Velkommen

BIBUS SINDBY A/S er et solidt og velkonsolideret import- og handelsfirma, der har industrien og opbyggere som de to største kundegrupper. I de mere end 100 år firmaet har eksisteret, er en videnbank bygget op omkring indkøb og udvikling af kvalitetsprodukter primært til industrien. Sund fornuft og kvalitet er nøgleordene for al handling i virksomheden. Vi har været i konstant udvikling siden starten og har skabt en virksomhed, der er rustet til de stigende udfordringer og muligheder i industriens utallige nicher.
Adm. direktør Keld Hansen er i dag manden bag BIBUS SINDBY. I 2007 overtog BIBUS AG virksomheden efter den tidligere ejer og Sindby-familien, der siden 1918 har drevet firmaet over tre generationer. Virksomheden har løbende udviklet sig med kundeklientellet.

Energioptimering

BIBUS SINDBY A/S iværksatte i september 2022 en proces, hvor vi gennemgik vores el- og gasforbrug. Med en ny investering i belysning samt en simpel adfærdsændring, lykkedes vi med at reducere vores elforbrug med over 40%.
Vi offentliggør vores forbrug internt hver gang der er mærkbare ændringer, pt er vi fokuseret på at vise vores opstart med solceller og forbrugsoptimering.
Det gør vi for konstant at holde hinanden op på bedre forbrugsvaner. Vil du høre mere om vores tiltag, så er du altid velkommen til at kontakte os.

We care about nature

Hos BIBUS SINDBY A/S har vi taget et aktivt valg for at mindske tab af biodiversiteten. Helt konkret har vi etableret et stort udendørsområde med vandhul, insekthoteller, sandbade, tørvestabler og frugttræer til bestøvning. Du kan følge udviklingen på vores hjemmeside eller gøre som vores medarbejdere - gå med på en tur rundt på de naturlige stier, kig dig omkring eller hold en pause ved bålstedet og lad sanserne få en anderledes oplevelse i en travl hverdag.
Vores "have" er et fælles projekt, og derfor er det naturligt, at vores jubilarer udvælger det træ eller den busk, de ønsker at have stående i fremtiden.
Udadtil prøver vi at få vores leverandører til at tage aktivt stilling til, hvad lige netop de kan gøre. Alene kan vi ikke redde alverden – men sammen en god del. Vi vil altid gerne inspireres og udfordres, så har i nogen bud på, hvordan vi bliver endnu bedre så sig endelig til.

Vores vigtigste ressource

Det er vores medarbejdere! Vi ønsker at dyrke det hele menneske. Det gør vi ved at interessere os for hinanden.
Vi ønsker, at vores medarbejdere har et sundt familieliv, et aktivt fritidsliv og et meningsfyldt arbejdsliv.
Kort sagt: Døgnet har 24 timer - så en tredjedel med fuld fokus på firmaet bør og skal være nok. Så er der også energi til at løfte i fælles flok, når det indimellem kræves. Vi ønsker at tiltrække alle slags mennesker, og vi ønsker, at alle skal have lige rettigheder for at få en uddannelse og karriere, uanset etnicitet, religion, handicaps eller køn.
For tiden gøres dette ved, at vi støtter håndbold og fodbold spilleres mulighed for at kombinere elitesport og uddannelse. Firmaets børn samt psykisk handicappede. Det kan du læse mere på vores hjemmeside under sponsrater.

Vores værdisæt med få ord

Hos BIBUS SINDBY A/S tager vi ordet ORDENTLIGHED meget alvorligt.

Vi ved at det er et ældre og lidt støvet ord, men det dækker over den måde, vi ser på verden.

- Vi ønsker kun at samarbejde med leverandører, der overholder gældende miljøregler
- Vi tager kraftigt afstand fra tvangs- og børnearbejde
- Vi aflægger jævnligt besøg hos vores leverandører, for at sikre og præge, at vi deler et fælles værdigrundlag
- Vi sikrer, at de medarbejdere vi vælger følger og efterlever disse værdier

Vi prioriterer vores værdier højere end kortsigtet profitjagt, da det på den lange bane har vist sig,
at udmønte i bedre resultater
Du kan læse vores Code of Conduct for at få mere information om vores retningslinjer.

