

Company profile

**Mechanical solutions for conveyance,
linear actuation and industrial automation**

Producing movement since 1984

We engineer and produce in Italy mechanical systems for **industrial conveyance** and for **linear actuation**, with more than 37 years of expertise in many manufacturing sectors. The in-house production is complemented by a wide range of components for the automation and power transmission, to answer the main industrial handling requirements.

INDUSTRIAL SECTORS

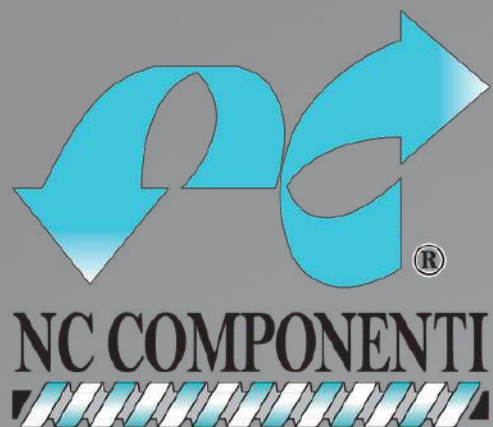

Complete range of handling solutions

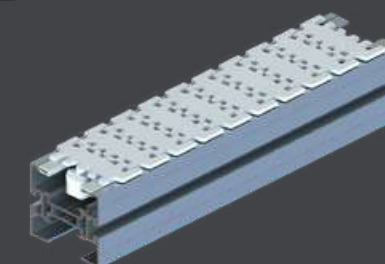

We provide a **wide and complete range of mechanical solutions** to cover every request of conveyance and automation of the manufacturing processes.

It consists of:

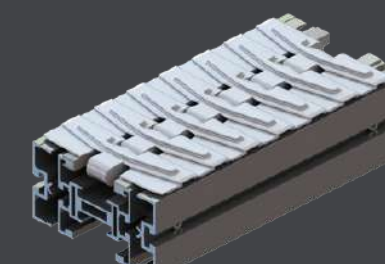

- ☒ **Easy-Link®**
- ☒ **Linear-Move**

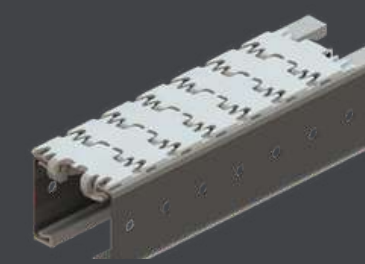

Customised solutions for conveying

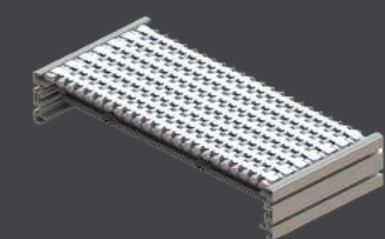

Single strand flexible chain

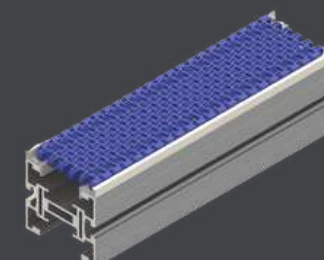

Single strand flexible chain - tab version

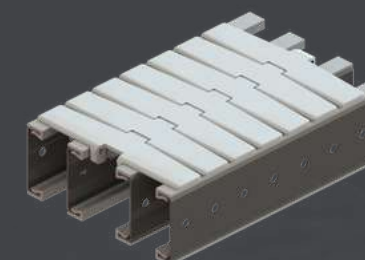

Stainless steel chain

Modular chains

Anodized aluminum profiles

Stainless steel profiles

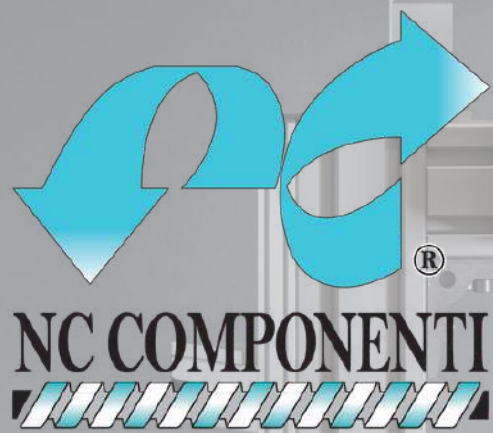

Belt conveyors

Easy-Link®

Our **patented Easy-Link® conveyor system** is solid and customisable. The **modularity** and **flexibility** of its components make it adaptable to all different kinds of layout and handling needs.

