

CSA CERTIFIED SERIES PUMPS

AS RUGGED AS THE NORTHERN TERRAIN

As a global leader in the air-operated double diaphragm industry, Yamada® offers a series of CSA Certified natural gas driven pumps. The CSA Certified series is built on the foundation of the field proven DP & NDP series pumps, which have had the same, consistent design for several years. With a history of service, that has been exemplary throughout the years, these pumps have certainly proven that they're as rugged as the great northern terrain demands. With sizes in 3/4" & 1", the CSA Certified pumps offer you reliability, efficient operation and most of all, safety.