Vi finder en løsning

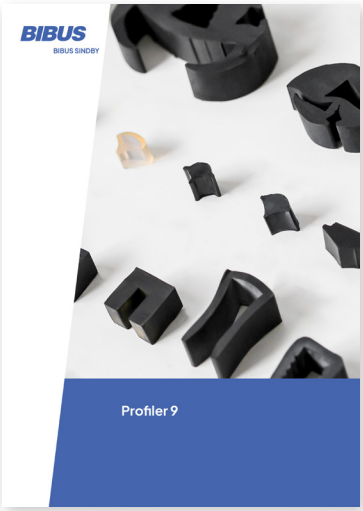

Som nævnt arbejder vores medarbejdere ofte tæt sammen med kunden for at finde den ideelle løsning. Gennem deltagelse på messer over hele verden sikres det, at vi altid er opdateret på den nyeste viden og de nyeste produkter. På den måde opbygger vi et stort og globalt net af forbindelser til producenter.

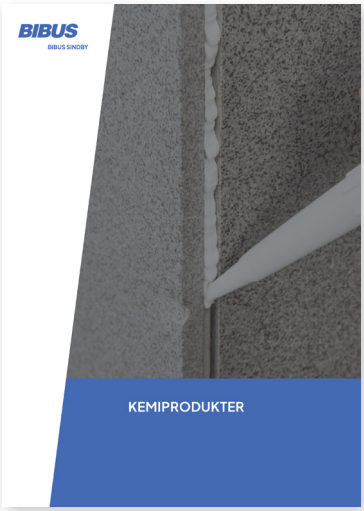

Hvert år udvikles +400 nye produkter i samarbejde med kunderne, enten som eksklusive produkter eller som nye lagervarer hos os. Dette aftales fra projekt til projekt og kommer an på, hvad der er mest fordelagtigt for begge parter.

Vi ser frem til vores samarbejde!

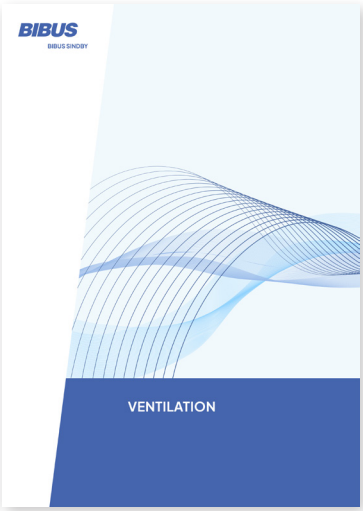

Med venlig hilsen
Keld Hansen

Energioptimering

BIBUS SINDBY A/S iværksatte i september 2022 en proces, hvor vi gennemgik vores el- og gasforbrug. Med en ny investering i belysning samt en simpel adfærdsændring, lykkedes vi med at reducere vores elforbrug med over 40%.

Vi offentliggør vores forbrug internt en gang i måneden for konstant at holde hinanden op på bedre forbrugsvaner. På vores hjemmeside kan du se hvordan vores energiforbrug har udviklet sig.

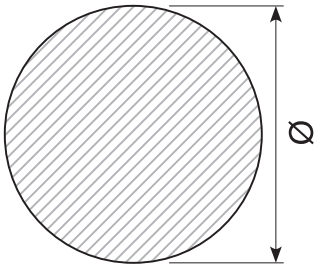

Vil du høre mere om vores tiltag, så er du altid velkommen til at kontakte os.