It can be provided in many different dimensions, materials and configurations, according to needs of the industrial sector and of the product to be conveyed.

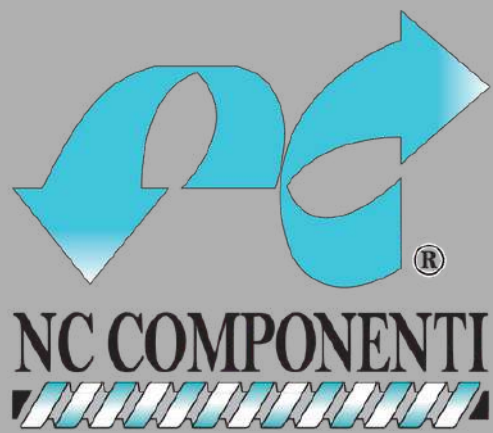

High-performing positioning solutions

Linear-Move

Our **Linear-Move** system for the mechanical linear actuation consists of **belt driven linear units** and **screw driven heavy-duty linear units**.

Solid and precise, it is ideal in many applications, from **pure positioning** to **manipulation** with complex pluri-axis systems.

Customised design

Our technical team engineers **customised solutions** with tailoring attention to details.
We translate customers needs from the idea to the final realisation, through a dedicated **consulting service** and the following **3D design**.

CUSTOM MADE

19.000+ HOURS
OF 3D DESIGN

Custom-made industrial production

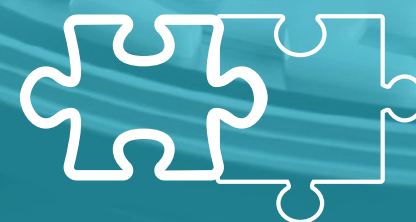

Within our plant technical employees with decades-long expertise realise the project, by building up the mechanical and structural components of the system. These become a **finished mechanical product**, ready for the following system embedment. Each production is **in-house tested**, to assure our customers the highest quality standards.

Our values

- ✓ Technical know-how
- ✓ Research & development
- ✓ Custom-made solutions
- ✓ High performances

