oil reservoir AA960A-1
- Vacuum-actuated lubricator V40C (Lubricated)
- Pressure lubricator AD730
- 6.5" P.D. pulley AC374B
- Fan AD236 – Vacuum pumps and oilless compressor

Recommended Accessories

- Base AB898A – Vacuum pumps
- Base AB898B – Compressors
- Belt guard AB331A
- Vacuum relief valve AA308
- Pressure relief valve AA307
- Vacuum gauge AA640
- Pressure gauge AA644B
- Oil AD220 (Lubricated)
- Check valve AH326A – Vacuum pumps
- Repair kit K233A (Oilless), K232A (Lubricated)

Model 0823**Model 2067/2567****Model 2080/3080****Model 6066****Model 0823**

10 psi max. continuous pressure
8 CFM open flow

Models 2080/3080

15 psi max. pressure
25-35 CFM open flow

Models 2067/2567

20 psi max. pressure
17-21 CFM open flow

Models 6066

20 psi max. pressure
37-55 CFM open flow

Models 1290

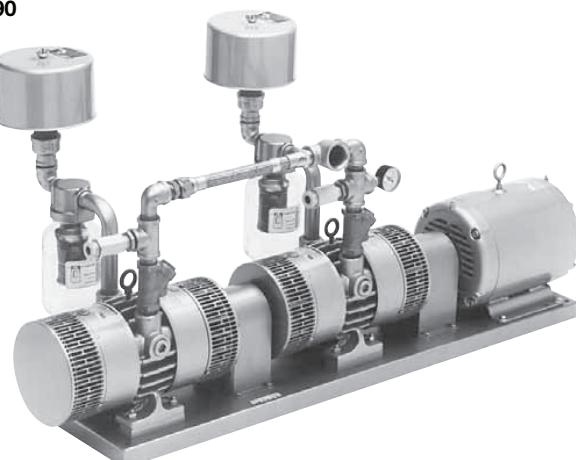

20 psi max. pressure
112 CFM open flow

Product Features

- Oilless operation
- Rugged construction/low maintenance
- Heavy-duty filters

Recommended Accessories

- Pressure gauge AA644B
- Relief valves:
 - AA600 (0823)
 - AN225 (2080, 3080)
 - AA307 (2067, 2567, 6066, 1290)
- Repair kits:
 - K479A (0823)
 - K546 (2080, 3080)
 - K585 (filter/muffler kit for 2080)
 - K584 (filter/muffler kit for 3080)
 - K357 (2067, 2567)
 - K503 (6066, 1290 – use 2)

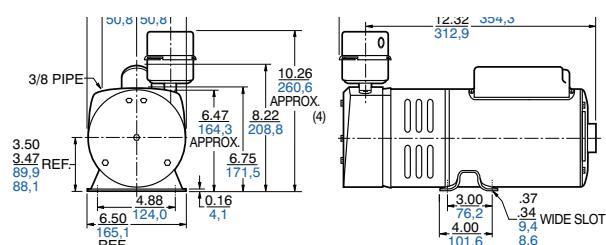

Model 1290

Units are supplied with special, high capacity filtration plus motors that allow up to 30% more pressure than the standard model counterpart.

2067-P118-G471*†	220/380-415-50-3 208-230/460-60-3	1725	1425	1	0,75	84	37,8
2567-P132-T908X†	115/230-60-1	1725	—	2	1,5	85	38,3
6066-P122A	For 213T or 215T frame motor	1725	—	7 1/2	5,6	88	39,6
6066-P122-T339****†	208-230/460-60-3	1725	—	5	3,7	205	92,3
1290-P110	For 215T frame motor	1725	—	10	7,5	220	99,7
1290-P110A	For 254T frame motor	1725	—	15	11,1	230	104,0

*For 50 Hz performance, reduce air flow on grid by approximately 17%.

***These models are capable of 15 psi max. performance, reference performance grid below.

†Also available as separate drive, less the motor. To order as a separate drive version, specify the first two sets of digits only of this model number. Consult factory or distributor for the correct Nema frame size motor to use. Customer supplied motor must have minimum service factor of 1.15.