Lydisoleringsmaterialet er lavet af åbencellede, fleksible skummaterialer i tungere densiteter. Den forøgede densitet er opnået ved at anvende regenereret skum.
Anvendelsesområdet kan være lydisolering af motorrum i lystbåde, vindmøllehuse, kompressorer og andre støjende maskiner, hvor det er muligt at adskille støjkilden fra det omliggende område. Da der ofte skal etableres et kølende luftskifte i disse situationer, laver man en lydsluse beklædt med lydabsorptionsmaeriale. Granulatkoldskum med enestående lyddæmpningsevne benyttes til beklædning af motorrum, maskinafskærmninger, ventilationskamre og st øjkabiner. Grundet den lave densitet kan den også med fordel anvendes som absorbent.

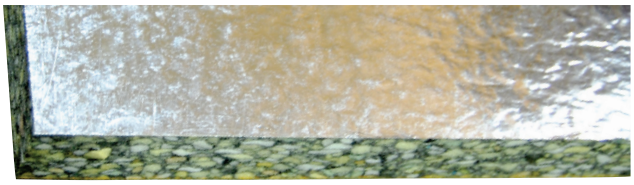

The soundproofing material is made of open-celled, flexible foam materials in heavier densities. The increased density is achieved by using regenerated foam. The material can be used to soundproof the engine compartment in yachting, wind turbine housings, compressors and other noisy machines where it is possible to separate the noise source from the surrounding area. It is often necessary to assure a cooling air circulation in these situations. Therefore it is recommended to create a sound lock covered with soundproofing material.
Granulate cold foam with unique soundproofing ability is used for coating of engine compartment, machine guards, ventilation chambers and noise cabins. Due to the low density it may also be used as absorbent.

Lydabsorptionsmaterialer (PU) er typisk lavet af åbencellede, fleksible skummaterialer i lettere densiteter. Anvendelsesområdet vil typisk være indvendig beklædning af førerkabiner, støjskærme, lydsluser, kanalvægge og ligende situationer, hvor det ikke er muligt at adskille støjkilden fra det omkringliggende område.

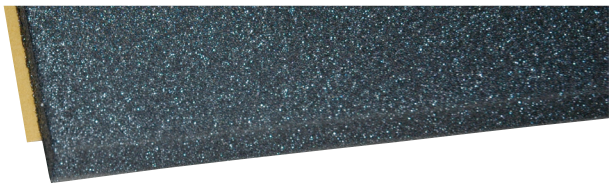

Soundproofing materials (PU) are typically made of open-celled, flexible foam materials in lighter densities. The field of application will typically be interior sheathing of cabs, noise barriers, sound locks, canal walls and similar situations where it is not possible to separate the noise source from the surrounding area.

Temperaturbestandighed °C ***Temperature resistance °C***	-50 til +125°C	-50 til +125°C
Egenskaber ***Properties***	Fremragende vejrbestandighed. God kemisk bestandighed (undtagen ved organisk opløsningsmiddel, aromatiske- og vegetabilske olier). *Excellent weather resistance. Good chemical resistance (except for organic solvent, aromatic and vegetable oils).*	

(1) På grund af mange mulige kemikalier, opløsningsmidler, arbejdstemperaturer og arbejdstider kan de oplyste værdier i enkelte tilfælde udvise forandringer. Især kan en elastomeretype, som normalt udviser ringe bestandighed, udvise en meget god resistens overfor bestemte medier.
In view of the multitude of chemicals, solvents, application temperatures and times, the value quoted may vary in some cases. For example one type of elastomer, which normally has only low resistance properties, could show very good resistance to certain media.

(2) Ved relativ lave hhv. høje temperaturer reduceres modstanden normalt. *At relatively high or low temperatures, resistance generally drops.*

(3) God udvidelsesbestandighed overfor forskellige blødgørere. *Good expansion resistance to various ester based plasticizers.*

(4) Det drejer sig om grænseværdier, som kan svinge alt efter sammensætningen af blandingen. Vedvarende indsætning i grænseområderne ændrer de fysiske værdier. Til ekstreme påvirkninger kræves særlige elastomere-blandinger.
These are borderline values which, depending on composition of the mixture, can vary. If used permanently in such borderline areas, this can lead to a change in the physical values. For such extreme applications it is advisable to use special elastomer mixtures.