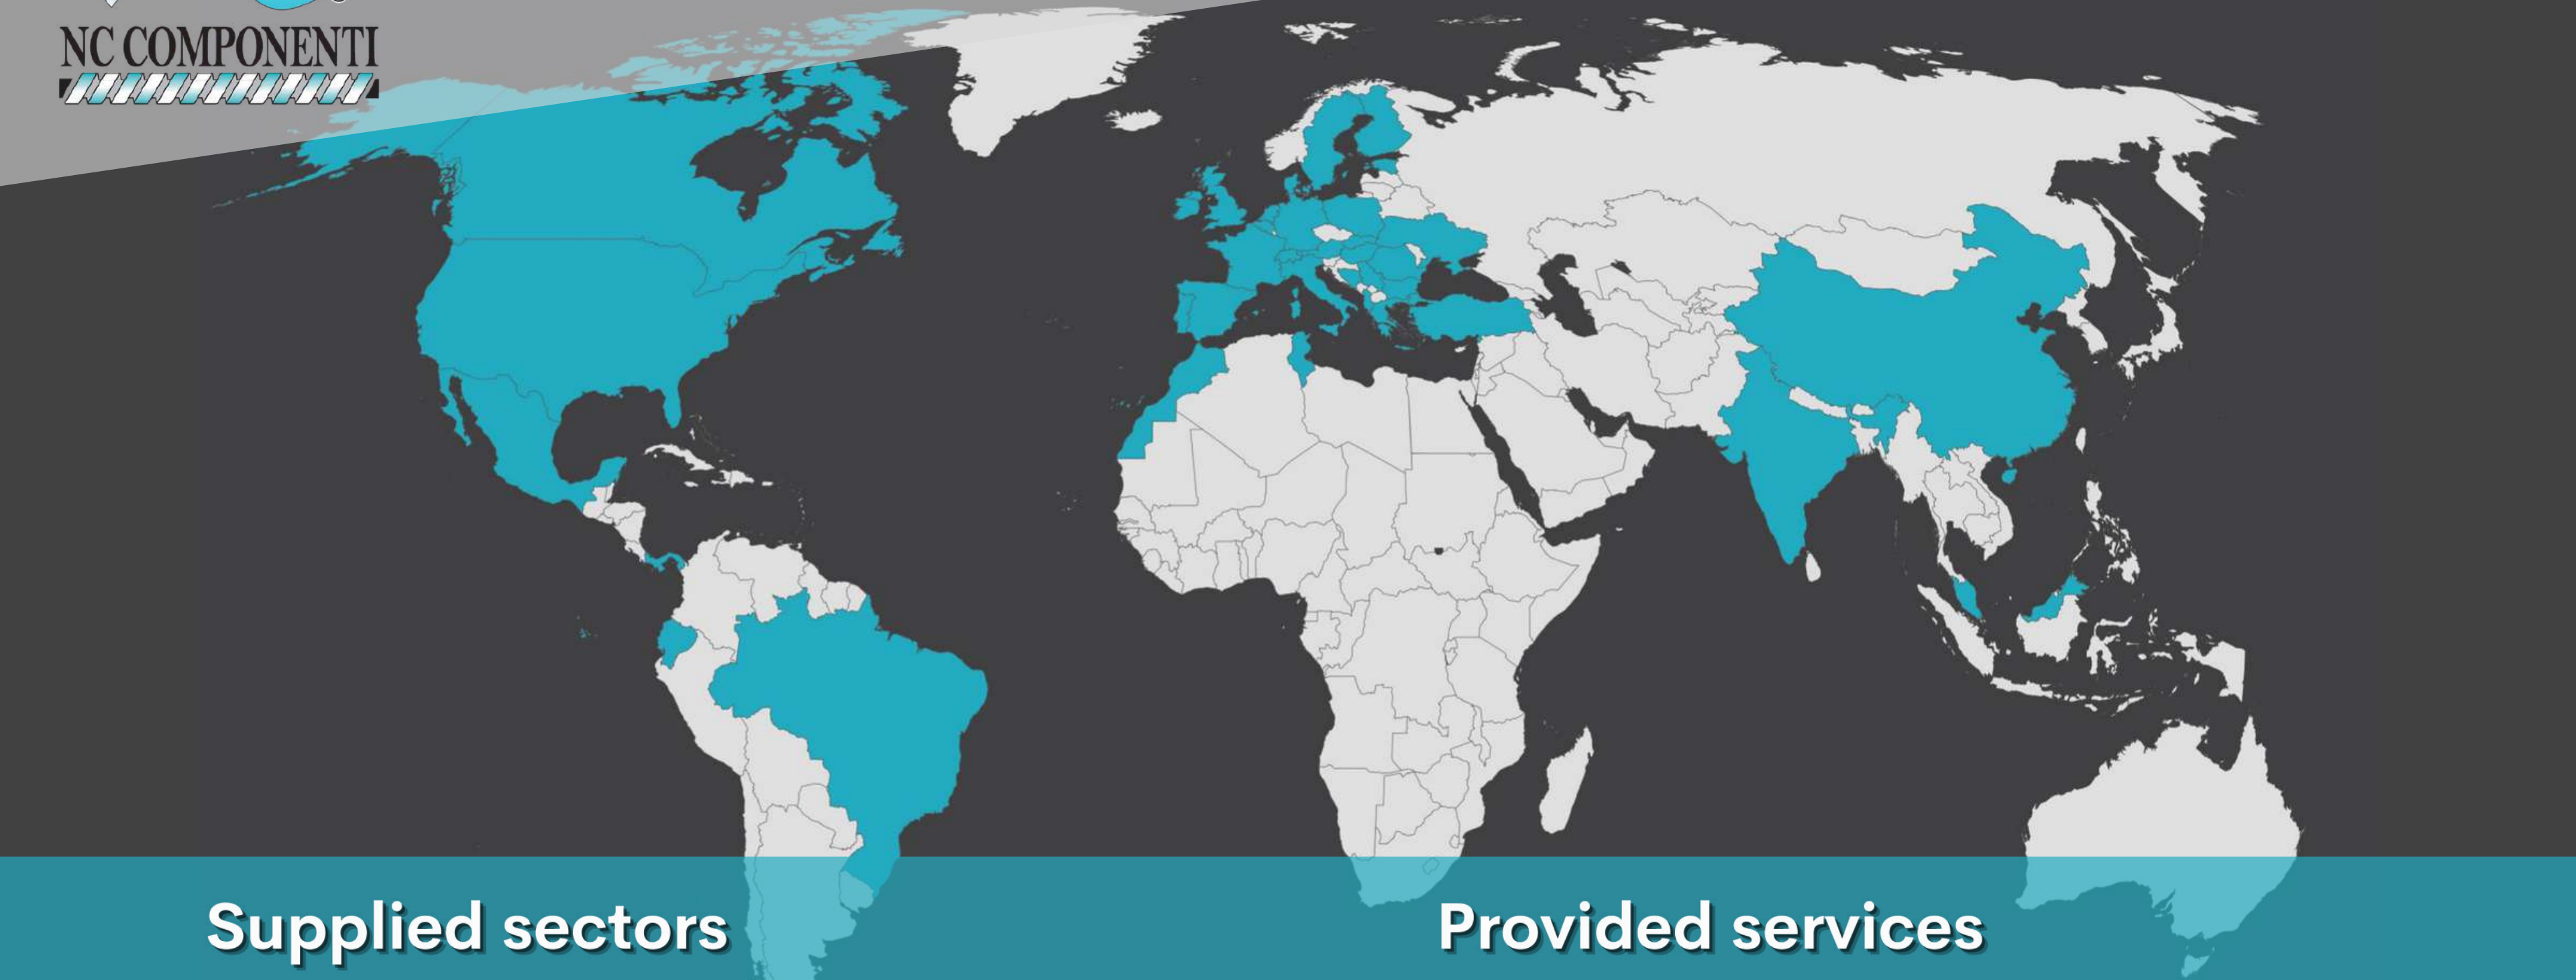

We structured a **research and development** activity to select the **most performing materials** for our components, supported by Research Centres and Engineering Polytechnics, in order to guarantee more **resistance**, **flexibility** and **durability** of our products.

The **quality** of materials and the **high modularity** of components lead to:

- ✓ Reduction of maintenance and management costs
- ✓ Investments and spaces' optimization
- ✓ Greater return of the investment in the long run

Our solutions in the world

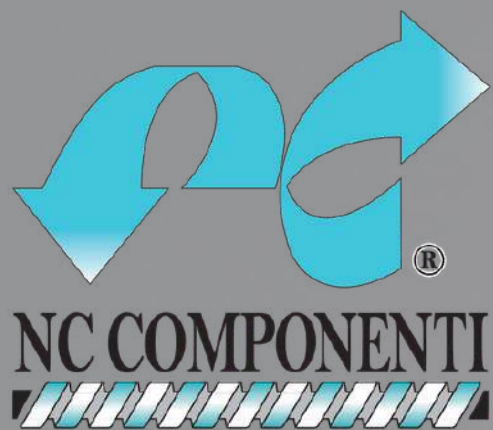

Supplied sectors

- | | |
|---|--|
| ☒ Automotive | ☒ Food |
| ☒ Bottling | ☒ Ophtalmic |
| ☒ Cosmetics | ☒ Packaging |
| ☒ End-of-Line systems | ☒ Pharmaceutical |

Provided services

- | | |
|---|--|
| ☒ After-sales service | ☒ Multilingual customer care |
| ☒ Custom-made design | ☒ Technical sales consulting service |
| ☒ Customer visits support | ☒ Technical training service |
| ☒ Marketing support | ☒ Well-structured working relationship |
